IV.6 State Plan Hearings (Note: attach notes and transcripts to the SF-424)

| Date Held | Newspapers that publicized the hearings and the dates the notice ran |
|------------|---|
| 04/14/2023 | A public hearing was held to receive public input on the PY2023 State Plan at 10:00 am Friday, April 14, 2023, at the Nebraska Department of Environment and Energy. Notice of the meeting was published in the Omaha World-Herald and posted on the Public Hearing section of the Nebraska Department of Environment and Energy's website at http://dee.ne.gov/Press.nsf/PRList.xsp on April 4, 2023. It was distributed via email to all WAP program managers and agency executive directors. There were one (1) all NDEE employees who attended the Public Hearing and all attendees declared no comment when they were called to announce themselves and make comments during the hearing. |

PY 2023-2024 Weatherization Readiness Funding Plan

Distribution of Funds

The Department of Environment and Energy will distribute the Weatherization Readiness Funding (WRF) among the states existing Subgrantees (seven community action agencies and one non-profit organization) utilizing the formula allocation, with a weighted average based on population, used for the Annual Weatherization Funding.

Priority for Service Delivery

Clients will continue to serve clients by date of application submission, be a priority, and by county. For deferred homes, the following Priority List shall be considered when prioritizing the delivers of WRF services:

1. The number of issues associated with the deferral,
2. The number of possible Energy Efficiency Measures impacted by the use of WRF, for example
 - o Roof Repairs will allow for the completion of three Attic Insulation ECMs and a Kneewall Insulation Measure,
 - o Addressing missing electrical switch places and a missing electrical box cover allows for the completion of Exterior Wall Insulation ECMs, Attic Insulation Measures and Kneewall Insulation Measures,
 - o Completing water leak repairs from the plumbing system or from drainage issues results in the completion of a Foundation Insulation ECM, a Sillbox Insulation and a Floor Insulation, 3) The estimated cost associated with correcting the deferral issue and the extent of damage (i.e. limited termite damage, small leaks, percentages of missing siding or trim),
3. The time elapsed since the deferral, and
4. The date of construction of the home, older homes (constructed before 2000) should be given higher priority.

Average Cost per Unit (WRF ACPU)

The NeWAP WRF Average Cost per Unit (WRF ACPU) is \$4,000.00. Units that exceed the WRF ACPU of \$4,000 must receive approval from the NDEE on a case-by-case basis, prior to implementation.

Funding Restrictions and/or Limitations

In PY 2023, the use of Weatherization Readiness Funding (WRF):

- Is only available for use on Only Owner-Occupied Homes
- Is limited for Cleanup or Remediation purposes; including but not limited to Lead paint, Asbestos (confirmed or suspected, including vermiculite), mold and/or moisture, etc. Subgrantees that plan to install drywall and/or joint tape/finish, utilizing WRF, must be reviewed and approved by NDEE on a case-by-case basis, prior to implementation.
- Is limited for the installation of missing drywall and joint tape/finish and is only allowed when it directly impacts the implementation of an ECM and to ensure accurate blower door testing on the unit can be completed. Subgrantees that plan to install drywall and/or joint tape/finish, utilizing WRF, must be reviewed and approved by NDEE on a case-by-case basis, prior to implementation.

These case-by case decisions are made according to the facts associated with the particular situation in the dwelling unit, the proposed cost(s) of the work, future weatherization work and/or energy impact on the client.

Subgrantee Monitoring

Each subgrantee is required to perform a Final Inspection on work performed with WRF funding to ensure that the completed work is satisfactory, allows for the completion of weatherization work and meets state, local and agency code and contractual requirements. Documentation is required to be kept in each client file as evidence that a final inspection has been performed.

U.S. Department of Energy
WEATHERIZATION ASSISTANCE PROGRAM (WAP)
WEATHERIZATION ANNUAL FILE WORKSHEET

(Grant Number: EE0009914, State: NE, Program Year: 2023)

Grantee Monitoring

NDEE monitors will complete inspections of Subgrantee submitted WRF units as part of the onsite in-progress and Quality Control Inspections discussed and quantified in the Nebraska Department of Environment and Energy Program Monitoring and Compliance Strategy (table) in Section 5.0 – Technical Assistance of this PY 2023 Annual Plan.

Subgrantee Tracking

Subgrantees will work with the NDEE to develop a Deferral Tracking system, as part of the NDEE database system, which will 1) provide a consistent tracking across the NeWAP system, 2) be used in the development of the Avoided Deferrals Summary of the Monitoring and Leveraging Report discussed below and 3) will provide Subgrantee and Grantee managers with data that will be used in program development for possible future funding opportunities.

