

**U.S. DEPARTMENT OF ENERGY  
OFFICE OF ENERGY EFFICIENCY AND RENEWABLE ENERGY  
NEPA DETERMINATION**

**RECIPIENT:** Weatherization Assistance Program Grantees with a DOE executed  
Historic Preservation Programmatic Agreement

**STATE:** Mult

**PROJECT TITLE** Weatherization Assistance Program Fiscal Year 2025 Formula Awards - Recipients with a DOE executed  
:  
Historic Preservation Programmatic Agreement

<b>Funding Opportunity Announcement Number</b>	<b>Procurement Instrument Number</b>	<b>NEPA Control Number</b>	<b>CID Number</b>
WAP-ARLD-2025A		GFO-WAP-ARLD-2025A	

**Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Policy 451.1), I have made the following determination:**

**CX, EA, EIS APPENDIX AND NUMBER:**

Description:

- |  |  |
|--|--|
| <b>A9 Information gathering, analysis, and dissemination</b>     | Information gathering (including, but not limited to, literature surveys, inventories, site visits, and audits), data analysis (including, but not limited to, computer modeling), document preparation (including, but not limited to, conceptual design, feasibility studies, and analytical energy supply and demand studies), and information dissemination (including, but not limited to, document publication and distribution, and classroom training and informational programs), but not including site characterization or environmental monitoring. (See also B3.1 of appendix B to this subpart.)   |
| <b>A11 Technical advice and assistance to organizations</b>      | Technical advice and planning assistance to international, national, state, and local organizations.   |
| <b>B1.16 Asbestos removal</b>                                    | Removal of asbestos-containing materials from buildings in accordance with applicable requirements (such as 40 CFR part 61, "National Emission Standards for Hazardous Air Pollutants"; 40 CFR part 763, "Asbestos"; 29 CFR part 1910, subpart I, "Personal Protective Equipment"; and 29 CFR part 1926, "Safety and Health Regulations for Construction"; and appropriate state and local requirements, including certification of removal contractors and technicians).  |
| <b>B1.34 Lead-based paint containment, removal, and disposal</b> | Containment, removal, and disposal of lead-based paint in accordance with applicable requirements (such as provisions relating to the certification of removal contractors and technicians at 40 CFR part 745, "Lead-Based Paint Poisoning Prevention In Certain Residential Structures").   |
| <b>B2.2 Building and equipment instrumentation</b>               | Installation of, or improvements to, building and equipment instrumentation (including, but not limited to, remote control panels, remote monitoring capability, alarm and surveillance systems, control systems to provide automatic shutdown, fire detection and protection systems, water consumption monitors and flow control systems, announcement and emergency warning systems, criticality and radiation monitors and alarms, and safeguards and security equipment).   |
| <b>B3.1 Site characterization and environmental monitoring</b>   | Site characterization and environmental monitoring (including, but not limited to, siting, construction, modification, operation, and dismantlement and removal or otherwise proper closure (such as of a well) of characterization and monitoring devices, and siting, construction, and associated operation of a small-scale laboratory building or renovation of a room in an existing building for sample analysis). Such activities would be designed in conformance with applicable requirements and use best management practices to limit the potential effects of any resultant ground disturbance. Covered activities include, but are not limited to, site characterization and environmental monitoring under CERCLA and RCRA. (This class of actions excludes activities in aquatic environments. See B3.16 of this appendix for such activities.) Specific activities include, but are not limited to: (a) Geological, geophysical (such as gravity, magnetic, electrical, seismic, radar, and temperature gradient), geochemical, and engineering surveys and mapping, and the establishment of survey marks. Seismic techniques would not include large-scale reflection or refraction testing; (b) Installation and operation of field instruments (such as stream-gauging stations or flow-measuring devices, telemetry systems, geochemical monitoring tools, and geophysical exploration tools); (c) Drilling of wells for sampling or monitoring of groundwater or the vadose (unsaturated) zone, well logging, and installation of water-level recording devices in wells; (d) Aquifer and underground reservoir response testing; (e) Installation and operation of ambient air monitoring equipment; (f) Sampling and characterization of water, soil, rock, or contaminants (such as drilling using truck- or mobile-scale equipment, and modification, use, and plugging of boreholes); (g) Sampling and characterization of water effluents, air emissions, or solid waste streams; (h) Installation and operation of meteorological towers and associated activities (such as assessment of potential wind energy resources); (i) Sampling of flora or fauna; and (j) Archeological, historic, and cultural resource identification in compliance with 36 CFR part 800 and 43 CFR part 7. |

