Executive Summary

The Community Services Block Grant (CSBG)

The Community Services Block Grant (CSBG) is unique among federal grant programs in that it is the only comprehensive investment exclusively focused on reducing poverty. CSBG supports a state-administered, nationwide network of local agencies whose purpose is to reduce the causes of poverty in the low-income communities they serve. Funding from CSBG allows states and Community Action Agencies (CAAs) to leverage funding, strategically target the root causes of poverty at the local level, and impact well-being and economic security on a national scale. In Fiscal Year (FY) 2020, every dollar invested in CSBG leveraged \$13.53 in other federal, state, local, volunteer, and private funds, including the value of volunteer hours. CAAs receiving CSBG funds effectively use this mix of resources to address the barriers that lead to and perpetuate systemic poverty.

CSBG funding provides a vehicle for state CSBG administrators and local leaders to create coordinated interventions to ensure economic opportunity for all Americans. Due to its flexible nature, CSBG funds allow for innovative programs that address the leading causes of poverty, such as lack of affordable housing, inadequate access to health care, and limited job opportunities. **CAAs, also referred to as CSBG eligible entities, are local, private, nonprofit, or public organizations which are governed by a tripartite board composed of representatives of the low-income neighborhoods being served, elected local officials, and key private partners.**

Each CAA coordinates and collaborates with their state CSBG administrators and a wide range of community partners to reduce the causes and consequences of poverty in the low-income communities they serve.

CAAs report on other sources and uses of other funding administered by the CSBG local network, program activities of the network, results of these activities, and number and demographics of participants served. This report summarizes key data from CAAs reported in the CSBG Annual Report. FY 2020 marks the third year of data collection through the CSBG Annual Report. This report was designed to complement Results Oriented Management and Accountability (ROMA) Next Generation and support and complete the CSBG Performance Management Framework—more information can be found on page 6 and in the Appendix.

The CSBG Annual Report builds upon Community Action's 56-year history of serving individuals, families, and communities across the United States. In the CSBG Annual Report, CAAs report on the CSBG National Performance Indicators (NPIs) which are used as a tool for setting priorities and monitoring progress toward the broader goal of ending poverty. Individuals and communities face poverty and economic insecurity in varying degrees, across the different domains, ranging from health and housing to employment and education. **The 9.5 million individuals served by CAAs represent nearly 26 percent of the 37.2 million Americans in poverty according to the most recent Census data.¹**

FIGURE 1: PEOPLE SERVED IN POVERTY

FIGURE 2: U.S. POPULATION IN POVERTY

According to the most recent U.S. Census American Community Survey data, 15.3 percent of the U.S. population had incomes below 125 percent of the poverty threshold and 5.5 percent had an income below 50 percent of the poverty threshold.² Out of the approximately 3.8 million families reporting their poverty status to CAAs, 67.4 percent were at or below the Federal Poverty Guidelines (FPL). More than 1.2 million families, 33 percent, were "severely poor," with incomes at or below 50 percent of the Federal Poverty Line. This indicates both the severity of need facing Americans served by the CSBG Network, and the importance of multiple services to move people towards self-sufficiency.

The NPIs track outcomes for comprehensive and co-ordinated services such as employment, education, housing, health, income and asset building, and civic engagement. It is the approach of CAAs to bundle services across the domains to help people achieve outcomes and their full potential. Research has shown that individuals who receive coordinated or "bundled" services are three to four times more likely to achieve a major economic outcome such as gaining and maintaining employment, earning a vocational certification or associate degree, or buying a car, than individuals receiving only one type of service.³

As poverty often affects multiple generations, the CSBG Network utilizes a whole family approach in combination with the aforementioned "bundled" services in order to fight and end poverty. The whole family approach recog-

nizes that the issues of each family member are interdependent, so the family should work together as a unit to set and achieve goals together. This approach centers on prevention rather than focusing on reacting to crises, and it provides families with the tools and resources needed to achieve lasting change and stability.

The CSBG Network continues to work in economically disadvantaged communities with limited resources to address existing needs, creating a demand for the services and strategies CAAs employ. The CSBG Network plays a critical role in bringing together resources to ensure economic security for people in poverty. This anti-poverty network of over 1,000 state-administered local agencies remains committed to ensuring economic security for vulnerable populations and creating employment opportunities that are accessible for all Americans.

CSBG helps Americans with low incomes obtain employment, achieve and increase their education, access vital early childhood programs, and maintain their independence. It further helps the communities it serves to transform by changing structures and conditions. **The coordinated services provided by the CSBG Network go beyond short-term interventions and strengthen long-term economic security for individuals, communities, and the nation.** The statistics outlined in this report demonstrate the strength and value of CSBG as the national anti-poverty network that coordinates local, state, and federal efforts to secure a promising future for our nation.

Introduction to the CSBG Network

The Community Services Block Grant (CSBG) is a model example of a successful federal-state-local partnership. CSBG is a block grant administered and managed by states, which distribute funds to a nationwide network of over 1,000 local CSBG eligible entities, also known as Community Action Agencies (CAAs), which include local private nonprofit and public organizations, migrant and seasonal farmworker organizations, or other organizations as designated by the states. CSBG's mission is to provide assistance to states and local communities, working through this network of CAAs, for the reduction of poverty, the revitalization of communities where people with low incomes live, and the empowerment of families and individuals with low incomes in rural and urban areas to become self-sufficient. In most states, CSBG can be found in the state Department of Health & Human Services, Department of Social Services, Department of Community & Economic Development, or the Department of Children & Families. The CSBG state office oversees a statewide network of Community Action Agencies that, along with community partners, have the capacity and local knowledge to effectively deliver innovative programs and achieve state policy goals. Community Action Agencies use CSBG funds to address a wide range of locally identified needs, which may include services and programs that address one or more of the core domains in which they work: employment, education and cognitive development, income, infrastructure and asset building, housing, health and social behavioral development, and civic engagement.

Designated CSBG eligible entities must meet the following statutory requirements:

- Be governed by a unique tripartite board, a three-part community board consisting of one-third elected public officials and at least one-third representatives of the low-income community, with the balance drawn from leaders in the private sector including businesses, faith-based groups, and civic organizations.
- Conduct periodic assessments of the needs of their communities and serve as a principal source of information about, and advocacy for, poverty-reduction actions.
- Maintain a performance-focused system for assessing and reporting the effectiveness of its anti-poverty strategy.
- Develop strategies for achieving the goals of increasing economic opportunity and security for their communities and low-income residents.
- Mobilize and coordinate resources and partnerships to achieve these goals.

CSBG eligible entities, which are primarily private CAAs and public entities, carry out their missions by creating, coordinating, and delivering a broad array of programs and services to their communities. In FY 2020, 1,015 CSBG eligible entities provided services to low-income families, individuals, and vulnerable communities in 99 percent of U.S. counties. Table 1 shows the number of CSBG-funded eligible entities, by type, in the nation. State-specific details can be found in the Appendix.

TABLE 1: LOCAL ORGANIZATIONS BY TYPE

CATEGORY OF ELIGIBLE ENTITY	NUMBER OF ELIGIBLE ENTITIES	NUMBER OF STATES*
Community Action Agencies	869	53
Limited Purpose Agencies	17	11
Migrant and/or Seasonal Farm Worker Organizations	11	8
Local Government Agencies	105	15
Tribes and Tribal Organizations	12	2
Other	1	1
TOTAL	1,015	

*Includes all 50 states, American Samoa, District of Columbia, and Puerto Rico. This is an unduplicated count of states in FY 2020.

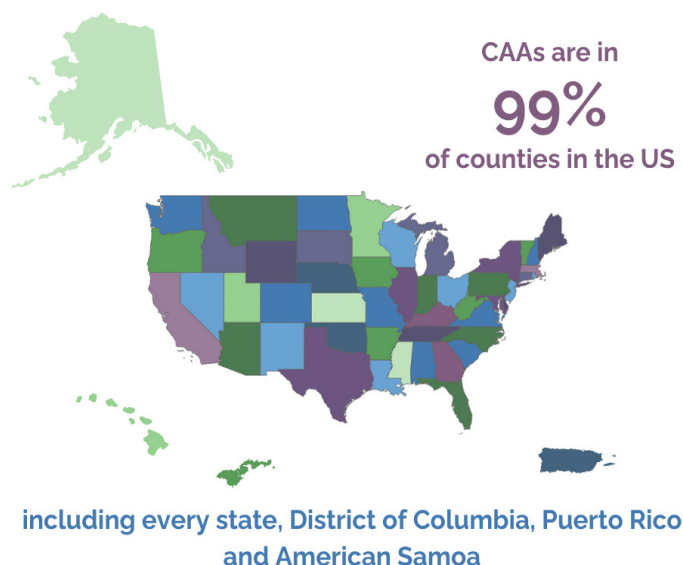

This collaborative relationship between state and local administrators allows organizations to tailor their anti-poverty efforts to address specific local conditions and capitalize on the unique resources in their states. States and CAAs work together to “stimulate a better focusing of all available local, state, private, and federal resources upon the goal of enabling low-income families, and low-income individuals of all ages, in rural and urban areas, to attain the skills, knowledge, and assistance to secure the opportunities needed for them to become self-sufficient.”⁴ Each CAA focuses their poverty reduction efforts on a specific geographic service area, under the oversight of their board and state CSBG administrator of the CSBG funding.

State CSBG administrators coordinate and develop linkages with other federal, state, and local programs to improve efficiency, access, and results for low-income individuals and communities. Administration at the state level also provides robust accountability and oversight of CSBG, and tracks metrics and performance indicators in domains such

as employment, education, housing, and health, which inform this CSBG National Performance Update Report.

CSBG represents a federal investment and a national commitment to reducing poverty in our nation. This commitment has created a local delivery infrastructure that responds to the national challenges that contribute to poverty in locally appropriate ways. CSBG’s results-driven approach allows states and CAAs to strategically target the root causes of poverty at the local level and measure progress toward the broader goal of ending poverty. CSBG gives local leaders the tools they need to address today’s economic concerns. Additionally, CSBG is a key resource

for many CAAs and often funds cross-cutting programs and supports agency level needs in order to continue necessary work. An important added benefit of receiving CSBG funding is that agencies across the nation share an institutional framework, overarching goals, and a common mission and vision.

Performance Management Framework

In addition to a structure that empowers states to partner with local communities, CSBG is bolstered by a Performance Management Framework to ensure accountability at all levels of the network. This federally established Performance Management Framework includes state and federal accountability measures, organizational standards for CAAs, and a Results Oriented Management and Accountability (ROMA) system:

- State and Federal Accountability Measures ensure that key components of CSBG administration operate efficiently, including timely distribution of funds, use of customer feedback for improvement, monitoring and oversight of eligible entities and states, data analysis and reporting, and creation of linkages and partnerships to assure the effective delivery of services.
- Organizational Standards ensure that CAAs are meeting requirements in implementing maximum feasible participation of the people and communities served in the operations of the agency, the vision and direction of the agency, and operations and accountability.
- Results Oriented Management and Accountability (ROMA) is a system that empowers CAAs and states to address identified needs through data analysis and evaluation and implement continuous improvement in program implementation.