Grantee Tracking

NDEE will track use the NDEE database system to track and provide, as part of the Monitoring and Leveraging Report, an Avoided Deferrals Summary of all units in PY 2023 that utilize the WRF. The Summary will include the number of dwelling units made weatherization ready with these funds and for each building or unit the following information will be provided:

- Year of construction,
- Housing Type (site-built single family, manufactured housing),
- Nature of repairs needed which prohibit weatherization (where applicable, identify multiple repairs or remediation reasons for a single building). Including but not limited to:
 - Roof repair
 - Wall repair (interior or exterior)
 - Ceiling repair
 - Floor repair
 - Foundation or subspace repair
 - Exterior drainage repairs (e.g., landscaping or gutters)
 - Plumbing repairs
 - Electrical repair
- DOE WRF expenditure per unit and building; and,
- Leveraged fund expenditure per unit and building (i.e., funds such as LIHEAP, HUD, nonfederal, etc. braided with DOE WRF to make building weatherization ready).

U.S. Department of Energy
WEATHERIZATION ASSISTANCE PROGRAM (WAP)
STATE PLAN/MASTER FILE WORKSHEET

(Grant Number: EE0009914, State: NE, Program Year: 2023)

This worksheet should be completed as specified in Section III of the Weatherization Assistance Program Application Package.

V.1 Eligibility

V.1.1 Approach to Determining Client Eligibility

Provide a description of the definition of income used to determine eligibility

Definition of Income Used to Determine Eligibility (Client Eligibility)

In accordance with USDOE Weatherization Program Notice 23-3, effective as of February 3, 2023, Low income will mean that income in relation to family size, which: (1) is at or below 200 percent of the poverty level determined in accordance with criteria established by the Director of the Office of Management and Budget, or (2) is the basis on which cash assistance payments have been paid at any time during the preceding twelve months under Titles IV and XVI of the Social Security Act, or (3) is the basis on which energy assistance payments have been paid under the Low Income Home Energy Assistance Program of 1981 (LIHEAP), provided that such basis is at least 200 percent of the poverty level determined in accordance with the criteria established by the Director of the Office of Management and Budget.

- Subgrantees are reminded that the supporting documentation for applicants applying for weatherization that may be on a waiting list or for other reasons must have their eligibility documentation updated at least annually.

WPN 22-5 extended categorical income eligibility to HUD means-tested programs. WAP subrecipients may certify that applicants have met the income requirements of HUD means-test programs through mechanisms including, but not limited to, applicant documentation, interagency lists of recipients, shared system databases, etc. The method of verification of eligibility will be included in the client file.

Describe what household eligibility basis will be used in the Program

All dwelling units certified as eligible for services shall be occupied by an income-eligible household family unit with income at or below 200 percent of the poverty level, or "which contains a member who has received cash assistance payments under Title IV or XVI of the Social Security Act or applicable State or local law during the twelve month period preceding the determination of eligibility for weatherization assistance," or which contains a member which has received energy assistance payments under the LIHEAP during the twelve month period preceding the determination of eligibility for weatherization assistance.

Describe the process for ensuring qualified aliens are eligible for weatherization benefits

Subgrantees must request documentation from WAP applicants and verify eligibility status through the Systematic Alien Verification for Entitlements (SAVE) Program. Such documentation can be provided to Nebraska Department of Environment and Energy (NDEE) staff for eligibility verification.

The SAVE Program is a web-based service that helps federal, state and local benefit-issuing agencies, institutions, and licensing agencies determine the immigration status of benefit applicants so only those entitled to benefits receive them.

USDOE has directed grantees to guidance provided by Health and Human Services (HHS) under LIHEAP. This guidance can be found by going to <http://aspe.hhs.gov/hsp/immigration/restrictions-sum.shtml>. NDEE is registered for the SAVE Program to verify qualified alien status of Weatherization Program applicants for sub-grantees. Sub-grantees submit the required information to the NDEE who completes the verification process. The verification documentation is required as part of the Subgrantee Client Files.

V.1.2 Approach to Determining Building Eligibility

Procedures to determine that units weatherized have eligibility documentation

Subgrantees are required to keep documentation in each client file for review during Program Compliance and Onsite Project monitoring visits by NDEE WAP staff. A minimum of 20 client files will be reviewed at each Subgrantee during Program Compliance monitoring to assess compliance with this requirement.

Describe Reweathering compliance

U.S. Department of Energy
WEATHERIZATION ASSISTANCE PROGRAM (WAP)
STATE PLAN/MASTER FILE WORKSHEET

(Grant Number: EE0009914, State: NE, Program Year: 2023)

Subgrantees are required to retain records of all dwellings that received Federal funds including LIHEAP, HUD, or USDA "weatherization" activities. Dwellings may be reweatherized if 15 years have passed since the completion of original services and quality control inspection. Nebraska has been advised that additional implementation guidance of the new reweatherization policy is forthcoming. Nebraska will ensure compliance with any additional DOE guidance.

