Executive Summary

The Community Services Block Grant (CSBG)

The Community Services Block Grant (CSBG) is unique among federal grant programs in that it is the only comprehensive investment exclusively focused on reducing poverty. CSBG supports a state-administered, nationwide network of local agencies whose purpose is to reduce the causes of poverty in the low-income communities they serve. Funding from CSBG allows states and Community Action Agencies (CAAs) to leverage funding, strategically target the root causes of poverty at the local level, and impact well-being and economic security on a national scale. In Fiscal Year (FY) 2019, every dollar invested in CSBG leveraged \$19.84 of other federal, state, local, volunteer, and private funds including the value of volunteer hours. CAAs receiving CSBG funds effectively use this mix of resources to address the barriers that lead to and perpetuate systemic poverty.

CSBG funding provides a vehicle for state CSBG administrators and local leaders to create coordinated interventions to ensure economic opportunity for all Americans. Due to its flexible nature, CSBG funds allow for innovative programs that address the leading causes of poverty, such as lack of affordable housing, inadequate access to health care, and limited job opportunities. **CAAs, also referred to as CSBG eligible entities, are local, private, nonprofit, or public organizations which are governed by a tripartite board composed of representatives of the low-income neighborhoods being served, elected local officials, and key private partners.**

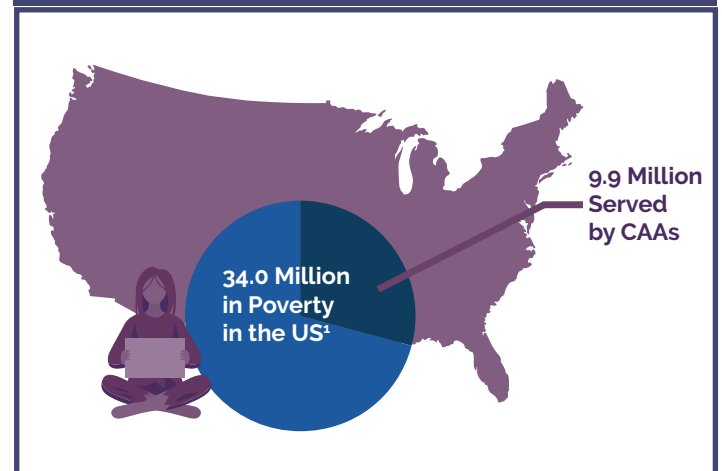

Each CAA coordinates and collaborates with their state CSBG administrators and a wide range of community partners to reduce the causes and consequences of poverty in the low-income communities they serve.

CAAs report on other sources and uses of other funding administered by the CSBG local network, program activities of the network, results of these activities, and number and demographics of participants served. This report summarizes key data from CAAs reported in the CSBG An-

nual Report. FY 2019 marks the second year of data collection through the CSBG Annual Report. This report was designed to complement Results Oriented Management and Accountability (ROMA) Next Generation and support and complete the CSBG Performance Management Framework—more information can be found on page 6 and in the Appendix.

The CSBG Annual Report builds upon Community Action's 55-year history of serving individuals, families, and communities across the United States. In the CSBG Annual Report, CAAs report on the CSBG National Performance Indicators (NPIs) which are used as a tool for setting priorities and monitoring progress toward the broader goal of ending poverty. Individuals and communities face poverty and economic insecurity in varying degrees, across the different domains, ranging from health and housing to employment and education. **The 9.9 million individuals served by CAAs represent nearly 29.0 percent of the 34.0 million Americans in poverty according to the most recent Census data.¹**

FIGURE 1: PEOPLE SERVED IN POVERTY

According to the most recent U.S. Census American Community Survey data, 16.3 percent of the U.S. population had incomes below 125 percent of the poverty threshold and 5.5 percent had an income below 50 percent of the poverty threshold.² Out of the approximately 4.2 million families reporting their poverty status to CAAs, 70.7 percent were at or below the Federal Poverty Guidelines

FIGURE 2: U.S. POPULATION IN POVERTY

(FPL). More than 1.5 million families, 36 percent, were "severely poor," with incomes at or below 50 percent of the Federal Poverty Line. This indicates both the severity of need facing Americans served by the CSBG Network, and the importance of multiple services to move people towards self-sufficiency.