**B5.1 Actions to conserve energy or water**

(a) Actions to conserve energy or water, demonstrate potential energy or water conservation, and promote energy efficiency that would not have the potential to cause significant changes in the indoor or outdoor concentrations of potentially harmful substances. These actions may involve financial and technical assistance to individuals (such as builders, owners, consultants, manufacturers, and designers), organizations (such as utilities), and governments (such as state, local, and tribal). Covered actions include, but are not limited to weatherization (such as insulation and replacing windows and doors); programmed lowering of thermostat settings; placement of timers on hot water heaters; installation or replacement of energy efficient lighting, low-flow plumbing fixtures (such as faucets, toilets, and showerheads), heating, ventilation, and air conditioning systems, and appliances; installation of drip-irrigation systems; improvements in generator efficiency and appliance efficiency ratings; efficiency improvements for vehicles and transportation (such as fleet changeout); power storage (such as flywheels and batteries, generally less than 10 megawatt equivalent); transportation management systems (such as traffic signal control systems, car navigation, speed cameras, and automatic plate number recognition); development of energy-efficient manufacturing, industrial, or building practices; and small-scale energy efficiency and conservation research and development and small-scale pilot projects. Covered actions include building renovations or new structures, provided that they occur in a previously disturbed or developed area. Covered actions could involve commercial, residential, agricultural, academic, institutional, or industrial sectors. Covered actions do not include rulemakings, standard-settings, or proposed DOE legislation, except for those actions listed in B5.1(b) of this appendix. (b) Covered actions include rulemakings that establish energy conservation standards for consumer products and industrial equipment, provided that the actions would not: (1) have the potential to cause a significant change in manufacturing infrastructure (such as construction of new manufacturing plants with considerable associated ground disturbance); (2) involve significant unresolved conflicts concerning alternative uses of available resources (such as rare or limited raw materials); (3) have the potential to result in a significant increase in the disposal of materials posing significant risks to human health and the environment (such as RCRA hazardous wastes); or (4) have the potential to cause a significant increase in energy consumption in a state or region.

**B5.16 Solar photovoltaic systems**

The installation, modification, operation, and removal of commercially available solar photovoltaic systems located on a building or other structure (such as rooftop, parking lot or facility, and mounted to signage, lighting, gates, or fences), or if located on land, generally comprising less than 10 acres within a previously disturbed or developed area. Covered actions would be in accordance with applicable requirements (such as local land use and zoning requirements) in the proposed project area and would incorporate appropriate control technologies and best management practices.

**B5.17 Solar thermal systems**

The installation, modification, operation, and removal of commercially available smallscale solar thermal systems (including, but not limited to, solar hot water systems) located on or contiguous to a building, and if located on land, generally comprising less than 10 acres within a previously disturbed or developed area. Covered actions would be in accordance with applicable requirements (such as local land use and zoning requirements) in the proposed project area and would incorporate appropriate control technologies and best management practices.