If a previously weatherized dwelling unit has been damaged by fire, flood, natural catastrophic weather or environmental occurrence, weatherization crews may return to a unit reported as a completion without regard to date of weatherization. 10 CFR 440.18(f)(2)(ii). Local authorities must deem the dwelling unit(s) salvageable as well as habitable and if the damage to the materials is not covered by insurance or other form of compensation. The use of USDOE WAP funds is limited to eligible weatherization activities and the purchase and delivery of weatherization materials (WPN 16-7). No more than ten (10) percent of a Subgrantee's USDOE completions may be reweatherized without prior approval from the Department of Environment and Energy.

Addresses of completed weatherized units and dates they were completed are tracked by Subgrantees through the NDEE database system. Each agency references new applications to that database to comply with re-weatherization regulations in 10 CFR 440.18(f)(2)(iii) Allowable expenditures. The Department of Environment and Energy also uses a database to track WAP clients and retains client BCJO files for completed units for ten years. The database is used to cross-reference submitted completed units to already completed units. Subgrantees are also responsible to let the Department of Environment and Energy know when a unit is a re-weatherized unit.

Describe what structures are eligible for weatherization

Eligible housing types include owner and renter-occupied single-family homes, manufactured (mobile) homes, and multifamily buildings.

Historic Preservation

On November 6, 2020, the NDEE extended the Programmatic Agreement (PA) with the Nebraska State Historical Preservation Office (NSHPO) and the USDOE until December 31, 2030. Properties funded under the WAP are considered "undertakings" subject to review under Section 106 of the National Historic Preservation Act, 16 U.S.C. 470f (NHPA) and its implementing regulations at 36 CFR 800, and include rehabilitation, energy efficiency, retrofits, renewables, and weatherization (undertakings). SHPO contact information is available at the following link: <http://www.ncshpo.org/shpodirectory.shtml> click on the State of Nebraska to find the Nebraska SHPO contact information.

Section 110(k) of the NHPA applies to USDOE funded activities. Recipients shall avoid taking any action that results in an adverse effect to historic properties pending compliance with Section 106.

Dwellings that may be weatherized include:

1. Framed Homes
 - a. Single family owner-occupied
 - b. Single family rental
 - c. Multi-family dwellings
2. Manufactured Homes
 - a. Owner-occupied
 - b. Renter-occupied

Describe how Rental Units/Multifamily Buildings will be addressed

References to the specific eligibility of multifamily buildings is addressed in the regulations, 10 CFR 440.22(b)(2). Additional USDOE guidance can be found in USDOE Weatherization Program Notice 22-12.

Renter occupied housing units are eligible for weatherization services if they meet all other eligibility requirements. Signed permission from the owner, or authorized agent, of each eligible dwelling unit must be obtained and documented in the client file prior to performing any inspections, tests, or weatherization

U.S. Department of Energy
WEATHERIZATION ASSISTANCE PROGRAM (WAP)
STATE PLAN/MASTER FILE WORKSHEET

(Grant Number: EE0009914, State: NE, Program Year: 2023)

measures on a dwelling. Rent to own and contract for deed arrangements shall be considered rental properties.

NDEE does not require landlord contributions to provide weatherization services. However, funding restrictions (i.e. excessive health and safety or incidental repairs, or other funding limitations) may require a landlord contribution to allow comprehensive weatherization work to proceed. Landlord contributions should be sought for the weatherization of multifamily complexes to maximize the benefits to the low-income clients and to stretch limited WAP funding, when feasible.

Rental units may be weatherized when occupied by an eligible client; and

- The Subgrantee has written permission from the owner or his agent. Such written permission shall be permanently maintained in the file of the client whose unit is weatherized.
- The benefits of weatherization assistance will accrue primarily to low-income tenants.
- Not less than 66 percent (50 percent for duplexes and four-unit buildings) of the dwelling units in the building are occupied by eligible clients or will become occupied by eligible clients within 180 days under a Federal, State, or local program for rehabilitating the building or making similar improvements to the building.
- The Subgrantee must obtain and place in the client file a signed agreement from the landlord (or authorized agent of the landlord) that states that for a minimum of 12 months after weatherization work has been completed on a dwelling, the tenants in that dwelling will not be subjected to rent increases because of the increased value of dwelling units due solely to weatherization assistance provided under this part.
- No undue or excessive enhancement shall occur to the value of the dwelling units.
- In the event of a dispute between the tenant and property owner regarding the issues listed above, the Subgrantee will attempt to resolve the dispute; if that fails, the tenant will be referred to legal aid by the Subgrantee.
- In the case of a vacant rental dwelling, weatherization assistance may be provided if there is assurance that a low-income household will inhabit the dwelling within 180 days of the date the weatherization service was completed.
- Subgrantee has provided copies of the signed Landlord Agreements to the tenants and ensure that documentation is placed in the Subgrantee Client File.