The NPIs track outcomes for comprehensive and coordinated services such as employment, education, housing, health, income and asset building, and civic engagement. It is the approach of CAAs to bundle services across the domains to help people achieve outcomes and their full potential. Research has shown that individuals who receive coordinated or "bundled" services are three to four times more likely to achieve a major economic outcome such as gaining and maintaining employment, earning a vocational certification or associate degree, or buying a car, than individuals receiving only one type of service.³

As poverty often affects multiple generations, the CSBG Network utilizes a whole family approach in combination with the aforementioned "bundled" services in order to fight and end poverty. The whole family approach recognizes that the issues of each family member are interdependent, so the family should work together as a unit to set and achieve goals together. This approach centers on prevention rather than focusing on reacting to crises, and it provides families with the tools and resources needed to achieve lasting change and stability.

The CSBG Network continues to work in economically disadvantaged communities with limited resources to address existing needs, creating a demand for the services and strategies CAAs employ. The CSBG Network plays a critical role in bringing together resources to ensure economic security for people in poverty. This anti-poverty network of over 1,000 state-administered local agencies remains committed to ensuring economic security for vulnerable populations and creating employment opportunities that are accessible for all Americans.

CSBG helps Americans with low incomes obtain employment, achieve and increase their education, access vital early childhood programs, and maintain their independence. It further helps the communities it serves to transform by changing structures and conditions. **The coordinated services provided by the CSBG Network go beyond short-term interventions and strengthen long-term economic security for individuals, communities, and the nation.** The statistics outlined in this report demonstrate the strength and value of CSBG as the national anti-poverty network that coordinates local, state, and federal efforts to secure a promising future for our nation.

Introduction to the CSBG Network

The Community Services Block Grant (CSBG) is a model example of a successful federal-state-local partnership. CSBG is a block grant administered and managed by states, which distribute funds to a nationwide network of over 1,000 local CSBG eligible entities, also known as Community Action Agencies (CAAs), which include local private nonprofit and public organizations, migrant and seasonal farmworker organizations, or other organizations as designated by the states. CSBG's mission is to provide assistance to states and local communities, working through this network of CAAs, for the reduction of poverty, the revitalization of communities where people with low incomes live, and the empowerment of families and individuals with low incomes in rural and urban areas to become self-sufficient. In most states,

CSBG can be found in the state Department of Health & Human Services, Department of Social Services, Department of Community & Economic Development, or the Department of Children & Families. The CSBG state office oversees a statewide network of Community Action Agencies that, along with community partners, have the capacity and local knowledge to effectively deliver innovative programs and achieve state policy goals. Community Action Agencies use CSBG funds to address a wide range of locally identified needs, which may include services and programs that address one or more of the core domains in which they work: employment, education and cognitive development, income, infrastructure and asset building, housing, health and social behavioral development, and civic engagement.

Designated CSBG eligible entities must meet the following statutory requirements:

- Be governed by a unique tripartite board, a three-part community board consisting of one-third elected public officials and at least one-third representatives of the low-income community, with the balance drawn from leaders in the private sector including businesses, faith-based groups, and civic organizations.
- Conduct periodic assessments of the needs of their communities and serve as a principal source of information about, and advocacy for, poverty-reduction actions.
- Maintain a performance-focused system for assessing and reporting the effectiveness of its anti-poverty strategy.
- Develop strategies for achieving the goals of increasing economic opportunity and security for their communities and low-income residents.
- Mobilize and coordinate resources and partnerships to achieve these goals.