Rationale for determination:

**B4.14 Construction and Operation of Electrochemical-Battery or Flywheel Energy Storage Systems**

Construction, operation, upgrade, or decommissioning of an electrochemical battery or flywheel energy storage system within a previously disturbed or developed area or within a small (as discussed at 10 CFR 1021.410(g)(2)) area contiguous to a previously disturbed or developed area. Covered actions would be in accordance with applicable requirements (such as land use and zoning requirements) in the proposed project area and the integral elements listed at the start of appendix B of this part, and would incorporate appropriate safety standards (including the current National Fire Protection Association 855, Standard for the Installation of Stationary Energy Storage Systems), design and construction standards, control technologies, and best management practices.

The U.S. Department of Energy (DOE) administers the Weatherization Assistance Program (WAP) as authorized by Title IV, Energy Conservation and Production Act, as amended. The mission of WAP is to increase the energy efficiency of dwellings owned or occupied by low-income persons or to provide such persons renewable energy systems or technologies, reduce their total residential expenditures, and improve their health and safety, especially low-income persons who are particularly vulnerable such as the elderly, persons with disabilities, families with children, high residential energy users, and households with high energy burden. Each home weatherized under WAP would receive approximately \$8,547 as determined by site-specific outcomes of the energy audit process. Most Recipients leverage DOE funds with other federal and non-federal resources for the activities listed below.

This NEPA determination is specific to the 55 WAP Recipients\* with a DOE executed Historic Preservation Programmatic Agreement for activities that are funded by the WAP Program Year 2025 Formula Grants Administrative and Legal Requirements Document (WAP ALRD 2025), WAP Weatherization Readiness, and reported Petroleum Violation Escrow (PVE) funds, as applicable. Guam, does not have a DOE executed Historic Preservation Programmatic Agreement and has a separate NEPA determination: GFO-WAP-ALRD 2025B.

DOE has determined the following activities that are funded by the WAP Program Year 2025 Formula Grants Administrative and Legal Requirements Document (WAP ALRD 2025) WAP Weatherization Readiness, and reported PVE funds, as applicable, are categorically excluded from further NEPA review, absent extraordinary circumstances, cumulative impacts, or connected actions that may lead to significant impacts on the environment, or any inconsistency with “integral elements” (as contained in 10 CFR Part 1021, Appendix B) as they relate to a specific activity.

Any activities on tribal lands or tribal properties are restricted to homes/buildings less than forty-five (45) years old and without ground disturbance. Recipients may contact their Project Officer for a Historic Preservation Worksheet to request a review of activities that are listed below on tribal homes/buildings forty-five (45) years and older. Review by a DOE NEPA Specialist and approval from DOE is required prior to initiating activities reviewed on a Historic Preservation Worksheet.

Allowable activities for WAP annual formula, Weatherization Readiness, and PVE funds include:

1. Administrative activities associated with management of the designated Weatherization Office and management of programs and strategies in support of weatherization activities.
2. Development and implementation of training programs and strategies for weatherization effort, including initial home energy audits, final inspections, and client education.
3. Purchase of vehicles and equipment needed for administrative activities, training activities, weatherization energy audits, installation of measures indicated below, and quality control inspections.
4. Weatherization activities, provided that projects apply the restrictions of each State’s programmatic agreement with their State Historic Preservation Office (SHPO), are installed in existing buildings, are appropriately sized, and are covered by Appendix A of 10 CFR 440 and/or approved as part of the energy audit approval procedures and material approval process, and limited to:
  - a. Energy Conservation Measures- including purchase and installation of measures, as applicable
    - i. Building Shell Measures:
      1. Attic/Roof Insulation
      2. Wall Insulation
      3. Foundation Insulation
      4. Air Sealing/Infiltration Reduction
      5. Window replacement and treatments, such as, window film, awnings and solar screens
      6. Door replacement and treatments such as, storm door, window film, solar screens
    - b. Mechanical Measures
      - i. Clean, tune, repair, or replace heating and/or cooling systems including switching fuel source.
      - ii. Install duct and distribution system insulation
      - iii. Seal ducts and distribution systems
      - iv. Install programmable thermostats
      - v. Repair/replace domestic water heaters, including switching fuel source.
      - vi. Install domestic hot water heater tank and pipe insulation
    - c. Electric and Water Measures
      - i. Install efficient light sources
      - ii. Install low-flow showerheads, aerators, and toilets
      - iii. Replace inefficient refrigerators and freezers with energy-efficient models
5. Energy-related health and safety measures per the most recently approved DOE WAP Guidance, currently Weatherization Program Notice (WPN) 22-7 provided that activities adhere to the requirements of the respective Recipients’ DOE executed Historic Preservation Programmatic Agreement, occur in existing buildings, and are limited to:
  - a. Air-Conditioning, Heating Systems, and Combustion Appliances
    - i. Replace, repair, or install primary heating systems when existing primary heating systems are unsafe, inoperable, or nonexistent.
    - ii. No DOE-funded weatherization work is permitted if the completed dwelling unit will be heated with an unvented combustion space heater as the primary heat source. The primary heat source must be replaced with a vented unit prior to or by weatherization. The replacement unit must be sized to heat the entire dwelling unit.
    - iii. Unsafe secondary units, including space heaters, must be repaired, or removed and disposed of, or deferral is required. Secondary unvented space heaters are considered unsafe if they:
      1. are not listed and labeled as meeting ANSI Z21.11.2;
      2. have an input rating of more than 40,000 BTU/hour; or are in a bedroom and have an input rating of more than 10,000 BTU/hour;
      3. are in a bathroom and have an input rating of more than 6,000 BTU/hour;

4. are operating in an unsafe manner (e.g., high carbon monoxide (CO) readings, too close to combustible materials, lack sufficient combustion air volume);
  5. or are not permitted by the Authority Having Jurisdiction (AHJ)
- iv. DOE WAP Grantees must comply with the Manufactured Home Construction and Safety Standards which mandates that:
1. All fuel-burning appliances in manufactured homes except: ranges, ovens, illuminating appliances, clothes dryers, solid fuel-burning fireplaces and solid fuel burning stoves, must be installed to provide for the complete separation of the combustion system from the interior atmosphere of the manufactured home (i.e., to draw their combustion air from outside), and be vented to outside the dwelling.
  2. All appliances installed by weatherization in manufactured homes must meet these standards, including secondary heating sources. No unvented fuel-burning space heating appliances may remain in a MH after weatherization under any circumstances. If an occupant will not allow the removal of an unsafe combustion appliance from the home, deferral is required.
  3. Repair or replace combustion gas venting to ensure proper combustion gas venting to outside the dwelling for all combustion appliances, including but not limited to gas dryers and refrigerators, furnaces, vented space heaters, and water heaters.
  - v. If weatherization installs an appliance that is vented into a masonry chimney, the chimney must be lined in compliance with the International Fuel Gas Code (IFGC) or local AHJ if more stringent.
  - vi. Install adequate combustion air for all combustion appliances left after weatherization.
  - vii. If permits are required for heating/cooling system work, they must be secured and are a program operation cost if the installation is an ECM or may be included in the health and safety (H&S) cost if installed as a H&S measure.
  - viii. If unsafe conditions relating to existing combustion appliances require remediation to safely perform weatherization and cannot be remedied by repair or tuning, replacement is an allowable H&S measure unless prevented by other guidance herein.
  - ix. Documentation justifying the replacement with a cost comparison between replacement and repair must be maintained in the client file
  - x. Replace, repair, or install primary air conditioning in homes where current occupants meet Grantee's definition of "at-risk".
  - xi. Minor repairs on electric space heaters
  - xii. Repair or removal of primary and secondary solid fuel heating appliances.
  - xiii. Replacement of unsafe primary solid fuel heating appliances.
- b. Asbestos
- i. When suspected friable Asbestos Containing Materials (ACM) are present, including vermiculite, assume they contain asbestos and take precautionary measures to prevent disturbing it during the audit and work unless testing determines otherwise.
  - ii. Identifying and managing suspected ACM that provides for reasonable and necessary precautions to prevent asbestos contamination in the home.
  - iii. Addressing blower door testing where suspected friable ACM is present (as defined by EPA), including vermiculite.
  - iv. Temporary removal and reinstallation of ACM siding to perform an ECM (e.g., wall insulation).
  - v. Limited encapsulation or removal of suspected ACM on small surfaces (pipes, ductwork, furnaces, other small, covered surfaces, etc.) by an appropriately trained asbestos control professional if necessary to safely weatherize the dwelling.
- c. Biologicals and Unsanitary Conditions
- i. Limited remediation of conditions that may lead to or promote biological concerns and unsanitary conditions (e.g., repairing leaking sewage pipe)
  - ii. Limited cleaning of the workspace to protect the health and safety of workers and occupants
- d. Building Structure and Roofing
- i. Minor repairs to building structure or roofs
- e. Code Compliance
- i. Correction of preexisting code compliance issues triggered by weatherization measures being installed in a specific room or area of the home.
- f. Electrical
- i. Provide sufficient over-current protection and damming prior to insulating building components containing knob and tube wiring, as required by the AHJ.
  - ii. Minor electrical repairs (e.g., junction box covers, improper splices) to protect the occupant or workers from electrical hazards within the living area or in the immediate area where weatherization activities will occur
- g. Fuel Leaks
- i. When a gas leak is found on the utility side of service, the utility service must be contacted, work must be temporarily halted, and the leak must be repaired before work may proceed.
  - ii. Fuel leaks that are the responsibility of the occupant (vs. the utility) must be repaired before installing weatherization measures in the home
  - iii. Replacement or repair of leaking bulk fuel tanks and/or lines if connected systems will remain after weatherization.
  - iv. Replacement of flexible appliance gas connectors that are not compliant with current fuel gas codes
- h. Gas Ovens/Stovetops/Ranges
- i. Limited cleaning or repair of ovens/ranges/stovetops