Under the Performance Management Framework, the CSBG Network reports outcomes through the CSBG Annual Report. The CSBG Annual Report was designed to complement ROMA and actualize the overall CSBG Performance Management Framework. More information about the Performance Management Framework and the history of the CSBG Annual Report is available in the Appendix.

The CSBG Annual Report

The 2020 CSBG National Performance Update contains data from the FY 2020 CSBG Annual Report and builds upon Community Action's 56-year history of serving individuals, families, and communities across the United States. All 50 states, American Samoa, District of Columbia, and Puerto Rico provided information on funding level and allocations of CSBG funds, expenditures, other sources of funding administered by the CSBG local network, program activities of the network, outcomes of these activities, demographics, and participants served.

The CSBG Annual Report contains:

Module 1: State Administration (completed by state CSBG Administrators) contains information on state administration of CSBG funding, including information on distribution of funds to CSBG eligible entities, use of state administrative funds and discretionary funds for training and technical assistance, as well as information on CSBG Eligible Entity organizational standards progress and the state's progress meeting accountability measures related to state monitoring, training and technical assistance, and other critical areas. All states report in Module 1 based on the federal fiscal year.

Module 2: Agency Expenditures, Capacity, and Resources (completed by CSBG eligible entities; reviewed, evaluated, and analyzed by state CSBG state administrators) includes information on funds spent by CSBG eligible entities on the direct delivery of local services and strategies and capacity development, as well as information on funding devoted to administrative costs by the CSBG eligible entities.

Module 3: Community Level (completed by CSBG eligible entities; reviewed, evaluated, and analyzed by state CSBG state administrators) includes information on the implementation and results achieved for community-level strategies.

Module 4: Individual and Family Level (completed by CSBG eligible entities; reviewed, evaluated, and analyzed by CSBG state administrators) includes information on services provided to individuals and families, demographic characteristics of people served by CSBG eligible entities, and the results of these services.

State Uses of CSBG Funds

It is critical to understand the nature of the CSBG distribution of funding. The Congressional allocation includes funding for states, tribes, territories, and national level discretionary grants. Each state receives a yearly CSBG allocation, but by statute, has a two-year period over which to spend the allocation. Therefore, the total amount of CSBG funding that each state has access to on a yearly basis includes a yearly allocation, plus carryover from the prior year.

At the state level, per the statute, the state is required to allocate 90 percent of the yearly Congressional allocation to local agencies. Additionally, the state may keep 5 percent of the yearly Congressional allocation for state administrative expenses and 5 percent for discretionary funding at the state level, which may go to a CAA or to an organization that is not a CAA. Like states, each agency, therefore, has CSBG funding that may have been carried over from the prior year, the current state allocation, and any discretionary funding, as well as other federal, state, local, and private sources of funding, which also vary by year. As an added factor, each state has its own fiscal year, which may or may not align with the federal fiscal year. These factors combine to create a funding environment in which allocations and expenditures are unlikely to match precisely. State fiscal years, additional sources of federal, state, local, and private funding at the CAA level, and additional state-wide breakdowns of funding can be found in the Appendix.

In FY 2020, Congress appropriated \$740 million for regular CSBG. Of the regular CSBG amount, \$687.1 million was allocated to states (not including Puerto Rico and American Samoa), \$6.5 million was allocated to tribes, and \$34.9 million was allocated to U.S. territories. In FY 2020 Congress also appropriated an additional \$1 billion for CSBG under the Coronavirus Aid, Relief, and Economic Security (CARES) Act for expenditure between FY20 to FY22 and an additional \$25 million in the Additional Supplemental Appropriations for Disaster Relief Act, 2019 to eligible states, territories, and tribes affected by disasters in 2018 and 2019.

Grants to local eligible entities

State administrative costs

Discretionary projects

During FY 2020 states reported regular CSBG, CARES, and Disaster obligations totaling over \$901 million to eligible entities. The remainder was allocated for state administrative expenses and discretionary funding or carried over into the subsequent fiscal year.

There are three allowable uses for State CSBG funds: grants to local eligible entities, state administrative costs, and discretionary projects. During FY 2020, \$977.5 million was expended by states, including \$214.0 million carried over from FY 2019. States allocated over 92 percent of these funds to eligible entities, totaling approximately \$901.5 million. The remainder was allocated for state administrative expenses, discretionary funding, and supporting the infrastructure and operations related to administering CSBG funding. The block grant-funded state personnel coordinate multiple programs, manage systems to avoid duplication, and oversee and evaluate the continuity of services and activities provided by CAAs.

GRANTS TO LOCAL ELIGIBLE ENTITIES

The CSBG statute requires no less than 90 percent of the state block grant be allocated to local CSBG eligible entities. States allocated over \$901 million, or 92.2 percent, to the 1,015 CAAs, as shown in Table 2. These funds supported direct services to low-income individuals and communities as well as the management, infrastructure, and operations of the CAAs. **CSBG funds local personnel to**

TABLE 2: USES OF CSBG FUNDS

USE OF FUNDS	AMOUNT ALLOCATED*	NUMBER OF STATES***	PERCENTAGE OF FUNDING ALLOCATED
Grants to Local Eligible Entities	\$901,448,143	53	92.2%
State Administrative Costs	\$35,817,309	52	3.7%
Discretionary Projects	\$40,197,533	48	4.1%
TOTAL OBLIGATED IN FY 2020**	\$977,462,985	53	100%
Carried Forward to FY 2021	\$214,016,086	43	N/A

*Expended funding may differ from allocated funding based on carryover and differing fiscal years and contracts based on state variances.

** This includes funds carried over from FY 2019.

***Includes 50 states, American Samoa, District of Columbia, and Puerto Rico. This is an unduplicated count of states in FY 2020.

provide direct services to low-income individuals and communities, coordinate multiple programs, build local partnerships for reducing poverty, and manage systems to avoid duplication.

STATE ADMINISTRATIVE COSTS

No state may spend more than the greater of \$55,000, or five percent of the block grant for state administrative costs, including monitoring. This administrative allotment provides states with the resources necessary to maintain strong oversight of CSBG through fiscal reporting, data collection and analysis, and ongoing assessments of CAAs. It also helps states coordinate and establish linkages between and among governmental and other social services programs to assure the effective delivery of services to low-income people and avoid duplication of services. As Table 2 shows, states collectively used 3.7 percent for their administrative expenditures.

The block grant funded all or part of 613 state positions for a total of 252.1 full-time state employees (FTEs). Just as the local agencies administer many federal and state

programs in conjunction with CSBG, so do the state CSBG offices. Altogether, state CSBG offices administered an average of four programs per state, in addition to CSBG.

CSBG state administrators are housed in a variety of administrative locations, most often in a state's Social Services and/or Human Services Department or the state's Community Affairs, Community Services, or Community Economic Development Department. A few state CSBG offices are housed in departments related to health, labor, or housing and still others are in a state's executive office. State-specific details showing the administrative locations and responsibilities of CSBG state administrators are available in the Appendix.

DISCRETIONARY PROJECTS

The remaining funds may be used at the state's discretion for programs that help accomplish the statutory purposes of the block grant. Discretionary project funding by 48 states accounted for 4.1 percent of CSBG expenditures, or \$40.2 million.

These expenditures included:

FIGURE 3: DISCRETIONARY FUNDS BY PURPOSE

0.6%	■	Analysis of Distribution of CSBG Funds
3.0%	■	Asset-building Programs
6.4%	■	Coordination of State-Operated and/or Local Programs
7.4%	■	Statewide Coordination and Communications among CSBG Eligible Entities
19.1%	■	Training/Technical Assistance to CSBG Eligible Entities
21.0%	■	Innovative Programs
42.5%	■	Other Activities

- Training/technical assistance to CSBG eligible entities
- Coordination of State-operated programs and/or local programs
- Statewide coordination and communication among CSBG eligible entities
- Analysis of distribution of CSBG funds to determine if targeting greatest need
- Asset-building programs
- Innovative programs/activities by CSBG eligible entities or other neighborhood groups
- State charity tax credits
- Other activities

Information for state-level initiatives funded by discretionary grants can be found in the Appendix.

CAA Resources

NATIONWIDE RESOURCES

In FY 2020, CAAs were allocated financial resources totaling more than \$16.1 billion from federal, local, state and private sources of funding, including \$1.1 billion from CSBG. CSBG is a vital part of CAA funding as it allows them to fund staff, infrastructure, innovative programs, and activities not supported by other resources. Figure 4 shows all sources of federal funding that CAAs manage and the percent of total funding from each source.

While federal programs, predominantly those of HHS, provided 65% of non-CSBG funding allocations, private partners contributed over \$1.5 billion. Volunteers contributed an additional \$168 million in value, bringing all total resources to almost \$16.3 billion. Table 3 shows all allocated resource amounts, as well as the leveraging ratio as compared to CSBG. State-specific details, including federal, state, private, and local allocations, are available in the appendix.

FIGURE 4: FEDERAL SOURCES OF CAA ALLOCATIONS

TABLE 3: RESOURCES BY FUNDING SOURCE AS COMPARED TO CSBG

FUNDING SOURCE	ALLOCATION	LEVERAGING RATIO PER \$1 OF CSBG*
CSBG	\$1,121,079,442	\$1.00**
All Federal Programs (minus CSBG)	\$9,752,965,546	\$8.70
State Sources	\$1,893,446,519	\$1.69
Local Sources	\$1,777,329,471	\$1.58
Private Sources	\$1,579,610,832	\$1.41
Value of Volunteer hours	\$168,016,169	\$0.15
Total Non-Federal Sources***	\$5,418,402,991	\$4.83
TOTAL ALL RESOURCES	\$16,292,447,979	\$13.53

*Calculated by dividing the funding source allocation by the CSBG allocation.

**This amount not included in leveraging totals below.

*** Includes value of state, local, and private sources as well as volunteer hours.

A major function of staff funded by CSBG is developing resources to meet community needs. The high leveraging ratio reflects CAAs' progress towards this goal. CAAs develop partnerships to offer opportunities for private donors, businesses, and volunteers to donate their resources or time to improve the lives of families in their communities. They also generate federal, state, and local government support by obtaining contracts, grants, and partnership agreements. The total financial resources of a given year can reflect the organization's resource development work of the previous fiscal years. Altogether, the non-federal sources of funds matched local CSBG dollars by a ratio of \$4.68 to every dollar of CSBG. If the value of volunteer hours is included, the ratio of these resources to each CSBG dollar increases to \$4.83 for a total of \$13.53 dollars leveraged per dollar of CSBG.