CSBG eligible entities, which are primarily private CAAs and public entities, carry out their missions by creating, coordinating, and delivering a broad array of programs and services to their communities. In FY 2019, 1,009 CSBG eligible entities provided services to low-income families, individuals, and vulnerable communities in 99 percent of U.S. counties. Table 1 shows the number of CSBG-funded eligible entities, by type, in the nation. State-specific details can be found in the Appendix.

TABLE 1: LOCAL ORGANIZATIONS BY TYPE

CATEGORY OF ELIGIBLE ENTITY	NUMBER OF ELIGIBLE ENTITIES	NUMBER OF STATES*
Private Community Action Agencies	838	52
Limited Purpose Agencies	10	8
Migrant and/or Seasonal Farm Worker Organizations	10	8
Local Government Agencies	136	18
Tribes and Tribal Organizations	14	2
Other	1	1
TOTAL	1,009	

*Includes all 50 states, American Samoa, District of Columbia, and Puerto Rico.

This collaborative relationship between state and local administrators allows organizations to tailor their anti-poverty efforts to address specific local conditions and capitalize on the unique resources in their states. States and CAAs work together to “stimulate a better focusing of all available local, state, private, and federal resources upon the goal of enabling low-income families, and low-income individuals of all ages, in rural and urban areas, to attain the skills, knowledge, and assistance to secure the opportunities needed for them to become self-sufficient.”⁴ Each CAA focuses their poverty reduction efforts on a specific geographic service area, under the oversight of their board and state CSBG administrator of the CSBG funding.

State CSBG administrators coordinate and develop linkages with other federal, state, and local programs to improve efficiency, access, and results for low-income individuals and communities. Administration at the state level also provides robust accountability and oversight of CSBG, and tracks metrics and performance indicators in domains such as employment, education, housing,

and health, which inform this CSBG National Performance Update Report.

CSBG represents a federal investment and a national commitment to reducing poverty in our nation. This commitment has created a local delivery infrastructure that responds to the national challenges that contribute to poverty in locally appropriate ways. CSBG’s results-driven approach allows states and CAAs to strategically target the root causes of poverty at the local level and measure progress toward the broader goal of ending poverty. CSBG gives local leaders the tools they need to address today’s economic concerns. Additionally, CSBG is a key resource

for many CAAs and often funds cross-cutting programs and supports agency level needs in order to continue necessary work. An important added benefit of receiving CSBG funding is that agencies across the nation share an institutional framework, overarching goals, and a common mission and vision.

Performance Management Framework

In addition to a structure that empowers states to partner with local communities, CSBG is bolstered by a Performance Management Framework to ensure accountability at all levels of the network. This federally established Performance Management Framework includes state and federal accountability measures, organizational standards for CAAs, and a Results Oriented Management and Accountability (ROMA) system:

- State and Federal Accountability Measures ensure that key components of CSBG administration operate efficiently, including timely distribution of funds, use of customer feedback for improvement, monitoring and oversight of eligible entities and states, data analysis and reporting, and creation of linkages and partnerships to assure the effective delivery of services.
- Organizational Standards ensure that CAAs are meeting requirements in implementing maximum feasible participation of the people and communities served in the operations of the agency, the vision and direction of the agency, and operations and accountability.
- Results Oriented Management and Accountability (ROMA) is a system that empowers CAAs and states to address identified needs through data analysis and evaluation and implement continuous improvement in program implementation.

Under the Performance Management Framework, the CSBG Network reports outcomes through the CSBG Annual Report. The CSBG Annual Report was designed to complement ROMA and actualize the overall CSBG Performance Management Framework. More information about the Performance Management Framework and the history of the CSBG Annual Report is available in the Appendix.

The CSBG Annual Report

The 2019 CSBG National Performance Update contains data from the FY 2019 CSBG Annual Report and builds upon Community Action's 55-year history of serving individuals, families, and communities across the United States. All 50 states and two territories provided information on funding level and allocations of CSBG funds, expenditures, other sources of funding administered by the CSBG local network, program activities of the network, outcomes of these activities, demographics, and participants served.