- ii. Limited replacement of unsafe gas ovens/ranges/stovetops
  - i. Hazardous Materials
    - i. Hazardous Waste Materials generated by weatherization work (e.g., refrigerant, asbestos, lead, mercury, CFL lighting bulb/ballasts, etc.) must be disposed of according to all local and federal laws, regulations, and guidelines, as applicable.
    - ii. Limited removal of pollutants that pose a risk to workers is required (e.g., flammable liquids, hazardous chemicals, and other air pollutants)
    - iii. Limited removal of pollutants that pose a risk to the occupant
  - j. Injury Prevention of Occupants
    - i. Minor repairs and installations (e.g., repairing stairs, replacing handrails, etc.)
  - k. Lead Based Surface Coverings
    - i. Comply with EPA's Lead; Renovation, Repair and Painting Program (RRP) rules when working in pre-1978 housing unless testing confirms the work area to be lead free.
    - ii. Testing to determine the presence of lead on surfaces that will be disturbed by WAP measure installation is allowed with EPA-approved testing methods.
  - l. Mold and Moisture
    - i. Limited water damage repairs that can be addressed by weatherization workers are allowed when necessary to weatherize the home and to ensure the long-term stability and durability of the measures
    - ii. Source control (i.e., correction of moisture and mold creating conditions) when necessary, to weatherize the home and to ensure the long-term stability and durability of the measures. Source control is independent of latent damage and related repairs. Source control includes, but is not limited to site drainage, gutters, down spouts, extensions, flashing, sump pumps, dehumidifiers, landscape, leaking roofs, vapor retarders, moisture barriers, etc.
    - iii. Window and door repairs to resolve a bulk water intrusion issue that is the cause of visible biological growth and in compliance with the most current Incidental Repair program notice (WPN 19-5)
  - m. Pests
    - i. Limited pest removal is allowed only where infestation would prevent weatherization
    - ii. Screening of windows and points of access and incorporating pest exclusion into air sealing practices to prevent intrusion
  - n. Radon
    - i. Cover exposed dirt floors within the pressure/thermal boundary with a sealed soil gas retarder
    - ii. Cover sump well/pits with airtight covers
    - iii. Implement ventilation as required by ASHRAE 62.2-2016
    - iv. In homes where radon may be present, work scope may include additional precautionary measures based on EPA Healthy Indoor Environment Protocols for Home Energy Upgrades.
    - v. Other precautions may include, but are not limited to, sealing any observed floor and/or foundation penetrations, isolating the basement from the conditioned space, and ensuring crawl space venting is installed and operable.
  - o. Safety Devices; Smoke and Carbon Monoxide Alarms, Fire Extinguishers
    - i. Install CO alarms in every home where alarms are not present or are inoperable in compliance with ASHRAE 62.2-2016 which references NFPA 720 (note: NFPA 720 has been incorporated into NFPA 72)
    - ii. Install smoke alarms where the AHJ requires them if alarms are not present or are inoperable.
    - iii. Replace functional smoke alarms and carbon monoxide alarms if they are beyond the manufacturer's stated lifetime (usually 10 years).
    - iv. Replace functional smoke or CO alarms batteries if designed to be replaceable.
    - v. Provide fire extinguishers where solid fuel burning equipment is present.
  - p. Ventilation and Indoor Air Quality
    - i. Install ventilation as required by ASHRAE 62.2 - 2016.
  - q. Water Heaters
    - i. Limited case-by-case replacement of water heaters if the water heater poses a life-safety risk to occupants (e.g., leaking primary tank, high CO measurements).
    - ii. Minor safety repairs of water heaters (e.g., temperature and pressure valve piping, backflow prevention devices, expansion tanks)
    - iii. Replace, repair, or install primary water heater heaters when existing primary water heater is unsafe, inoperable, or nonexistent
  - r. Worker Safety
    - i. Minor repairs and installations (e.g., repairing stairs, replacing handrails, etc.) are allowable when necessary to safely weatherize the dwelling.
    - ii. Equipment purchases to protect the health and safety of the worker (e.g., Personal Protective Equipment (PPE), jobsite cleaning supplies)
6. Incidental and necessary minor energy-related repairs and replacements provided that activities adhere to the requirements of the respective Recipients' DOE executed Historic Preservation Programmatic Agreement, occur in existing buildings, and are limited to:
- a. Repair/replace damaged windows and doors
  - b. Minor roof repairs- limited to replacing/fixing decking material and roof material.
  - c. Interior and exterior wall repairs