The Nebraska WAP does not file liens or enforce restrictions.

Under 10 CFR 440.18(f)(1): No grant funds awarded under this part shall be used for any of the following purposes: To weatherize a dwelling unit which is designated for acquisition or clearance by a Federal, State or local program within 12 months from the date weatherization of the dwelling unit would be scheduled to be completed.

Multi-family Buildings

The total amount of funds that can be invested in a multi-family project is determined as follows: Multiply the total number of income-eligible units in the multi-family building by the current statewide average cost per unit. The total is the maximum amount of USDOE funding available to weatherize the building. All units in the building can be served and all units should be reported to USDOE. Sub-grantees must submit multi-family projects greater than 24 units to the Department of Environment and Energy for review and approval before work begins and costs are incurred. The Department of Environment and Energy reviews the proposed project and submits to the USDOE Program Office as per the Multi-Family Review Protocol.

Describe the deferral Process

Description of Expenditure Limit

Historically, Nebraska has not limited Health & Safety investments in a home to a “per-unit dollar cost” but allocates between 18-22 percent of its annual allocation to cover Health & Safety related expenditures in homes state-wide.

As part of NDEE’s plan development and submission, staff reviews the previous year’s invoiced Health and Safety expenditures and evaluates the invoiced cost and it’s annual percentage allocation. Based on this review and evaluation, the DOE PY 2023-2024, and DOE Bil funding, the estimated state-wide per dwelling unit limit Health & Safety expenditure is \$1,800. Units may exceed the \$1,800 limit if approved in advance by NDEE on a case-by-case basis.

Deferring Weatherization Services to Eligible Clients

Although a client may be eligible for the Weatherization Program, there are situations or conditions where weatherization services should be deferred (i.e. delayed or postponed). Deferring work on a dwelling does not mean the dwelling will never be weatherized. If the situation or condition causing the deferral is remedied weatherization work can continue. Deferral conditions may include but are not limited to:

- The client has known health conditions that prohibit the installation of insulation and other weatherization materials.
- The building structure or its mechanical systems, including electrical and plumbing, are in such a state of disrepair that failure is imminent, and the

**U.S. Department of Energy
WEATHERIZATION ASSISTANCE PROGRAM (WAP)
STATE PLAN/MASTER FILE WORKSHEET**

(Grant Number: EE0009914, State: NE, Program Year: 2023)

conditions cannot be resolved cost-effectively.

- The house has sewage or other sanitary problems that would further endanger the client and weatherization installers if weatherization work were performed.
- The house has been condemned or electrical, heating, plumbing, or other equipment has been “red tagged” by local or state building officials or utilities and cannot be remedied by weatherization funds.
- Moisture problems have developed signs of significant mold.
- Dangerous conditions exist due to high carbon monoxide levels in combustion appliances and cannot be resolved under existing health and safety measures.
- The client is uncooperative, abusive, or threatening to the crew, subcontractors, auditors, inspectors, or others who must work on or visit the house.
- The extent and condition of lead-based paint in the house would potentially create further health and safety hazards.
- If, in the judgment of the energy auditor, any condition exists which may endanger the health and/or safety of the work crew or subcontractor, the work should not proceed until the condition is corrected.
- The property has suspected, friable asbestos containing materials.
- The property is currently listed for sale and/or the eligible occupant will be moving.
- The property has a significant remodel in progress.

The Deferral Process

There are conditions and situations where a Subgrantee must defer and not weatherize an otherwise eligible dwelling unit due to certain occupant issues or dwelling characteristic that are beyond the scope of WAP. The decision to defer work in a dwelling is difficult but necessary in some cases. This does not mean that assistance will never be available, but that work must be postponed until the problems can be resolved and/or alternative sources of help are found.

If a subgrantee staff member, including but not limited to Energy Auditor(s) and Crew Members and contractors, determines any conditions that exist, which may endanger the health and/or safety of the workers or occupants, should be deferred until the conditions are corrected. Crews and contractors are expected to pursue all reasonable options on behalf of the client.