TRENDS IN NETWORK RESOURCES

In FY 2020, the leveraging ratio of CSBG to non-federal funding (excluding the value of the volunteer hours) decreased significantly from previous fiscal years. The reason for this can be attributed to the fact that volunteer hours decreased due to Covid-19 and the 59.8% increase in CSBG funds received through the Coronavirus Aid, Relief, and Economic Security (CARES) Act. The significant increase in CSBG resulted in a decrease of the ratio between this source and the non-federal resources. Figure 5 shows the non-federal resources leveraged by CSBG funds for FY 2020.

CAA Uses of CSBG Funds

CAAs typically draw upon resources from many limited-purpose programs to support individual participants and families striving to increase their economic security. CAA programs either fill a gap in community supports or coordinate existing facilities and services.

CAAs also develop the investment partnerships or coalitions to mobilize initiatives that benefit entire communities, such as effective responses to predatory lending or initiatives preventing local business closure.

The block grant funding permits CAAs to coordinate national and state programs to meet local needs. Although most CAAs manage multiple programs that are classified by the group served (such as the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC); Crime Victims Assistance Program; or Emergency Services to the Homeless), CAA projects are classified by the conditions causing poverty that the CSBG statute identifies as major barriers to economic stability.

UNIQUE INITIATIVES

Some categories are easy to understand, such as employment, education, income management, health, and housing. Other domains, such as linkages, services supporting multiple domains, and agency capacity building have a broader scope and require further explanation.

Services supporting multiple domains capture the programs that span or support outcomes achieved across the multiple domains. Examples of services supporting multiple domains include services such as case management, transportation, and childcare.

Agency capacity building is the training, technical assistance, or other activity that helps a board member or staff person improve their skills, knowledge and understanding of CSBG or other entity programs with the explicit purpose of creating knowledge, understanding and capability of the CSBG Eligible Entity to achieve results. Examples of agency capacity building include activities such as staff development, strategic planning sessions, fiscal training, risk assessment, or board retreats.

FIGURE 5: NON-FEDERAL LEVERAGING PER CSBG DOLLAR (\$1.00)

LINKAGES

The term "linkages" describes funding for a unique local institutional role. It refers to the activities that bring together members of a community through mobilizing and coordinating members or groups, and often, government and commercial organizations which serve many communities. Linking a variety of local services, programs, and concerned citizens is an important strategy to combat community-wide causes and conditions of poverty. CAAs categorized 6.1 percent of their CSBG expenditures, more than \$45 million, as linkages expenditures.

Linkages also can be observable connections, such as medical transportation, integrated databases of community resources, communications systems, or support and facilities for new community-based initiatives. Linkage programs can involve a variety of local activities that CSBG-funded CAA staff support, including:

- Coordination among programs, facilities, and shared resources through information systems, communications systems, and shared procedures;

- Community needs assessments, followed by community planning, organization, and advocacy to meet these needs;
- Collective impact projects to create community changes, such as reducing crime or partnering with businesses in neighborhoods where people with low incomes live to plan long-term development;
- Efforts to establish links between resources, such as transportation and medical care, or programs that bring services to participants, such as mobile clinics or recreational programs, and management of Continuum of Care initiatives;
- The removal of barriers, such as addressing transportation challenges, that hinder low-income individuals' abilities to access their jobs or other necessary activities;
- Support for other groups of community residents with low incomes who are working for the same goals as the eligible entity.

FIGURE 6: CAA USES OF CSBG FUNDS

Figure 6 shows how CAAs expended CSBG funds among these categories. A project in any one category may help to further the multiple goals of CAAs, and many projects fall into more than one of these categories. To ensure unduplicated figures, funds are only reported under the primary category. The expenditures include agencies' CSBG funds and any discretionary funds, as well as any funds carried forward from the previous year and expended during the reporting period. States and CAAs vary in

their methods for recording expenditures. The largest categories of CSBG fund expenditures were housing (22.16 percent) and services supporting multiple domains (17.9 percent).

CAA Resources and Agency Capacity Building

The CSBG Network continually works to increase its capacity to provide high quality services to people and communities. At the local level, one way that CAAs increase their capacity is by investing in staff and board development. Module 2 of the CSBG Annual Report requires agencies to submit data on their agency capacity building efforts such as community engagement, staff credentials, and volunteer hours donated to the agency.

Capacity building is an important piece of an agency's ability to bring about meaningful change to their community's causes and conditions of poverty. This is exemplified by the over 3 million hours agency staff spent on capacity building in FY20. Capacity building activities include time spent on activities like assessing the needs of the community, strategically planning for the future, implementing more streamlined data systems, and training for staff to be more effective service providers.

TABLE 4: AGENCY CAPACITY	
The CSBG Network worked to expand agency capacity to achieve results:	
Training Participation	
3,121,543	Hours of Agency Staff in capacity building activities
221,121	Hours of Board Members in capacity building activities

The certifications listed below demonstrate the commitment of CAAs to provide quality services to individuals and families. CCAP and ROMA certifications are only two of several professional development opportunities available to the CSBG network workforce. These certifications indicate the ability and capacity of agency staff to implement the highest level of performance management and measurement within their agencies.

TABLE 5: AGENCY CAPACITY

The CSBG Network worked to expand agency capacity to achieve results:

Credentialed Staff in Local CAAs

611	Certified Community Action Professionals (CCAP)
401	Nationally Certified ROMA Trainers
579	Nationally Certified ROMA Implementers
5,531	Family development certified staff
20,739	Child development certified staff
171	Pathways Reviewers
2,222	Home Energy Professional certified staff
1,178	Energy Auditors
917	Retrofit Installer technicians
601	Crew Leaders
860	Quality Control Inspectors (QCI)
1,016	Building Performance Institute (BPI) certified staff
2,612	Classroom Assessment Scoring System (CLASS) certified staff
630	Certified Housing Quality Standards (HQS) Inspectors
20	American Institute of Certified Planners (AICP)

Many people with low incomes empowered by the CSBG Network are invested not only in their own success, but also that of their community and their peers. To capture the impact and dedication of low-income program participants, the CSBG Annual Report gathers information on volunteer time donated to agencies.

TABLE 6: COMMUNITY ENHANCEMENT THROUGH MAXIMUM FEASIBLE PARTICIPATION

The CSBG Network mobilized low-income individuals to work together for community improvement:

23,174,644	Volunteer hours donated to CAAs.
14,682,022	Volunteer hours donated by low-income individual

Additionally, CAAs partner with many organizations, businesses, and government agencies to carry out the work of CSBG. In total, CAAs worked with 194,895 organizations in FY 2020. Figure 7 shows the trend in partnerships from FY 2018 through FY 2020.

TABLE 7: EXPANDING OPPORTUNITIES THROUGH COMMUNITY-WIDE PARTNERSHIPS

194,895	Organizations worked with the CSBG Network to promote family and community outcomes.		
These organizations included:			
46,669	Nonprofits	10,245	Consortiums/Collaborations
19,458	Faith-Based Organizations	10,416	School Districts
16,939	Local Governments Agencies	5,816	Institutions of Postsecondary Education/Training
7,782	State Governments Agencies	5,211	Financial/Banking Institutions
4,100	Federal Government Agencies	15,025	Health Service Institutions
48,334	For-Profit Business or Corporations	4,900	Statewide Associations or Collaborations

FIGURE 7: PARTNERSHIPS AMONG CAAs, FY 2018-2020

Participants of CAA Programs

In FY 2020, CAAs in every state reported information about the participants in their programs and projects to the state CSBG office. Over 9.5 million individuals and members of 4.8 million families participated in CAA programs. The CSBG Annual Report captured various demographic data for 92 percent of individuals and 84 percent of the families served.⁷

The CSBG Network serves a diverse population with low incomes who live in varied communities. However, the majority of CAA program participants were white, had incomes below the Federal Poverty Guidelines (FPG), and were members of families that relied on either a worker's wages or retirement income. State-specific data on participant characteristics are available in the Appendix.

Individuals and families aided by CAAs face poverty and economic insecurity in varying degrees. However, data

show that CAAs serve some of the poorest and most vulnerable populations in the U.S. The 9.5 million individuals served by CAAs represent nearly 26 percent of the 37.2 million Americans who, according to the most recent census data, live in poverty.⁸ According to the most recent U.S. Census American Community Survey data, 15.3 percent of the U.S. population had incomes below 125 percent of the poverty threshold and 5.5 percent had an income below 50 percent of the poverty threshold.⁹ Out of the approximately 3.8 million families reporting their poverty status to CAAs, over 67 percent were at or below the FPG for a family of four. More than 1.2 million families, 33 percent, were "severely poor," with incomes at or below 50 percent of the FPG, or below \$13,100 for a family of four.¹⁰ This data indicates that CAAs are successful in targeting and serving populations most in need of their services and programs. Figure 8 shows the proportion of families with incomes at or below percentages of the FPG.

FIGURE 8: POVERTY STATUS OF FY 2020 ELIGIBLE ENTITIES PROGRAM PARTICIPANT FAMILIES ^{7,8}

INCOME SOURCES

Families report all sources of household income, not just the primary source. In addition, approximately 336,000 families who reported their income to CAAs reported zero income. The data underscores the difficulty that families with low incomes face in making ends meet and emphasizes the fact that most families with low incomes have a source of income, but it is not enough to move them out of poverty. The following statistics outline key income trends of families in the CSBG Network who reported one or more sources of income.

- Over 39 percent of participant families who reported one or more sources of income indicated that some or all their income came from employment.
- 556,168 low-wage participant families relied solely on their wages for income.

- Eligible entities served 767,497 families living on retirement income from Social Security and 127,672 families living on pensions.
- Temporary Assistance for Needy Families (TANF) provided income to only 5 percent of the families served by eligible entities.

According to recent Bureau of Labor Statistics analysis, the poverty rate for working households in 2020 was 4.1 percent.¹¹ This statistic indicates that many low-income working families are not making ends meet, so the support of CAA services can help them maintain employment and achieve a better, living wage job.

FIGURE 9: SOURCES OF INCOME FOR CAA PROGRAM PARTICIPANT FAMILIES

FAMILY STRUCTURE OF PARTICIPANTS

CAAs served nearly 1.4 million two-person and three-person families and over 210,000 families with 6 or more members.

Of the participants reporting family type, almost 40 percent of families indicated they had children in their family. Approximately 65% of all CAA program participants' households reporting children were single parent families. Research shows that families headed by a single parent are more likely to be living at or below the poverty line.²

Of the families with children,

- 59 percent were headed by a single mother.
- 34 percent had both parents present.
- 6 percent were headed by a single father.
- Less than 2 percent were non-related adults with children.

45 percent of all families were people who lived alone, and 9 percent reported two adults living alone with no children.

