Root Causes of the

Root Causes of  
Success

When communicating we often slip into 3 different “professions”:

**1**

## Preachers

- ❑ When our sacred beliefs might be in jeopardy
- ❑ Deliver sermons to protect and promote our ideals

**2**

## Prosecutors

- ❑ Recognize the flaws in other people’s reasoning
- ❑ Marshall arguments to prove them wrong and win our case

**3**

## Politicians

- ❑ Seeking to win over an audience
- ❑ Campaign and lobby for the approval of our constituents

**Instead, think like a Scientist**

# Think like a Scientist

Stay curious

Open-ended,  
generative  
questions

Are you  
observing or  
inferring?

Active listening

Concede a good  
point, even if it runs  
contrary to our own.

## Earn Others' TRUST

# trust

/trəst/

**noun**

**verb**

How others act  
toward us

How we respond  
(behavior, action)

Impact or Result  
(intended/unintended)

### WHEN WE DON'T TRUST

We are more suspicious  
of how others may act  
towards us...

We can become defensive,  
trying to reduce our  
vulnerability...

We lose sight of team  
goals and focus on  
personal interests.

### WHEN WE TRUST

We expect others to  
behave positively  
towards us...

So, we tolerate more  
vulnerability &  
uncertainty...

...and tend to work better  
with others and stay  
focused on team goals.

## ACTIVITY 2: TRUST INTERVIEWS

⇒ *Activity in pairs*

1. Scanning your career, and the many people you've worked with and/or led, consider a time when trust soared. What story or experience comes to mind?
2. Dig deeper into this experience: What helped to build the trust? Consider ways of working, behaviors, systems, practices, conditions, etc. Please be specific.
3. Moving forward, what might you do more of or differently to boost trust around you? Consider small or significant changes to meetings, team member management, and projects you lead.

What we **ask** determines  
what we find.

What we **find** determines  
how we talk.

How we **talk** determines  
how we imagine together.

How we **imagine**  
determines what we  
**achieve** together.

# Ask Powerful Generative Questions

**Ask questions that explore what you WANT**

- Versus what you DON'T WANT

**Adopt an attitude of “scientific” curiosity (not judgment)**

- Ask open-ended questions, ideally ones you don't know the answer to
- Stimulate reflection

**Get on the path toward what you want to accomplish**

- Is your desire to “vent,” or to inspire a positive change in behavior?

**Surface learning: new information, knowledge, perspectives**

- Challenge underlying assumptions- especially your own
- Remember: you don't know what you don't know

**Stimulate creativity and innovative thinking while enrolling others**

- People commit to what they help to create

- O** **Open-ended questions** that allow people to give more information, to feel heard in sharing their perspective, feelings, understanding
- A** **Affirmations** to encourage, help overcome negative thoughts; thank them for their honesty and willingness to share
- R** **Reflective listening** (repeating back) to confirm your understanding and to ensure they feel understood
- S** **Summarize** to clarify what you've learned and next steps

## ACTIVITY 3: OARS

⇒ *Activity in trios*

**O** Open-ended questions

**A** Affirmations

**R** Reflective listening

**S** Summarize

### Roles + Instructions:

1. Teller - shares a reframed challenge
2. Listener - practices OARS
3. Observer - provides feedback
  - What behaviors increased trust?
  - What to keep doing?

**Key Learning**

**Appreciation**

**1st step for putting  
into practice**