When a Subgrantee has made the decision to defer work on a dwelling, it must notify the client, and the landlord when appropriate, in writing of the reason using the NeWAP Weatherization Deferral Notice (Wx-4). A copy of the notification, with documentation justifying the decision to defer services, must be kept in the client file. Subgrantees should attempt to identify all reasons why work is being deferred on a home and notify the client or landlord of all the reasons and what must be done for weatherization work to resume.

In the cases of deferral, the client is to be referred to other known sources of funding to help alleviate the issues causing the deferral. Copies of all deferred weatherization applications and jobs shall be forwarded to NDEE for inclusion in a NeWAP Deferral Database Tracking System currently being developed.

V.1.3 Definition of Children

Definition of children (below age): 6

V.1.4 Approach to Tribal Organizations

Recommend tribal organization(s) be treated as local applicant?

If YES, Recommendation. If NO, Statement that assistance to low-income tribe members and other low-income persons is equal.

Low-income members of Indian tribes will receive benefits equivalent to the assistance provided to other low-income persons within Nebraska.

V.2 Selection of Areas to Be Served

Current service areas are predominantly based upon the historic boundaries of the state CAP agencies. This was done for two reasons. First, Nebraska Subgrantee CAP agencies in general, operate within boundaries that best serve the clients they serve through multiple assistance programs. Second, this approach enables CAPs to use existing outreach structures to recruit eligible clients. However, the State reserves the right to re-designate weatherization service areas during a program year should production of homes or service to eligible clients become deficient in any given service area for the WAP.

The Nebraska Department of Environment and Energy reserves the right to operate, on a temporary basis, the Weatherization Program in the territory of any defunded Subgrantee. This will be done to ensure continued service to an area during the search for a new Subgrantee.

**U.S. Department of Energy
WEATHERIZATION ASSISTANCE PROGRAM (WAP)
STATE PLAN/MASTER FILE WORKSHEET**

(Grant Number: EE0009914, State: NE, Program Year: 2023)

Formula to calculate Subgrantees allocation

Weighted average based on population.

{Population (C)} {200% of Poverty (C)} {Poverty(C)} {Elderly(C)}

0.1 X {Population (S)} + 0.2 X {200% of Poverty (S)} + 0.3 X {Poverty (S)} + 0.4 X {Elderly (S)}

C = County S= State

Subgrantees under the WAP were required to notify the NDEE by January 20, 2023, of their interest in continuing as a service provider for the program year beginning July 1 of that year. At the time of submitting Subgrantee letter of intents to provide weatherization service in their specific counties, they will also submit any changes to: Articles of Incorporation, Mission Statement, key agency personnel, Board of Directors and representation, organizational chart, and proposed staffing levels. The application must also address:

- The organization’s experience, performance and training in weatherization or housing renovation activities;
- The organization’s experience in assisting low income persons in the area to be served; and
- The organization’s capacity to undertake a timely and effective weatherization program.

For PY2023 Subgrantees notification of intent will be the written notification to serve the counties they submitted in their most recent Request for Proposal (RFP) for applications. At the time of the submission of the letter of intent, they will also provide any changes that were submitted in the RFP applications that would apply to PY2023.

V.3 Priorities

Eligible clients will receive weatherization assistance in Nebraska according to the following priorities:

1. Persons over 60 years of age;
2. Persons with disabilities;
3. Families with children under 6 years old;
4. High residential energy users; and
5. Households with a high-energy burden.

Subgrantees must serve clients according to date of application submission, by priority, and by county. As a rule, within an individual county, a lower priority client should never be served prior to a higher priority client unless the higher priority client was not available during the available time period. Subgrantees must document irregularities in the selection of clients when a high priority client is not available.

As defined in 10 CFR 440, the term Persons with Disabilities means any individual (1) who is a handicapped individual as defined in section 7(6) of the Rehabilitation Act of 1973, (2) who is under a disability as defined in section 1614(a)(3)(A) or 223(d)(1) of the Social Security Act or in section 102(7) of the Developmental Disabilities Services and Facilities Construction Act, or (3) who is receiving benefits under chapter 11 or 15 of title 38, U.S.C.

As defined in 10 CFR 440.3, high residential energy user means a low-income household whose residential energy expenditures exceed the median level of residential expenditures for all low-income households in the state.

As defined in 10 CFR 440.3 household with a high-energy burden means a low-income household whose residential energy burden (residential expenditures divided by the annual income of that household times one hundred (100) percent exceeds the median level of energy burden for all low-income households in the state.