- d. Ceiling repairs
- e. Floor repairs
- f. Foundation or subspace (crawl space) repairs
- g. Exterior drainage repairs limited to gutter repair or replacement, and/or grading adjacent to the perimeter of the foundation not to extend more than 3 feet from the foundation
- h. Plumbing repairs
- i. Electrical repairs

7. Installation of solar photovoltaic (PV) and solar hot water heating systems provided that activities adhere to the requirements of the respective Recipients; DOE executed historic Preservation Programmatic Agreement, occur in or on existing buildings, and are limited to:

- a. PV systems would be appropriately sized and would not exceed 60 kW and/or
- b. Solar hot water heating systems would be appropriately sized and would not exceed 200,000 BTU/HR
- c. Systems would be roof mounted or attached to structure
- d. Battery storage, if applicable, would be inside structure (e.g. inside a garage), or attached to outside of structure

8. Allowable activities under the Weatherization Readiness Funds (WRF) are designated for use by Grantees in addressing structural and health and safety issues. This funding is anticipated to reduce the frequency of deferred homes that require other services, outside the scope of weatherization, before the weatherization measures can be installed provided that activities adhere to the requirements of the respective Recipients' DOE executed Historic Preservation Programmatic Agreement, are installed in or on existing buildings, and are limited to:

