Introduction to ROMA in the time of COVID

- Need for Virtual ROMA training
- Importance of standardization of presentation
- Development of protocols
- NCRTs need specialized training to produce virtual training
- Addition of “virtual” option on the training schedule tab for reporting purposes

ROMA in a Crisis

- The key elements of ROMA are more critical than ever when faced with a crisis.
- The concept that there is “no time” for ROMA is incorrect.
- **ROMA will support the network to more effectively administer CARES funding.**
- ROMA is still ROMA in a crisis– it just may need to happen more rapidly!

Rapid ROMA Time Table

- Assessment – what do you have documented about the past 100 days?
- Planning – how did planning happen? Leadership teams suggest new services and delivery processes? How quickly did you respond with action? Was there actual “planning” that happened?
- Implementation – what is the implementation period? Next 90 days? 2 years?
- Reporting – internal reporting should be happening every 30 days to give you the data you need to assure you are on the right path.
- Analysis of data – are you doing what you expect to do? Are you reaching the right people? Have you made any difference?
- Re-assessment – this must be constantly happening
