WAP Memorandum 086

REPLY TO

ATTN OF: *elb*
**Erica Burrin, Weatherization Assistance Program, Program Manager
Weatherization and Intergovernmental Program Office**

SUBJECT: **WAP Enhancement & Innovation Funding Opportunity Announcement (DE-FOA-0002520)**

TO: **Weatherization Assistance Program Grantees**

The Department of Energy's (DOE) Weatherization Assistance Program ("Program" or "WAP") is pleased to share Funding Opportunity Announcement (FOA) DE-FOA-002520: WAP Enhancement & Innovation.

Within Public Law 116-260, signed December 27, 2020, Congress directed the DOE to establish a competitive program for "WAP Enhancement and Innovation" (E&I). Financial assistance is available to state, local, tribal and non-profit organizations. A total of \$18.6 million is available from the FY 2021 appropriation with a maximum award amount of \$2 million. Through partnerships and leveraging of the DOE WAP and other funding sources, these awards will enable deep energy retrofits of low-income housing in four topic areas:

- 1) Place-based initiatives;
- 2) Multifamily housing;
- 3) Single family and manufactured housing;
- 4) Workforce development.

Applicants are encouraged to use awarded E&I funds in conjunction with DOE WAP formula awards and other funding sources to deploy demonstration projects that have potential to be scaled nationally, enhance the benefits realized by underserved communities, and ensure an equitable transition to a clean-energy economy.

Building a clean-energy economy and addressing the climate crisis is a top priority of the Biden Administration. This FOA will advance the Biden Administration's goals to achieve carbon pollution-free electricity by 2035 and "deliver an equitable, clean energy future, and put the United States on a path to achieve net-zero emissions, economy-wide, by no later than 2050" to the benefit of all Americans.

The activities to be funded under this FOA will support the government-wide approach to the climate crisis by driving the innovation that can lead to the deployment of energy efficiency retrofits and clean energy technologies, which are critical for climate protection. Specifically, this FOA will support the goals of carbon

pollution-free electricity by 2035 and net zero GHG emissions by 2050 while also supporting quality jobs and economic growth by:

- Developing new place-based methods for targeting and delivering deep energy retrofits to benefit communities disproportionately impacted by high energy burden;
- Increasing the number of homes eligible for energy efficiency retrofits by making homes weatherization and electrification ready, while also ensuring healthy indoor environments;
- Growing community partnerships and leveraging additional funds to maximize the installation of renewable and new technologies; and,
- Supporting workforce development and creating pathways to careers in the home performance, energy efficiency, and renewable energy sectors by hiring and retaining individuals underrepresented in these industries.

Additional information is available on the EERE Funding Opportunity Exchange [website](#). Submission deadlines are Concept Paper Submission Deadline: 1/20/2022 5:00 PM ET and Full Application Submission Deadline: 2/28/2022 5:00 PM ET.

If you have questions regarding the information in this Memorandum, please contact your DOE Project Officer.