RACE AND ETHNICITY OF PARTICIPANTS

CAA program participants are ethnically diverse, reflecting the diversity of the communities CAAs serve across the country. Of the 9.5 million individuals served, over 8 million reported their race or ethnicity data to CAAs. Ethnicity data indicated that 20.2 percent self-identified themselves as Hispanic or Latino.¹³

FIGURE 10: FAMILY STRUCTURE OF PARTICIPANTS

Research from the U.S. Census Bureau shows that Black and Hispanic people in the U.S. are over-represented in poverty while White and Asian people are under-represented in the poverty population.¹⁴ Black people represent 13.2% of the total population but make up 23.8% of people in poverty. Hispanic people make up 18.7% of the total population but make up 28.1% of the population in poverty. In FY 2020, 20% or more of participants in 18 states self-iden-

FIGURE 11: POVERTY DISTRIBUTION BY RACE AND ETHNICITY

tified as Hispanic or Latino. Of these, 4 states had over 50% of CAA participants self-identified as Hispanic or Latino. The following racial breakdown reflect CAA participants' voluntarily-provided responses:

- 54.5 percent White
- 28.2 percent African-American
- 8.4 percent reported Other

- 3.8 percent Multi-Racial
- 3.0 percent Asian
- 1.7 percent American Indian or Alaska Native
- 0.5 percent Native Hawaiian and Other Pacific Islander

FIGURE 12: RACE OF CAA PROGRAM PARTICIPANTS

CHILDREN AND SENIORS IN CAA PROGRAMS

The participants in CAA programs included nearly 3.2 million children under the age of 17. The Census Bureau reports that the poverty rate for children under 18 is 16.1 percent.¹⁵ Reflecting this fact, children aged 17 and under made up more than 36 percent of all individuals served. Additionally, approximately 1.1 million, or 12 percent of all CAA program participants, were 5 years of age or younger, as Figure 13 shows. Child poverty is an urgent need across the nation and CAAs are working to alleviate the effects of poverty on this vulnerable population.

Nearly 2.2 million people, or over 25 percent of CAA program participants reporting age, were 55 years or older, and almost 6 percent of the participants in that age group were 75 years or older. CAAs helped these older participants maintain their independence and remain engaged in their communities.

FIGURE 13: AGE GROUPS OF CAA PROGRAM PARTICIPANTS

BARRIERS TO ECONOMIC SECURITY

Many CAA program participants face multiple barriers to achieving economic security, such as lack of health insurance or education, living with a disability, and homelessness. Health insurance data offered by over 6.2 million participants indicated that 14.8 percent were without medical insurance. Research shows that lack of health insurance is a strong predictor of future critical hardships for families at all income levels, but is particularly strong for those with incomes below 200 percent of the Federal Poverty Guidelines.¹⁶ For this reason, the work that CAAs do in health services is especially significant in ending a cycle of poverty that impacts families now and for generations to come.

Research also shows that young adults with a bachelor's degree earn 57 percent more than high school graduates and 97 percent more than those who do not have high school diplomas.¹⁷ More than 27 percent of adults over age 24 who reported their educational attainment to CAAs lacked a high school diploma or equivalency certificate, and 48 percent of CAA program participants reported a High school diploma or a GED as their highest educational attainment as shown in Figure 14. CAAs' efforts to improve

educational levels for program participants is a key investment.

Data collected from over 7.2 million participants indicated that 21.4 percent of the CAA program participants had a disability. Research shows that among working-age adults with disabilities, only 17.9 percent were employed.¹⁸ CAAs are critical in assisting people with disabilities to find employment, improve their quality of life, and maintain an independent living situation.

Housing data offered by over 3.5 million participants indicated that 117,810 were homeless. Nationally, approximately 580,466 people were homeless in 2020, more than a 13,000 increase from 2019.¹⁹ This shows that CAAs served around 20 percent of the homeless population in the U.S. Homelessness contributes to social and economic challenges. For example, research shows a cyclical relationship between health and homelessness.²⁰ Homelessness leads to poor health, and poor health can lead to homelessness. CAAs provide critical services to help alleviate homelessness and its effects through housing, health services, and other supportive programs.

FIGURE 14: EDUCATION ATTAINMENT OF CAA PROGRAM PARTICIPANTS, AGE 25+

Results of the Community Service Block Grant

The outcomes documented below demonstrate the CSBG Network's widespread impact on the nation's most vulnerable individuals, families, and communities across the seven domains. This report is based on outcomes which support the CSBG Annual Report NPIs, reported by states and CAAs for FY 2020. Not all agencies participated in the activities which generated outcomes for every domain or each CSBG National Performance Indicator (NPI), nor do these indicators represent all of the outcomes achieved by agencies. To tell a more complete story, narratives about CSBG Annual Report NPI outcome achievements and successes are included along with the national data.

These narratives represent a cross-section of the impact that CAAs make every day in local communities through innovative strategies with the necessary support of CSBG funding. CAAs were able to leverage their CSBG dollars more effectively, expanding and maintaining highly successful program outcomes.

While some participants may have received a single service in only one key area to improve their self-sufficiency, many others received multiple, bundled services. For example, a person coming to a CAA may receive support finding a job, obtain support while pursuing and securing additional education, access stable transportation, and enroll children in quality childcare.

EMPLOYMENT

The CSBG Network assisted individuals with finding and maintaining employment and increasing wages or benefits. CAAs supported these outcomes by partnering with local businesses to provide job training and certifications and by subsidizing positions that would have been eliminated without CSBG Network involvement.

Additionally, CAAs work to reduce or remove challenges facing job seekers. In addition to direct job-seeking and training assistance, CAAs provided many services that removed barriers to employment, such as education attainment, safe and reliable housing, and transportation.

In FY 2020, states reported spending approximately \$70.5 million in CSBG funds to support a range of services and strategies designed to assist low-income individuals and communities in obtaining and maintaining employment.

These services and strategies include:

- Creation of jobs (including those that offer a living wage) in the community.
- Support for job retention, including counseling, training, and supportive services, such as transportation, child care, and the purchase of uniforms or work clothing.
- Skills training, job application assistance, resume writing, and job placement.
- On-the-job training and opportunities for work.
- Job development, including finding employers willing to recruit through the agency, facilitating interviews, providing counseling to employees through workshops and coaching, and developing new employment supplies.
- Vocational training for high school students and the creation of internships and summer work placements.
- Job search assistance, including coaching, resume development, interview skills training, job referrals, job placement, pre-employment physicals, background checks, etc.
- Providing employment supplies.
- Other specialized adult employment training.

The following employment outcomes were achieved for people served by the CSBG Network and were supported by 902,586 services in the employment domain:

FIGURE 15: EMPLOYMENT OUTCOMES

FIGURE 16: EMPLOYMENT OUTCOMES (Continued)

Success Story - Employment

Upper East Tennessee Human Development Agency
Tennessee

Unicoi Neighborhood Service Center

Upper East Tennessee Human Development Agency's Unicoi Neighborhood Service Center (NSC) is a one-stop shop that helps Unicoi County residents access needed services, from employment to education to income management, just to name a few. Knowing of the agency's services, a local homeless shelter contacted NSC staff with a referral for Troy Odom. He had been in the shelter since June 2nd after being evicted from his home due to having lost his job and unable to pay his rent. While in the shelter he had found a new job and located but needed assistance with his electric deposit. When Mr. Odom came to the office, he was surprised to learn that not only he was eligible for our rent assistance program too, but he was also eligible for money from friends and family to help him purchase a vehicle through our employment program and Mr. Odom gratefully accepted. Troy is very thankful for all the assistance he has received through us and is excited to be getting his life together. He is in the second month of our rent program, enrolled in a financial education course, and we were able to help purchase a car for him to get to work without walking to relying on others for rides. He has gone from living in a shelter to being on the road to self-sufficiency in just a month.

EDUCATION

Both children and adults benefit from the educational opportunities provided by the CSBG Network. CAAs make education more accessible to individuals with low incomes through ABE or GED courses, college scholarships, skills training, and a multitude of options and support services based on local need.

In FY 2020, states reported spending over \$65 million in CSBG funds to support educational and cognitive outcomes. Strategies and supports included:

- Adding education programs to the community that were not there before.
- Creating childhood learning opportunities (such as preparing kids to enter kindergarten) in distressed neighborhoods.
- Providing Adult education, including courses in English as a Second Language (ESL) and General Educational Development (GED) preparation with flexible scheduling for working students.

- Supplemental support to improve the educational quality of Head Start programs.
- Child care classes, providing both child development instruction and support for working parents or home child care providers.
- Before and after school activities.
- Scholarships for college or technical school.
- College applications, textbooks, computers, and other need supplies.
- Guidance about adult education opportunities in the community.
- Programs to enhance academic achievement of students in grades K-12, while combating drug or alcohol use and preventing violence.
- Computer-based courses to help train participants for the modern-day workforce.

The following education and cognitive development outcomes were achieved for people served by the CSBG Network and were supported by 1,690,885 services in the education domain:

FIGURE 17: EDUCATION AND COGNITIVE DEVELOPMENT OUTCOMES

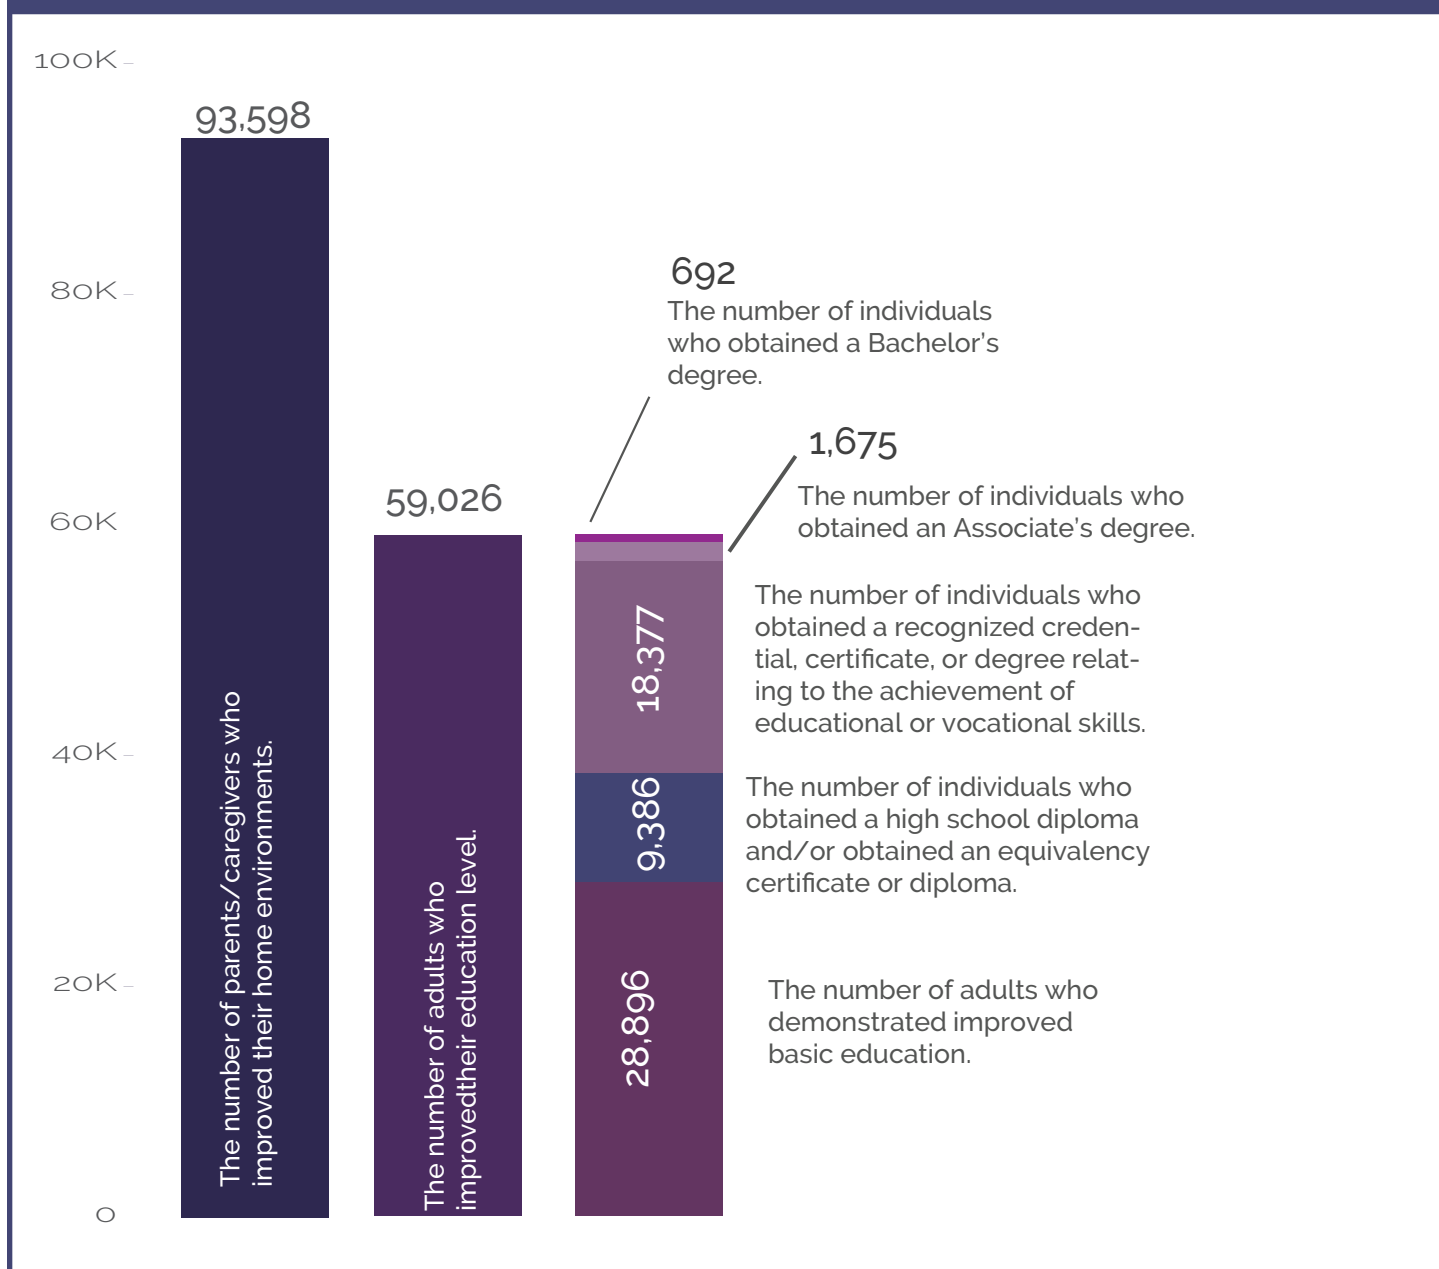

FIGURE 18: CHILDHOOD EDUCATION AND COGNITIVE DEVELOPMENT OUTCOMES

Success Story - Education

York County Community Action Corporation
Maine

Bridge Fund

Research demonstrates that individuals with a college degree tend to receive higher wages than those without one. However, the cost of obtaining a degree is expensive, which can be a significant hurdle for individuals with lower incomes. Recognizing a need in its community, York County Community Action Corporation partnered with York County Community College to offer both coaching support and financial support through its Bridge Fund program. Both are important strategies to help York County Community College students remain successful in college. In FY2020, the agency served over 50 college students by providing transportation to students who would otherwise not have been able to get to classes, helped with the purchase items, such as laptops and books, to support course work, and provided family-centered coaching. By combining direct assistance with coaching, York County Community Action is helping college students with long-term success.

INCOME AND ASSET BUILDING

In FY 2020, states reported spending approximately \$31 million in CSBG funds on income management, infrastructure, and asset-building initiatives and services. Services supported include:

- Additions of needed VITA sites to communities.
- Added banking opportunities.
- Development of household assets, including savings.
- Assistance with budgeting techniques.
- Consumer credit counseling.
- Business development support.
- Homeownership assistance.
- Energy conservation and energy consumer education programs, including weatherization.
- Tax counseling and tax preparation assistance.
- Assistance for the elderly with claims for medical and other benefits.
- Direct cash assistance to offset loss of employment as a result of COVID-19

The following income and asset building outcomes were achieved for people served by the CSBG Network and were supported by 703,467 services in the income domain:

HOUSING

The CSBG Network helped 178,371 households obtain safe and affordable housing. Homes of individuals with low incomes were made more energy-efficient to decrease utility payments and had positive impacts on the health of residents and the environment. There were 1,098,674 households that experienced improved energy efficiency and reduced energy burden through the Weatherization Assistance Program (WAP) and the Low Income Home Energy Assistance Program (LIHEAP).

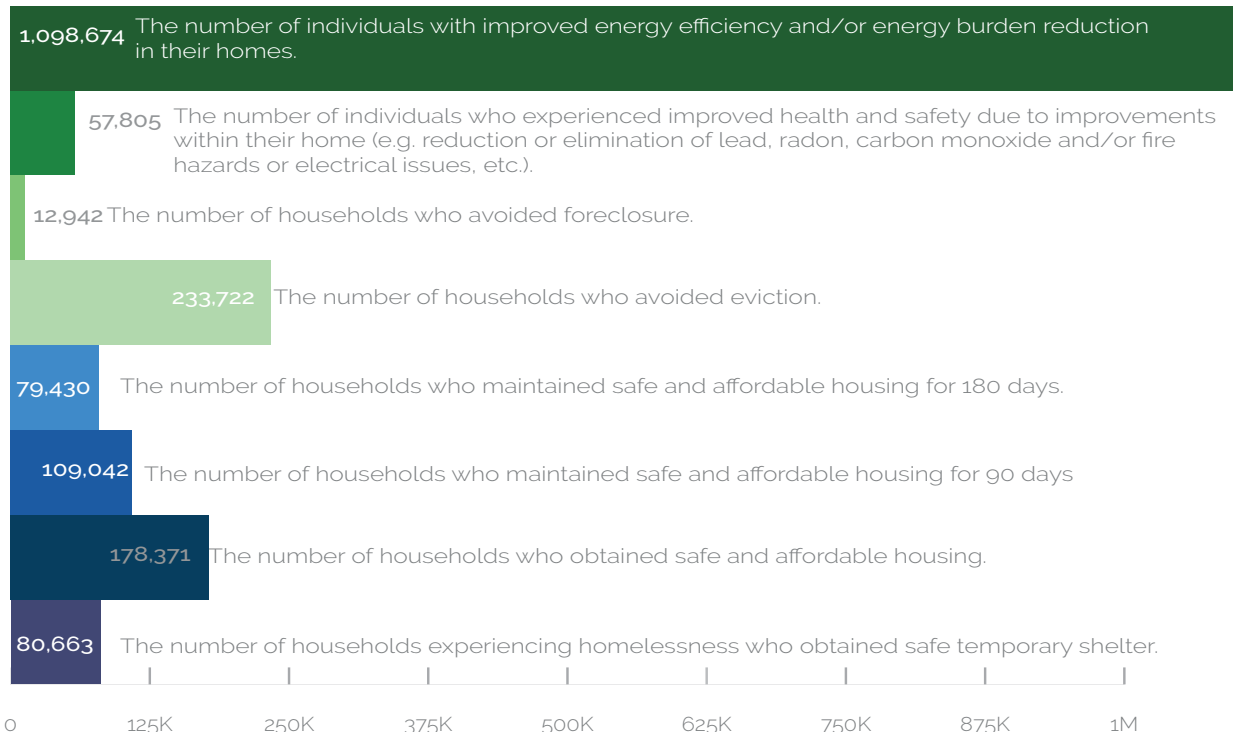

In FY 2020, states reported spending over \$163 million in CSBG funds for CSBG-coordinated housing programs to improve the living environment of low-income individuals and families. Services supported include:

- Building apartments and home for people with low incomes.

- Rehabilitating dilapidated housing stock.
- Making homes where people with low incomes live more energy efficient.
- Homeownership counseling and loan assistance.
- Affordable housing development and construction.
- Counseling and advocacy about landlord/tenant relations and fair housing concerns.
- Assistance in locating affordable housing and applying for rent subsidies and other housing assistance.
- Temporary and emergency housing options.
- Transitional shelters and services for the homeless.
- Permanent housing placements.
- Utility assistance.
- Landlord/tenant rights education.
- Home repair and rehabilitation services.

The following housing outcomes were achieved for people served by the CSBG Network and were supported by 5,129,672 services in the housing domain:

FIGURE 20: HOUSING OUTCOMES

Success Story - Housing

Community and Economic Development Association
Illinois

Chicago Utility Billing Relief Program

"CEDA is leveraging more than 50 years of experience in operations, education and engagement in its partnership with the City and through its work to ensure high-quality services are continuously delivered to residents. We are committed to working with the City to reduce poverty, revitalize low-income communities and empower residents now more than ever before especially during the unprecedented times that we currently face." Harold Rice, CEO of CEDA.

Recognizing that Chicago's most vulnerable residents face daily struggles to make ends meet on their limited incomes and that amount of debt tied to water utility building has increased nearly 300% since 2011, most of which is concentrated in the City's lower-income communities, Community and Economic Development Association (CEDA) partnered with Mayor Lori Lightfoot and the City of Chicago to launch the Chicago Utility Billing Relief (UBR) Program. Building on Mayor Lightfoot's commitment to dismantling the City's historically regressive fines and fees structure, the UBR Program will help Chicago's most vulnerable residents come into compliance on City utility bill payments. The program is designed to reduce the cost of water and sewer portions of City utility bills, making them more affordable and preventing residents from having to make difficult choices between paying for utilities and other critical goods and services. Additionally, for residents that demonstrate an ability to manage the reduced rate bills for one year, the program will also include a debt relief component. As an organization with a proven track record helping Chicago's vulnerable residences with other anti-poverty services, including the federal Low Income Home Energy Assistance Program (LIHEAP), CEDA was a natural fit to help the City of Chicago with its new program.

