- Most (81%) non-confined home structure fires involving washers or dryers began in a laundry room or area.
- Most of these home fires involve clothes dryers (92% in 2003-2006).
- The risk of fire is slightly higher for gas-fueled clothes dryers than for electric-powered clothes dryers.
- The leading cause (29% of fires) of home clothes dryer and washer fires was failure to clean.

*Homes are dwellings, duplexes, manufactured homes, apartments, townhouses, rowhouses, and condominiums.

Estimates are derived from the U.S. Fire Administration National Fire Incident Reporting System (NFIRS) Version 5.0 and NFPA’s annual fire department experience survey.