V.4 Climatic Conditions

**U.S. Department of Energy
WEATHERIZATION ASSISTANCE PROGRAM (WAP)
STATE PLAN/MASTER FILE WORKSHEET**

(Grant Number: EE0009914, State: NE, Program Year: 2023)

Total heating degree-days in Nebraska range from a high of 7151 in the northcentral region of the State to a low of 5844 in Southeast region of Nebraska. The average heating degree-days have been supplied by the National Oceanic and Atmospheric Administration. Site-specific weather data is used in application of the NEAT audit. The average heating degree-days for each Subgrantee are set out below:

| | |
|---|-------|
| Blue Valley Community Action | 6,056 |
| Central Nebraska Community Services | 7,151 |
| Northeast NE Community Action Partnership | 6,643 |
| Community Action Partnership of Lancaster & Saunders Counties | 6,056 |
| Community Action Partnership of Mid Nebraska | 6,686 |
| Northwest Community Action Partnership | 6,775 |
| Southeast NE Community Action Partnership | 5,844 |
| Habitat for Humanity of Omaha | 6506 |

V.5 Type of Weatherization Work to Be Done

V.5.1 Technical Guides and Materials

In Program Year 2023, the Nebraska WAP network will utilize the 2021 Nebraska Field Guide and Installation Standards along with the most updated Policies and Procedures. NDEE informed Subgrantees at that time of the expectations for work quality and adherence to the Field Guide and Installation Standards. NDEE implemented the Nebraska Field Guide and Installation Standards after approval by the Department of Energy in Program Year 2021 and will be in effect for five (5) years as Nebraska's technical guides. The Nebraska Field Guide and Installation Standards manual aligns with the USDOE Standard Work Specifications and the work quality standards that will meet the technical requirements for the WAP outlined in USDOE WPN 22-4, Section 2 and 10 CFR 440.

Each Subgrantee, by signing their Financial Aid Agreement with NDEE, agrees they understand the expectations of the Nebraska Field Guide and Installation Standards, USDOE WPN 22-4, energy audit procedures, and 10 CFR 440 including Appendix A. By signing this agreement Subgrantees will also be acknowledging that they will include these expectations within their contract agreements.

The approved Nebraska Field Guide and Installation Standards are available on the Department of Environment and Energy Weatherization website for Subgrantees to provide downloadable Installation Standards to crews and contract vendors. For in-network WAP Directors, Managers, or Certified Quality Control Inspectors employees the Department of Environment and Energy provides the Field Guides and Installation Standards in pdf and e-pub format for either iPads or Tablet Readers. All contract vendors must provide their own electronic reader to download the Field Guides & Installation Standards.

Subgrantees must provide a mechanism through their contractual agreements verifying that vendors understand and agree to the terms and usage of the Field Guides and Installation Standards and all USDOE installation requirements.

Comments

| |
|--|
| <p>Approval of Energy Audit Procedures</p> <p>NDEE received USDOE approval, effective June 2, 2021, of its audit procedures for site built and for certain small multifamily buildings using the NEAT and for manufactured homes using the MHEA. Both audit tools are already USDOE approved to calculate savings-to-investment (SIR) ratios. NDEE followed the latest WPN 19-4 guidance to comply with 10 CFR 440 for re-approval.</p> <p>Single Family – National Energy Audit (NEAT)</p> <p>The National Energy Audit (NEAT) has been adopted by the Nebraska weatherization program. The U.S. Department of Energy’s most recent approved Nebraska’s Audit procedures with added User Defined measures was on March 31, 2021. Site-specific audits must be run on all single-family frame homes for all homes weatherized with Nebraska WAP funds.</p> <p>Manufactured Housing - Mobile Home Energy Audit (MHEA)</p> <p>Nebraska has chosen to utilize the Manufactured Home Energy Audit (MHEA). Site-specific audits must be completed on all mobile homes weatherized with Nebraska WAP funds. The MHEA Audit was approved with User Defined Measures by USDOE on March 31, 2021.</p> <p>Small Multi-family Energy Audits</p> <p>When weathering a multi-family building of 4-25 units, Subgrantees must utilize DOE's low-rise, Region 3, priority list with, NeWAP's modifications, that DOE Approved August 10, 2022.</p> <p>Large Multi-family Energy Audits</p> <p>The U.S. Department of Energy has indicated that they will rely on the MulTEA, EA-QUIP, REM audit software, HEAT, eQUEST and TREAT audits for these larger, multi-family buildings.</p> <p>When considering weatherization of a multi-family building of greater than 25 units, Subgrantees must consult the NDEE for Energy Audit and technical assistance before performing weatherization work so that required information can be submitted for USDOE review and approval of these types of weatherization projects.</p> <p>Savings to Investment Ratio</p> |
|--|

U.S. Department of Energy
WEATHERIZATION ASSISTANCE PROGRAM (WAP)
STATE PLAN/MASTER FILE WORKSHEET

(Grant Number: EE0009914, State: NE, Program Year: 2023)

A SIR of 1.0 or greater means that the expected energy savings from installing the measure is equal to or greater than the initial cost of installation.