HEALTH AND SOCIAL/BEHAVIORAL DEVELOPMENT

CAAs also help children and adults improve and maintain their health in several ways. There were 1,055,013 people who demonstrated improved physical health and well-being in FY 2020. Additionally, 524,095 individuals demonstrated increased nutrition skills like cooking and grocery shopping.

In FY 2020, states reported spending approximately \$104 million in CSBG funds on health initiatives that are designed to identify and combat a variety of health problems in the community served. CSBG funds may be used to address gaps in the care and coverage available in the community. Services supported include:

- Development of new Health Clinics.
- Recruitment of uninsured children to a state insurance group, State Children's Health Insurance Program (SCHIP), or Medicaid.
- Prenatal care, maternal health, and infant health screenings.
- Immunization.
- Periodic screening for serious health problems, including HIV infection, and mental health disorders.
- Treatment for substance abuse.
- Other health services, including dental care, mental health, health insurance advocacy, CPR training, and education about wellness, obesity, and first aid.
- Transportation to health care facilities and medical appointments.
- Opening and operating food banks.
- Assisting food banks of faith-based and civic organization partners with food supplies and/or management support.
- Counseling regarding family and children's nutrition and food preparation.
- Administering the Women, Infants, and Children (WIC) nutrition program.
- Preparing and delivering food and meals
- Initiating self-help projects, such as community gardens, community canneries, and food buying groups.
- Distribution of personal protective equipment.

The following health and social/behavioral outcomes were achieved for people served by the CSBG Network and were supported by 53,671,005 services in the health domain:

Success Story - Health

INCA Community Services, Inc.
Oklahoma

JAMM Transit's Meal Delivery Service

When Covid-19 became a reality in March 2020, closures and shelter in place became the norm. And for many vulnerable individuals, they were faced with significant challenges of obtaining food. Recognizing that its community had an unmet need and that it had a resource that could assist, INCA Community Services (INCA) repurposed its JAMM Transit program to bring meals to children and seniors in its community. As a result, more than 8,500 meals have been delivered, which has helped its vulnerable populations stay safe, healthy, and fed while promoting "safer at home" practices.

CIVIC ENGAGEMENT AND COMMUNITY INVOLVEMENT

In FY 2020, states reported spending almost \$19 million in CSBG funds on civic engagement and community involvement initiatives. Services and strategies supported include:

- Increasing resources to support the CSBG Eligible Entity's efforts to address conditions of poverty.
- Increasing people with low incomes who support

the CSBG Eligible Entity's approaches to addressing poverty and obtain leadership roles within the entity or another organization

- Leadership Training.
- Tri-partite Board Membership.
- Citizenship Classes.
- Getting Ahead Classes.
- Volunteer Training.

The following civic engagement and community involvement outcomes were achieved for people served by the CSBG Network and were supported by 191,207 services in the civic engagement domain:

FIGURE 22: CIVIC ENGAGEMENT OUTCOMES

Success story – Civic Engagement and Community Involvement

Southeastern Utah Association of Local Governments (SEUALG) Utah

Getting Ahead While Getting Out

SEUALG started the Getting Ahead While Getting Out program during the middle of the pandemic. Carbon County has one of the highest rates of opioid addiction and recidivism rates in the state. Many incarcerated individuals return to the criminal justice system upon release because they have burned bridges with family members. Getting Ahead While Getting Out not only reduces recidivism, it provides the needed tools, resources, support, and guidance to help individuals set goals, create a community plan and it follows through with long term support – starting before they exit incarceration.

Southeastern Utah Association of Local Governments understood that to reduce recidivism in our community, we needed to create a strong partnership with the Carbon County Sheriff and become certified in Getting Ahead While Getting Out to provide these needed services. Southeastern Utah Association of Local Governments is starting the third Getting Ahead While Getting Out cohort. There have been 24 participants and nine graduates from Getting Ahead While Getting Out. The success of Getting Ahead While Getting Out isn't only measured in the number of graduates. It's in each success story or step that an individual makes to improve their lives.

KEARA'S STORY

Keara started the Getting Ahead While Getting Out Program in November 2021. Keara had been incarcerated for several months due to opioids and ended up losing everything she had. Keara's daughter was placed in kinship placement, and she had lost all hope. Shortly after starting this program, there was a light that turned on as this was the first time that Keara felt positively connected to others, the first time that someone offered classes, completed her homework, her assessment of the community, rise above her past and focus on her Ahead While Getting Out in March encouraged to continue her education High School Diploma. Keara now has attending classes at Utah State Uni-

jobs, going to school, and continues frequently. Keara is also an Ally for other individuals that are working to overcome obstacles and is dedicated to giving back to her community. Keara has stated many times that she would not have achieved these goals if not for the support from SEUALG staff, Getting Ahead While Getting Out program, and the additional support she received upon release. Keara has a bright future ahead of her and we will continue to follow her and cheer her on the entire way.

OUTCOMES ACROSS MULTIPLE DOMAINS

Because CSBG eligible entities are providing a range of services to individuals and families to move them to stability or economic security, rather than just a single service to meet a short-term need, CAAs offer multiple services in the hopes that people obtain multiple outcomes. Most individuals and families must achieve outcomes in multiple domains to actually move to stability. For instance, achieving improved housing and also obtaining a job; or improving education or skills and also obtaining a job. As such, this NPI was developed to demonstrate an unduplicated count of all the people who obtained an outcome

due to being involved with an eligible entity. In many instances people obtained more than one outcome and are represented under multiple NPIS but are reported here only once.

2,486,637 - The number of individuals who achieved one or more outcomes as identified by the National Performance Indicators in various domains.

Conclusion

The Community Services Block Grant (CSBG) is for a critical source of funding to assist state administrators and local leaders create planned and coordinated interventions to ensure economic opportunity for all Americans. The effort of the CSBG Network helps move low-income families toward self-sufficiency and rebuilds thriving communities through a coordinated approach at the federal, state, and local levels and provides a range of services and opportunities for individuals and families with low incomes.

CSBG funds programs that address the leading causes of poverty, such as a lack of affordable housing, inadequate access to health care, and limited job opportunities. CSBG helps Americans with low incomes obtain employment, increase their education, access early childhood programs, and maintain their independence.

Current data, which is collected annually from the 50 states, American Samoa, the District of Columbia, and Puerto Rico, measures the impact of states in eliminating barriers to family self-sufficiency and community revitalization. Across family- and community-level domains ranging from health and housing to employment and education, eligible entities helped almost 1.95 million people create change in their lives with the goal of ultimately increasing their economic security and making the communities where they live a better place.

The NPIs track outcomes from support services as well as outcomes from more comprehensive and coordinated services, such as employment initiatives, early childhood programs, continuing education programs, skills training programs, and matched savings for enrollment in higher education. While support services are necessary to alleviating the conditions of poverty, eligible entities are focusing on bundling services, applying intergenerational approaches to alleviating poverty, and providing services to both job seekers and those who are unable to work, such as children and youth, those living with disabilities, and vulnerable seniors. The CSBG Network responded to the national child poverty levels and the increased aging population and provided services to over 3.1 million children under the age of 17 and over 2.1 million seniors over

the age of 55 in fiscal year 2020.²¹ The services provided to those who are unable to work addresses the high child poverty and the aging population across the United States and addresses the rising needs for support targeted at youth, seniors, and those living with disabilities.

Aside from direct employment, education is another major factor in becoming economically secure. During FY 2020, more than 1,600 people obtained an associate degree and almost 700 people obtained a bachelor's degree as a result of CSBG Network assistance. Over 9,300 people acquired a high school diploma or equivalency certificate, while more than 900,00 services were provided to people in the employment domain.

CSBG works to reduce dependence on other federal safety net services and increase the number of people contributing to the economy by focusing on the most vulnerable populations. Therefore, eligible entities across the nation are placing increased emphasis on providing coordinated services and long-term stability and self-sufficiency of individuals, families, and communities, as well as essential emergency services.

The coordinated services provided by CSBG go beyond short-term interventions and strengthen long-term economic security for individuals, communities, and the nation. Based on annual reports from eligible entities, every dollar invested in CSBG leveraged \$13.53 of other federal, state, local, and private funds, and CSBG's flexibility allows eligible entities to fund innovative programs and activities not supported by other resources.

Appendix

HISTORY OF CSBG DATA COLLECTION AND REPORTING

NASCSP and the National Governors Association conducted the first comprehensive survey of state and local uses of federal CSBG funds in a 1983 cooperative venture with outside assistance from the Center for Community Futures. This led to the development of the National Voluntary Reporting System. The Center for Community Futures conducted the surveys of FFY 1984, 1985, and 1986 with guidance from NASCSP's Data Collection Committee. NASCSP has solely conducted the surveys since FFY 1987. In FFY 2005, reporting on the CSBG IS Survey became a federal requirement. The CSBG IS Survey was amended to focus on information of interest to state and federal policymakers, such as the relationship of CSBG to other funding sources and the development of innovative programs.

INFORMATION SYSTEMS SURVEY

A group of stakeholders (State CSBG offices, CAAs, State CAA Associations, and national partners) who felt it important to design a mechanism to collect statistical data to tell the story of the CSBG Network created the Information Systems Task Force (ISTF) in 1983. When NASCSP secured the data collection grant to administer the IS Survey in 1987, it was given the responsibility to staff the ISTF.

The ISTF was an independent committee responsible for designing the data collection tool in a manner that met the political and management needs of the CSBG Network.

The independence of the task force was important for a number of reasons. The first is that it allowed for the collection of non-statutory data that helped the CSBG Network communicate how they changed lives and communities. In addition, the ISTF also played a significant role in maintaining data credibility. The ISTF was comprised of one representative from each of the 10 HHS regions, with five representatives from CAAs or State CAA Associations, and five representatives from State CSBG offices, as well as national partners (the National Community Action Foundation, the Community Action Partnership, OCS, and the Association of Nationally Certified ROMA Trainers (then known as National Peer-to-Peer Results Oriented Management and Accountability Network)).

THE CSBG DATA ANALYSIS TECHNICAL ASSISTANCE TASK FORCE

With the advent of the new CSBG Annual Report, a task force was created to inform OCS on the Annual Report implementation process. The CSBG DATA Task Force (DATA TF) is an extension of the ISTF, the DATA TF serves as a consultative body focused on the transition from the CSBG IS Survey to the CSBG Annual Report, as well as ongoing assistance in the implementation of the CSBG Annual Report. The DATA TF is convened by NASCSP to assist the OCS and NASCSP in understanding and addressing the CSBG Network's data needs and the use of data for analysis and continual improvement of results. The task force consists of representatives from Community Action Agencies, State CSBG Offices, Community Action Agency State Associations, National Partner organizations, and OCS.