- a. Repair/replace damaged windows and doors
- b. Minor electrical and plumbing repairs
- c. Roof repairs or replacement including replacing decking material and roof, and/or changing roof material (e.g., shingles to metal).
- d. Interior and exterior wall repairs
- e. Ceiling repairs
- f. Floor repairs
- g. Foundation or subspace (crawl space) repairs
- h. Exterior drainage repairs limited to gutter repair or replacement, and/or grading adjacent to the perimeter of the foundation not to extend more than 3 feet from the foundation.
- i. Minor plumbing repairs
- j. Minor electrical repairs
- k. Clean-up or remediation of lead paint, asbestos (confirmed or suspected, including vermiculite), and mold and/or moisture beyond typical scope of WAP

No ground disturbance (beyond grading adjacent to the perimeter of the foundation not to extend more than 3 feet from the foundation), including tree removal or tree trimming, would occur for implementation for the above activities.

Activities not listed above, including ground disturbing activities (grading adjacent to the perimeter of the foundation more than 3 feet from the foundation), and tree removal, or tree trimming, are not included under the ALRD categorical exclusion and are subject to additional NEPA review and approval by DOE. For activities/projects, requiring additional NEPA review, states must complete the environmental questionnaire (EQ-1): <https://www.eere-pmc.energy.gov/NEPA.aspx> and receive notification from DOE that the NEPA review has been completed and approved by the Contracting Officer prior to initiating the project or activities.

All incidental measures relating to hazardous materials identified during the WAP activities would be managed in accordance with applicable federal, state, and local requirements.

Recipients are required to review the DOE PowerPoint trainings on NEPA and Historic Preservation prior to commencing work on the above activities. The training is available at [www.energy.gov/node/4816816](http://www.energy.gov/node/4816816). Recipients are responsible for contacting NEPA with any NEPA or historic preservation questions at [GONEPA@ee.doe.gov](mailto:GONEPA@ee.doe.gov).

Recipients are responsible for identifying and promptly notifying DOE of extraordinary circumstances, cumulative impacts, or connected actions that may lead to significant impacts on the environment, or any inconsistency with the "integral elements" (as contained in 10 CFR Part 1021, Appendix B) relating to any proposed activities. Additionally, Recipients must demonstrate compliance with Section 106 of the National Historic Preservation Act (NHPA).

Recipients shall adhere to the restrictions of their DOE executed Historic Preservation Programmatic Agreement. DOE executed historic preservation programmatic agreements are available on: <https://www.energy.gov/scep/historic-preservation-executed-programmatic-agreements>.

DOE is required to consider floodplain management and wetland protection as part of its environmental review process (10 CFR 1022). As part of this required review, DOE determined requirements set forth in Subpart B of 10CFR 1022 are not applicable to the activities above that would occur in the 100-year floodplain (hereinafter

“floodplain”) or wetland because the activities would not have short-term or long-term adverse impacts to the floodplain or wetland. These activities are administrative or minor modifications of existing facilities to improve environmental conditions.

Most activities listed under "Allowable Activities" are more restrictive than the Categorical Exclusion. The restrictions must be followed for the Allowable Activities to be applicable. For activities requiring additional NEPA review, Recipients must complete the environmental questionnaire (found at <https://www.eere-pmc.energy.gov/NEPA.aspx>) for review by DOE.

\* WAP Recipients with a historic preservation programmatic agreement: AL, AK, AS, AZ, AR, CA, CO, CT, DE, DC, FL, GA, HI, ID, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MP, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, OR, PA, PR, RI, SC, SD, TN, TX, UT, VT, VA, WA, WV, WI, WY, and VI.

## NEPA PROVISION

DOE has made a conditional NEPA determination.

The NEPA Determination applies to the following Topic Areas, Budget Periods, and/or tasks:

This NEPA Determination only applies to activities funded by the WAP Program Year 2025 Formula Grants Administrative and Legal Requirements Document, WAP Weatherization Readiness, and Petroleum Violation Escrow (PVE) funds reported under WAP, as applicable. Activities must fit within the restrictions of the Allowable Activities, and Recipients must have a DOE executed Historic Preservation Programmatic Agreement.