When an individual Measure SIR is not reached in multi-family (3 units and larger) building owners are allowed to buy-down DOE approved NEAT/MHEA Candidate Measures for Building Envelope and/or Baseload Energy Conservation Measures (ECMs) measures that don't achieve an individual SIR of 1 or greater as a stand-alone measure. However, in order for the measure(s) to qualify for a buy-down, the package of measures, **including the full cost of the Measure, which is to be bought down**, must have a Cumulative SIR (CSIR) of 1 or greater. **Note: Funding may not be solicited from an income-eligible homeowner. Homeowners may not contribute funds to pay the difference for a measure with an SIR of less than 1.0.**

Opting Out or Skipping Cost-effective Weatherization Measures

Opting out, skipping or "leapfrogging" of Measures that have been determined by the Energy Audit to be cost-effective is not allowed. Completion of all measures with an SIR of 1.0 or greater is required and all energy-savings measures must be considered and ranked in order of descending SIR. **The higher the SIR, the higher the priority.** Higher-ranking measures may not be skipped in order to complete a measure with a lower SIR. In other words, measures may not be skipped and/or clients cannot 'opt' out of a measure.

V.5.3 Final Inspection

Each Subgrantee is required to perform a final quality control inspection on the weatherized home completed by a Building Performance Institute, Inc. (BPI) Certified Quality Control Inspector before reporting it to the NDEE as a completed home and requesting reimbursement as required in USDOE Federal Regulations 10 CFR 440.16(g). The Quality Control Inspector must certify that work has been completed in accordance with the priority determined by the energy audit procedures required by 10 CFR 440.21.

In PY2023 Subgrantees will be required to meet USDOE WPN 22-4 Quality Work Plan requirements and to meet Quality Control Inspector (QCI) certification requirements. In PY2023 QCI work must meet or exceed standards specified in the Nebraska Standard Work Specification Field Guide and Installation Standards. Documentation is required to be kept in each client file as evidence that a final inspection has been performed by a Certified QCI. NDEE Program Monitors review client files as part of the Subgrantee monitoring to ensure compliance with this requirement. When a unit has received a QCI by the Subgrantee agency and has been monitored by a NDEE Field Conservation Technical staff, both QCI inspection forms will be included in the client file or building file.

Subgrantee agencies operating with a combined Energy Auditor and QCI will be involved in a higher quality assurance review by NDEE above ten (10) percent of all completed units. Subgrantees operating with separate Energy Auditors and QCIs will have at least five (5) percent of all completed units reviewed. Subgrantees using one person to perform both the Energy Audit and the QCI are not allowed to utilize that person to perform weatherization work on a dwelling. Subgrantees using one person as Energy Auditor and one person as QCI can allow the Energy Auditor to perform weatherization work on a dwelling, while the QCI is not allowed to perform any weatherization work on a dwelling.

Any Subgrantees utilizing an independent privately contracted QCI will provide documentation of certification of the QCI performing the inspections on completed units and include all QCI inspection forms within the client or building files.

A part of monitoring will be to ensure that final inspectors are QCI certified and are inspecting to the Nebraska Energy Auditing Procedures and SWS Field Guide. In situations where inspectors are found not upholding the high quality of work expectations or are approving work, which is not consistent with the Nebraska's SWS Field Guide, inspectors and subrecipients will be notified in writing. Corrective action plans may be required to be developed and implemented based on the severity and frequency of noncompliance. Increased monitoring may be required. Concerns will be tracked to resolution. Repeat offenders may be suspended or disqualified from conducting final inspections for the NDEE.

V.6 Weatherization Analysis of Effectiveness

The State of Nebraska is committed to providing the citizens of Nebraska with an effective weatherization program that provides quality and cost-effective services. Annually since 2015 NDEE has completed a study detailing the actual energy savings and cost-effectiveness of weatherization work completed in Nebraska. The study uses a pre-and post-consumption analysis of randomly selected homes proportionately selected based on population demographics in each Subgrantee region. The results of that study and its methodology continue to be used to provide program feedback regarding the effectiveness of specific weatherization measures, and to assist in identifying training needs or training effectiveness based on energy savings and reduction of energy burden to low-income households.

During the application process, the Subgrantees secure a signed Client Consumption Release Form which authorizes the NeWAP to obtain the consumption records for each household for a 12-month period prior to weatherization (pre-consumption) and for a 12-month period after weatherization (post-consumption). The 30-year normalized client pre- and post-consumption data, based on fuel type, is used to calculate the percentage of energy consumption savings achieved.