The DATA Task Force provides feedback to OCS and NASCSP on the implementation of the CSBG Annual Report, with a focus on how to use CSBG data in all phases of the Results Oriented Management and Accountability (ROMA) cycle. Members of the DATA Task Force collaborate to make recommendations for improvements to the use of data and provide valuable input regarding data collection, data reporting, and affecting change with data.

NATIONAL ASSOCIATION FOR STATE COMMUNITY SERVICES PROGRAMS (NASCSP)

As the membership association for state administrators of both the U.S. Department of Health and Human Service's (HHS) CSBG and the U.S. Department of Energy's (DOE) Weatherization Assistance Program (WAP), NASCSP coordinates semi-annual training conferences for state and local CSBG and WAP staff. NASCSP is the sole provider of orientation and monitor training for new state CSBG and WAP administrators and staff, as well as the only collector of national data to reflect the work of the CSBG Network. NASCSP also provides training and technical assistance to state CSBG Offices and local CAAs upon request in such areas as the basics of CSBG, CAA roles and responsibilities, state roles and responsibilities, as well as various trainings on data collection, reporting, and performance management and measurement. NASCSP also informs the CSBG Network of best practices, innovative program resources, and anti-poverty.

RESULTS ORIENTED MANAGEMENT AND ACCOUNTABILITY (ROMA)

The Monitoring and Assessment Task Force (MATF), a task force of federal, state and local CSBG Network officials, created the framework for the performance management system known as Results Oriented Management and Accountability (ROMA) in 1994. Based upon principles contained in the Government Performance and Results Act of 1993, ROMA provides a process for supporting continuous growth and improvement among local CAAs and a basis for State leadership and assistance.

In 1998, the CSBG Reauthorization Act made ROMA implementation a requirement for receiving federal CSBG funds, and established October 1, 2001, as the start date for reporting outcomes in the context of ROMA performance-based management principles. This statutory mandate changed both the nature and pace of previously voluntary ROMA implementation throughout the CSBG Network.

Information Memorandum (IM) 152, issued by OCS, outlines a new Performance Management Framework. The IM places an enhanced emphasis on analysis and evaluation under ROMA Next Generation. This evaluation and analysis is actualized through the new CSBG Annual Report that will replace the CSBG IS beginning in FFY 2018.

Local CAAs have been encouraged to undertake a number of ROMA implementation actions that focus on results-oriented management and accountability.

RESULTS ORIENTED MANAGEMENT PRINCIPLES

- Assess poverty needs and conditions within the community
- Define a clear anti-poverty mission for the CSBG Network
- Define the strategies and services to address those needs, both immediate and longer term, in the context of existing resources and opportunities in the community
- Identify how the network will incorporate the mission and implementation activities into the National Theory of Change
- Identify specific improvements, or results, to be achieved among people with low incomes and communities in which they live
- Organize and implement programs, services, and strategies within the agency and among partnering organizations, to achieve anticipated results

RESULTS ORIENTED ACCOUNTABILITY PRINCIPLES

- Develop and implement processes to identify, measure, and record improvements in the condition of people with low incomes and the communities in which they live that result from CSBG Network intervention
- Use information about outcomes, or results, among agency tripartite boards and staff to determine overall effectiveness; inform annual and long-range planning; and promote new funding and community partnership activities
- Compare actual results with intended results as identified in local Theories of Change to assure needs are being addressed as planned
- Encourage state CSBG offices and state CAA associations to work in coordination to advance ROMA performance-based concepts among CSBG Eligible Entities through ongoing training and technical assistance

NATIONAL PERFORMANCE GOALS AND INDICATORS

The CSBG Act Section 678E(a)(1) required states administering CSBG to implement a management and evaluation strategy that measures and reports the performance outcomes of CAAs by FFY 2001.

From 2001 to 2003, OCS worked with national, state, and local CSBG officials to identify the results and performance targets that best reflected the multi-faceted work of CAAs. Priority was given to targets that could be collected and reported in a manner that presented an accurate indication of national impact. Results of this collaboration included the National Performance Indicators (NPIs), used to organize and report outcomes, and the identification of four performance indicators for which target information is collected. The new CSBG Annual Report goals are listed below and the NPIs are available at nascsp.org as well as in the Targeting Summary of this Appendix.

NATIONAL PERFORMANCE GOALS

As directed in OCS's Information Memorandum (IM) #152, under ROMA Next Generation of the new Performance Management Framework, the network moved from six national goals to three. NPIs under the new goals are reported for the first time in this FY 18 report and represent baseline data.

Goal 1: Individuals and families with low incomes are stable and achieve economic security.

Goal 2: Communities where people live are healthy and offer economic opportunity.

Goal 3: People with low incomes are engaged and active in building opportunities in communities.

NATIONAL PERFORMANCE INDICATORS

To enable greater aggregation and national reporting of the most universal and significant CSBG results among states and CAAs, 6 common categories, or domains, of CAA performance were identified from fiscal years 2001 to 2003 data. The CSBG Annual Report NPIs measure incremental progress toward achieving each of the larger goals.

In FY 2018, states began collecting the new set of NPIs in the annual report. The NPIs are organized by community level work (Community National Performance Indicators, e.g., CNPIs) and individual and family level work (Individual and Family Level National Performance Indicators, e.g.,

FNPIs). The CSBG Annual Report NPIs are organized by six core domains and one unique additional domain that organize the work of CAAs. Community Service Block Grant Domains:

1. Employment
2. Education and Cognitive Development
3. Income and Asset Building
4. Housing
5. Health and Social/Behavioral Development
6. Civic Engagement and Community Involvement
7. Outcomes and Services Across Multiple Domains

Each domain includes its own set of new CSBG Annual Report NPIs which are included in the Appendix.

NATIONAL PERFORMANCE TARGETS & TRENDS

In addition to CSBG's performance measurement initiative, the Executive Office of the President, Office of Management and Budget (OMB) has established a government-wide initiative to use performance targets and outcome measures to assess the program efficiency and effectiveness of all federally-funded domestic assistance programs. As a result, beginning in FFY 2004 OCS began to develop and report CSBG performance targets, or anticipated levels of achievement. This FY 2020 report represents the fifteenth year of collecting performance targets based on the NPIs.

The nature and scope of national CAA outcome reporting has been incorporated into the CSBG Annual Report NPIs. OCS collects baseline information concerning CAA performance targets to which future years' performances may be compared. This information serves to gauge the effectiveness and efficiency of CAA program activities.

Section 678E of the CSBG statute requires agencies to measure their performance and achievement in carrying out their goals. CAAs set targets for the number of participants they expect to achieve specific goals and then collect data on the number of participants who achieved those goals.

As the data accrue, agencies relate their abilities to predict performance outcomes by dividing the number of participants achieving the goal by the number expected to achieve the goal. The resulting percentage generally assesses CAAs' knowledge of their programs as well as the success of their participants. Trends indicate that agencies' abilities to set targets remain high as the anticipated

and actual numbers converge.

TARGETING SUMMARY

Overall, the data demonstrates that despite volatile and hard-to-predict economic conditions, the CSBG Network has remained knowledgeable about its capacity to achieve results and to effectively provide the most needed services to families and communities with low incomes. The majority of targets were over 90% accurate and are available to view in the Appendix. It is important to reiterate that many of these indicators and associated outcomes may take periods of longer than one year to achieve, and many of the individuals enrolled continue to work towards achievement of outcomes over program years. Additionally, changes within local communities and local economic instability are variables outside of agencies' control and affect targeting projections.

CAAs can use trend data and the ROMA cycle to modify and position their programs and services in anticipation of and are highly successful at modifying and responding to changes in the communities in which they operate to achieve relatively high percentages of their projected outcomes. Targeting is an essential part of the CSBG Network's capacity to anticipate, plan, and respond to needs facing communities and facing families/individuals served throughout the year.

The National Community Action Network

Theory of Change

Community Action Goals

Goal 1

Individuals and families with low incomes are stable and achieve economic security.

Goal 2

Communities where people with low incomes live are healthy and offer economic opportunity.

Goal 3

People with low incomes are engaged and active in building opportunities in communities.

Services and Strategies

Employment

Education & Cognitive Development

Income, Infrastructure & Asset Building

Housing

Health/Social Behavioral Development

Civic Engagement & Community Involvement

Core Principles

- Recognize the complexity of the issues of poverty
- Build local solutions specific to local needs
- Support family stability as a foundation for economic security
- Advocate for systemic change
- Pursue positive individual, family, and community level change
- Maximize involvement of people with low incomes
- Engage local community partners and citizens in solutions
- Leverage state, federal, and community resources

Performance Management

How well does the network operate?

- Local Organizational Standards
- State and Federal Accountability Measures
- Results Oriented Management and Accountability System

What difference does the network make?

- Individual and Family National Performance Indicators
- Community National Performance Indicators

A national network of over 1,000 high performing Community Action Agencies, State Associations, State offices, and Federal partners supported by the Community Services Block Grant (CSBG) to mobilize communities to fight poverty.

APPENDIX 2: STATE CSBG ADMINISTRATION

TABLE 2-A: ADMINISTRATIVE LOCATION OF STATE CSBG OFFICE

State	Lead Agency Department/Cabinet
Alabama	Community Affairs Department
Alaska	Commerce, Community, and Economic Development
American Samoa	Governor's Office
Arizona	Human Services Department
Arkansas	Community Services Department
California	Human Services Department
Colorado	Department of Local Affairs
Connecticut	Social Services Department
Delaware	Social Services Department
District of Columbia	Human Services Department
Florida	Department of Economic Opportunity
Georgia	Human Services Department
Hawaii	Department of Labor and Industrial Relations
Idaho	Department of Health and Welfare
Illinois	Community Affairs Department
Indiana	Community Programs
Iowa	Department of Human Rights
Kansas	Kansas Housing Resources Corporation
Kentucky	Community Services Department
Louisiana	Louisiana Workforce Commission
Maine	Human Services Department
Maryland	Office of the Secretary
Massachusetts	Executive Office of Housing and Economic Development
Michigan	Human Services Department
Minnesota	Human Services Department
Mississippi	Human Services Department
Missouri	Social Services Department
Montana	Human Services Department
Nebraska	Department of Health and Human Services
Nevada	Human Services Department
New Hampshire	Human Services Department
New Jersey	Community Affairs Department
New Mexico	Human Services Department
New York	Community Services Department
North Carolina	Human Services Department
North Dakota	Community Services Department