The NEPA Determination does not apply to the following Topic Area, Budget Periods, and/or tasks:

This NEPA Determination does NOT apply to activities funded by sources other than the WAP Program Year 2025 Formula Grants Administrative and Legal Requirements Document, WAP Weatherization Readiness, and reported Petroleum Violation Escrow (PVE) funds, as applicable, or to activities that do not fit within the restrictions of the Allowable Activities listed above, or to Recipients that do not have a DOE executed Historic Preservation Programmatic Agreement.

Include the following condition in the financial assistance agreement:

1. This NEPA Determination only applies to activities funded by the WAP Program Year 2025 Formula Grants Administrative and Legal Requirements Document, WAP Weatherization Readiness, and reported Petroleum Violation Escrow (PVE) funds, as applicable.
2. Activities not listed under "Allowable Activities" including ground disturbing activities (grading adjacent to the perimeter of the foundation more than 3 feet from the foundation), tree trimming, and tree removal, are subject to additional NEPA review and approval by DOE. For activities requiring additional NEPA review, Recipients must complete the environmental questionnaire found at <https://www.eere-pmc.energy.gov/NEPA.aspx> and receive notification from DOE that the NEPA review has been completed. A DOE Contracting Officer must provide approval prior to initiating the project or activities.
3. Any activities on tribal lands or tribal properties are restricted to homes/buildings less than forty-five (45) years old and without ground disturbance. Recipients may contact their Project Officer for a Historic Preservation Worksheet to request a review of activities that are listed below on tribal homes/buildings forty-five (45) years and older and/or ground disturbing activities. Approval from DOE is required prior to initiating activities reviewed on a Historic Preservation Worksheet.
4. This authorization does not include activities where the following elements exist: extraordinary circumstances; cumulative impacts or connected actions that may lead to significant effects on the human environment; or any inconsistency with the "integral elements" (as contained in 10 CFR Part 1021, Appendix B) as they relate to a particular project.
5. The Recipient must identify and promptly notify DOE of extraordinary circumstances, cumulative impacts or connected actions that may lead to significant effects on the human environment, or any inconsistency with the "integral elements" (as contained in 10 CFR Part 1021, Appendix B) as they relate to project activities.

6. Recipients must have a DOE executed Historic Preservation Programmatic Agreement and adhere to the terms and restrictions of its DOE executed Historic Preservation Programmatic Agreement. DOE executed historic preservation programmatic agreements are available on the website: <https://www.energy.gov/scep/historic-preservation-executed-programmatic-agreements>.

7. Most activities listed under "Allowable Activities" are more restrictive than the Categorical Exclusion. The restrictions listed in the "Allowable Activities" must be followed.

8. Recipients are responsible for reviewing NEPA and Historic preservation PowerPoint trainings at [www.energy.gov/node/4816816](http://www.energy.gov/node/4816816) and contacting NEPA with any questions at [GONEPA@ee.doe.gov](mailto:GONEPA@ee.doe.gov).

9. This authorization excludes any activities that are otherwise subject to a restriction set forth elsewhere in the Award.

Notes:

Office of State and Community Energy Programs – WAP (Weatherization Readiness & Retrofit Program)  
This NEPA Determination requires legal review of the tailored NEPA provision.  
NEPA review completed by Diana Heyder, 10/25/2025

### FOR CATEGORICAL EXCLUSION DETERMINATIONS

The proposed action (or the part of the proposal defined in the Rationale above) fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D. To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposed action that may affect the significance of the environmental effects of the proposal.

The proposed action has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

The proposed action is categorically excluded from further NEPA review.

A portion of the proposed action is categorically excluded from further NEPA review. The NEPA Provision identifies Topic Areas, Budget Periods, tasks, and/or subtasks that are subject to additional NEPA review.