For the period of July 2020 to June 2021, consumption on 36 homes was evaluated and the data showed an average savings for natural gas at 9.52 percent and an average savings for electricity at 16.05 percent. In comparison to the USDOE National Evaluation results:

U.S. Department of Energy
WEATHERIZATION ASSISTANCE PROGRAM (WAP)
STATE PLAN/MASTER FILE WORKSHEET

(Grant Number: EE0009914, State: NE, Program Year: 2023)

- 2008 – 18 percent for gas, and 7 percent for electricity average annual energy savings
- 2010 – 16 percent for gas, and 8 percent for electricity average annual energy savings

The PY 2021 State of Nebraska analysis shows the annual energy savings for electricity and natural gas remain comparable to the National Evaluation results.

Nebraska is in the process of collecting and reviewing data for July 2021 to June 2022 to continue to evaluate the annual energy savings of Subgrantees weatherization work and to work with our state database developers to automate the evaluation program. These activities will continue to assist the Department of Environment and Energy in evaluating program effectiveness as well as help in identifying technical training needs or the effectiveness of training during that period.

Other Analysis of Effectiveness

The effectiveness of Subgrantee weatherization is also assessed through program technical monitoring activities and the requirement that all dwelling units weatherized in the program have an energy audit completed to measure energy effectiveness and minimum savings to investment ratio of 1.0 or better.

Inconsistencies noted through program monitoring result in actions that increase training and monitoring requirements in an effort to put a Subgrantee on the path to continuous improvement.

This year NDEE intends to continue its work to begin the implementation of core competency requirements for all program personnel at both the state and Subgrantee levels. Training will be targeted to provide personnel skills, knowledge, and the ability to perform weatherization program activities effectively.

NDEE will expand the monitoring activities of Subgrantees to include the percentage and types of efficiencies/improvement actions required as a result of on-site inspection activities.

V.7 Health and Safety

The average per dwelling expenditure of financial assistance provided under WAP for labor, weatherization materials, and related matters may not exceed \$8,250 statewide in Program Year 2023 (starting July 1, 2023), as per the U.S. Department of Energy's Weatherization Program Notice 23-1. Historically, Nebraska has not limited H&S investment to a per-unit cost, but it has allocated between 21-24 percent of its annual allocations to cover H&S-related expenditures.

In PY2023, a per dwelling unit threshold for Health and Safety expenditures of \$1,800 has been established, based on historical data. Units that do not exceed the \$1,800 threshold limit are not required to receive additional NDEE review. If the Health and Safety cost exceeds the \$1,800 threshold or remediation limits associated with minor conditions in H&S categories NDEE reviews the unit on a case-by-case basis. These case-by-case decisions are made according to the facts associated with the particular situation in the dwelling unit, the proposed cost(s) of the work and the future H&S and/or energy impact on the client.

Please see the USDOE approved Nebraska Weatherization Field Guide and Installation Standards, Section 2 for Nebraska's WAP Health and Safety Plan for Single Family Homes and Manufactured Homes. (Links to be posted on the Nebraska Department of Environment and Energy website.

V.8 Program Management

V.8.1 Overview and Organization

The Nebraska weatherization assistance program (WAP) is administered by Department of Environment and Energy (NDEE), a code agency of the State of Nebraska Executive Branch. NDEE is the Grantee agency for the state of Nebraska for USDOE Formula Grant funding and is a Subawardee of the Nebraska Department of Health & Human Services on USDHHS LIHEAP funding for the weatherization assistance portion of that state funding. NDEE also administers Nebraska's State Energy Program (SEP) as well as the Dollar & Energy Savings Loan (DESL) program. All NDEE energy assistance programs are housed in the Planning & Aid Division.

The Department of Environment and Energy is the administrator of these two funds that are passed-through to seven (7) Community Action Agencies and one (1) non-profit agency in Nebraska. The seven (7) Community Action Agencies and one (1) non-profit agency accept applications, prioritize clients based on priority level and perform the weatherization work on dwellings.

**U.S. Department of Energy
WEATHERIZATION ASSISTANCE PROGRAM (WAP)
STATE PLAN/MASTER FILE WORKSHEET**

(Grant Number: EE0009914, State: NE, Program Year: 2023)

V.8.2 Administrative Expenditure Limits

10 CFR §440.18(e) permits Subgrantees receiving less than \$350,000 in federally appropriated Low Income WAP funds to receive up to an additional 5% share of administrative funds. The Nebraska Department of Environment and Energy will use this provision in the 2023 Program Year.

V.8.3 Monitoring Activities

The Nebraska PY2023 Training and Technical Assistance and Monitoring Activities Plan is a separate attachment to this document.

V.8.4 Training and Technical Assistance Approach and Activities