APPENDIX 5: INDIVIDUAL AND FAMILY OUTCOMES

TABLE 5-A: EMPLOYMENT OUTCOMES

Employment (FNPI 1)	I.) Number of Participants Served	II.) Target (#)	III.) Actual Results (#)	IV.) Percentage Achieving Outcome [III/ I = IV]	V.) Performance Target Accuracy (III/II = V)
FNPI 1a The number of unemployed youth who obtained employment to gain skills or income.	120,434	110,527	107,397	89.17%	97.17%
FNPI 1b The number of unemployed adults who obtained employment (<u>up to a living wage</u>).	94,458		34,835	36.88%	67.04%
FNPI 1c The number of unemployed adults who obtained and maintained employment for at least 90 days (<u>up to a living wage</u>).	65,345	51,964	22,752	34.82%	74.46%
FNPI 1d The number of unemployed adults who obtained and maintained employment for at least 180 days (<u>up to a living wage</u>).	38,538	30,558	10,741	27.87%	61.22%
FNPI 1e The number of unemployed adults who obtained employment (<u>with a living wage or higher</u>).	42,023	17,545	11,032	26.25%	67.86%
FNPI 1f The number of unemployed adults who obtained and maintained employment for at least 90 days (<u>with a living wage or higher</u>).	35,324	9,775	6,597	18.68%	67.49%
FNPI 1g The number of unemployed adults who obtained and maintained employment for at least 180 days (<u>with a living wage or higher</u>).	26,821	6,116	4,630	17.26%	75.70%
FNPI 1h The number of employed participants in a career-advancement related program who <u>entered or transitioned</u> into a position that provided increased income and/or benefits.	44,951	20,644	15,120	33.64%	73.24%
FNPI 1h.1 Of the above, the number of employed participants who Increased income from employment through <u>wage or salary amount increase</u> .	30,546	11,006	6,267	20.52%	56.94%
FNPI 1h.2 Of the above, the number of employed participants who increased income from employment through <u>hours worked increase</u> .	24,860	7,647	4,026	16.19%	52.65%
FNPI 1h.3 Of the above, the number of employed participants who <u>increased benefits</u> related to employment.	14,961	6,693	3,261	21.80%	48.72%

TABLE 5-B: EDUCATION AND COGNITIVE DEVELOPMENT OUTCOMES

Education and Cognitive Development (FNPI 2)	I.) Number of Participants Served (#)	II.) Target (#)	III.) Actual Results (#)	IV.) Percentage Achieving Outcome [III/ I = IV]	V.) Performance Target Accuracy (III/II = V)
FNPI 2a The number of children (0 to 5) who demonstrated improved emergent literacy skills.	242,898	227,086	199,263	82.04%	87.75%
FNPI 2b The number of children (0 to 5) who demonstrated skills for school readiness.	284,788	262,130	235,317	82.63%	89.77%
FNPI 2c The number of children and youth who demonstrated improved positive approaches toward learning, including improved attention skills.	602,201	595,283	564,601	93.76%	94.85%
FNPI 2c.1 Early Childhood Education (ages 0-5)	395,569	381,267	356,036	90.01%	93.38%
FNPI 2c.2 1st grade-8th grade	161,278	151,871	150,384	93.25%	99.02%
FNPI 2c.3 9th grade-12th grade	70,707	62,386	58,713	83.04%	94.11%
FNPI 2d The number of children and youth who are achieving at basic grade level (academic, social, and other school success skills).	247,622	232,130	213,944	86.40%	92.17%
FNPI 2d.1 Early Childhood Education (ages 0-5)	191,369	173,083	156,028	81.53%	90.15%
FNPI 2d.2 1st grade-8th grade	24,142	15,134	14,133	58.54%	93.39%
FNPI 2d.3 9th grade-12th grade	58,096	45,931	45,635	78.55%	99.36%
FNPI 2e The number of parents/caregivers who improved their home environments.	127,140	130,081	93,598	73.62%	71.95%
FNPI 2f The number of adults who demonstrated improved basic education.	52,583	32,142	28,896	54.95%	89.90%
FNPI 2g The number of individuals who obtained a high school diploma and/or obtained an equivalency certificate or diploma.	41,229	14,329	9,386	22.77%	65.50%
FNPI 2h The number of individuals who obtained a recognized credential, certificate, or degree relating to the achievement of educational or vocational skills.	46,221	27,307	18,377	39.76%	67.30%
FNPI 2i The number of individuals who obtained an Associate's degree.	30,436	5,373	1,675	5.50%	31.17%
FNPI 2j The number of individuals who obtained a Bachelor's degree.	26,649	1,596	692	2.60%	43.36%

TABLE 5-C: INCOME AND ASSET BUILDING OUTCOMES

Income and Asset Building (FNPI 3)	I.) Number of Participants Served (#)	II.) Target (#)	III.) Actual Results (#)	IV.) Percentage Achieving Outcome [III/ I = IV]	V.) Performance Target Accuracy (III/II = V)
FNPI 3a The number of individuals who achieved and maintained capacity to meet basic needs for <u>90 days</u> .	143,498	107,147	98,630	68.73%	92.05%
FNPI 3b The number of individuals who achieved and maintained capacity to meet basic needs for <u>180 days</u> .	99,152	60,422	56,979	57.47%	94.30%
FNPI 3c The number of individuals who opened a <u>savings account or IDA</u> .	22,475	9,055	4,988	22.19%	55.09%
FNPI 3d The number of individuals who <u>increased their savings</u> .	38,179	19,349	16,431	43.04%	84.92%
FNPI 3e The number of individuals who used their savings to <u>purchase an asset</u> .	14,040	6,238	3,007	21.42%	48.20%
FNPI 3f The number of individuals who <u>improved their credit scores</u> .	15,349	5,398	2,571	16.75%	47.63%
FNPI 3g The number of individuals who <u>increased their net worth</u> .	24,521	6,136	5,519	22.51%	89.94%
FNPI 3h The number of individuals engaged with the Community Action Agency who report <u>improved financial well-being</u> .	51,280	51,057	35,386	69.01%	69.31%
FNPI 3i The number of individuals engaged with the Community Action Agency who report <u>improved financial well-being</u> .	139,665	96,719	103,773	74.30%	107.29%

TABLE 5-D: HOUSING OUTCOMES

Housing (FNPI 4)	I.) Number of Participants Served (#)	II.) Target (#)	III.) Actual Results (#)	IV.) Percentage Achieving Outcome [III / I = IV]	V.) Performance Target Accuracy (III/II = V)
FNPI 4a The number of households experiencing homelessness who obtained <u>safe temporary shelter</u> .	115,080	82,911	80,663	70.09%	97.29%
FNPI 4b The number of households who obtained <u>safe and affordable housing</u> .	254,485	173,512	78,371	70.09%	102.80%
FNPI 4c The number of households who maintained safe and affordable housing for <u>90 days</u> .	167,503	97,961	109,042	65.10%	111.31%
FNPI 4d The number of households who maintained safe and affordable housing for <u>180 days</u> .	126,909	72,857	79,430	62.59%	109.02%
FNPI 4e The number of households who <u>avoided eviction</u> .	297,908	150,825	233,722	78.45%	154.96%
FNPI 4f The number of households who <u>avoided foreclosure</u> .	39,219	11,371	12,942	33.00%	113.82%
FNPI 4g The number of households who <u>experienced improved health and safety</u> due to improvements within their home (e.g. reduction or elimination of lead, radon, carbon dioxide and/or fire hazards or electrical issues, etc).	153,105	81,068	57,805	37.76%	71.30%
FNPI 4h The number of households with <u>improved energy efficiency and/or energy burden reduction</u> in their homes.	1,234,760	1,253,221	1,098,674	88.98%	87.67%

TABLE 5-E: HEALTH AND SOCIAL/BEHAVIORAL DEVELOPMENT OUTCOMES

Health and Social/Behavioral Development (FNPI 5)	I.) Number of Participants Served (#)	II.) Target (#)	III.) Actual Results (#)	IV.) Percentage Achieving Outcome (III/ I = IV]	V.) Performance Target Accuracy (III/II = V]
FNPI 5a The number of individuals who demonstrated <u>increased nutrition skills</u> (e.g. cooking, shopping, and growing food).	587,472	432,193	524,095	89.21%	121.26%
FNPI 5b The number of individuals who demonstrated <u>improved physical health</u> and well-being.	1,138,427	913,889	1,055,013	92.67%	115.44%
FNPI 5c The number of individuals who demonstrated <u>improved mental and behavioral health and well-being</u> .	297,781	265,764	248,321	83.39%	93.44%
FNPI 5d The number of individuals who <u>improved skills</u> related to the adult role of parents/ caregivers.	208,284	201,917	159,229	76.45%	78.86%
FNPI 5e The number of parents/caregivers who <u>demonstrated increased sensitivity and responsiveness</u> in their interactions with their children.	132,804	113,865	92,033	69.30%	80.83%
FNPI 5f The number of <u>seniors (65+)</u> who maintained an independent living situation.	626,356	612,852	589,849	94.17%	96.25%
FNPI 5g The number of <u>individuals with disabilities</u> who maintained an independent living situation.	344,473	306,532	301,289	87.46%	98.29%
FNPI 5h The number of <u>individuals with chronic illness</u> who maintained an independent living situation.	63,663	50,431	44,852	70.45%	88.94%
FNPI 5i The number of individuals with <u>no recidivating event</u> for six months.	31,077	18,210	29,012	93.36%	159.32%
FNPI 5i.1 Youth (ages 14-17)	5,958	4,733	5,242	87.98%	110.75%
FNPI 5i.2 Adults (ages 18+)	24,116	11,324	22,956	95.19%	202.72%

TABLE 5-F: CIVIC ENGAGEMENT AND COMMUNITY INVOLVEMENT OUTCOMES

Civic Engagement and Community Involvement Indicators (FNPI 6)	I.) Number of Participants Served (#)	II.) Target (#)	III.) Actual Results (#)	IV.) Percentage Achieving Outcome [III / I = IV %]	V.) Performance Target Accuracy (III / II = V %)
FNPI 6a The number of Community Action program participants who increased skills, knowledge, and abilities to enable them to work with Community Action to improve conditions in the community.	187,407	167,818	142,477	76.03%	84.90%
FNPI 6a.1 Of the above, the number of Community Action program participants who improved their leadership skills.	73,568	27,044	22,240	30.23%	82.24%
FNPI 6a.2 Of the above, the number of Community Action program participants who improved their social networks.	103,750	57,468	52,773	50.87%	91.83%
FNPI 6a.3 Of the above, the number of Community Action program participants who gained other skills, knowledge and abilities to enhance their ability to engage.	125,339	91,814	82,467	65.80%	89.82%

TABLE 5-G: OUTCOMES ACROSS MULTIPLE DOMAINS

Outcomes Across Multiple Domains (FNPI 7)	I.) Number of Participants Served (#)	II.) Target (#)	III.) Actual Results (#)	IV.) Percentage Achieving Outcome [III / I = IV %]	V.) Performance Target Accuracy (III / II = V %)
FNPI 7a The number of individuals who achieved one or more outcomes as identified by the National Performance Indicators in various domains.	N/A	N/A	2,486,637	N/A	N/A