The CSBG Annual Report contains:

Module 1: State Administration (completed by state CSBG Administrators) contains information on state administration of CSBG funding, including information on distribution of funds to CSBG eligible entities, use of state administrative funds and discretionary funds for training and technical assistance, as well as information on CSBG Eligible Entity organizational standards progress and the state's progress meeting accountability measures related to state monitoring, training and technical assistance, and other critical areas. All states report in Module 1 based on the federal fiscal year.

Module 2: Agency Expenditures, Capacity, and Resources (completed by CSBG eligible entities; reviewed, evaluated, and analyzed by state CSBG state administrators) includes information on funds spent by CSBG eligible entities on the direct delivery of local services and strategies and capacity development, as well as information on funding devoted to administrative costs by the CSBG eligible entities.

Module 3: Community Level (completed by CSBG eligible entities; reviewed, evaluated, and analyzed by state CSBG state administrators) includes information on the implementation and results achieved for community-level strategies.

Module 4: Individual and Family Level (completed by CSBG eligible entities; reviewed, evaluated, and analyzed by CSBG state administrators) includes information on services provided to individuals and families, demographic characteristics of people served by CSBG eligible entities, and the results of these services.

State Uses of CSBG Funds

Since FY 19 is only the second year of reporting under all modules of the CSBG Annual Report, trend analysis is not available currently. This will be included in subsequent years with the FY 2018 data serving as the baseline.

It is critical to understand the nature of the CSBG distribution of funding. The Congressional allocation includes funding for states, tribes, territories, and national level discretionary grants. Each state receives a yearly CSBG allocation, but by statute, has a two-year period over which to spend the allocation. Therefore, the total amount of CSBG funding that each state has access to on a yearly basis includes a yearly allocation, plus carryover from the prior year.

At the state level, per the statute, the state is required to allocate 90 percent of the yearly Congressional allocation to local agencies. Additionally, the state may keep 5 percent of the yearly Congressional allocation for state administrative expenses and 5 percent for discretionary funding at the state level, which may go to a CAA or to an organization that is not a CAA. Like states, each agency, therefore, has CSBG funding that may have been carried over from the prior year, the current state allocation, and any discretionary funding, as well as other federal, state, local, and private sources of funding, which also vary by year. As an added factor, each state has its own fiscal year, which may or may not align with the federal fiscal year. These factors combine to create a funding environment in which allocations and expenditures are unlikely to match precisely. State fiscal years, additional sources of federal, state, local, and private funding at the CAA level, and additional state-wide breakdowns of funding can be found in the Appendix.

In FY 2019, Congress appropriated \$724.7 million for CSBG.⁵ States were allocated \$696.5 million, tribes were allocated \$6.4 million, and territories were allocated \$3.7 million. In addition, \$11.2 million was reserved for federal training and technical assistance expenditures.⁶ Some CAAs received these grants, which are separate from their regularly appropriated CSBG allocations.

Grants to local eligible entities

State administrative costs

Discretionary projects

There are three allowable uses for State CSBG funds: grants to local eligible entities, state administrative costs, and discretionary projects. During FY 2019, \$717.1 million was expended by states, including \$146.2 million carried over from FY 2018. States allocated over 91 percent of these funds to eligible entities, totaling over \$656.7 million. The remainder was allocated for state administrative expenses, discretionary funding, and supporting the infrastructure and operations related to administering CSBG funding. The block grant-funded state personnel coordinate multiple programs, manage systems to avoid duplication, and oversee and evaluate the continuity of services and activities provided by CAAs.

GRANTS TO LOCAL ELIGIBLE ENTITIES

The CSBG statute requires no less than 90 percent of the state block grant be allocated to local CSBG eligible entities. States allocated over \$656 million, or 91.6 percent, to the 1,009 CAAs, as shown in Table 2. These funds supported direct services to low-income individuals and communities as well as the management, infrastructure, and operations of the CAAs. **CSBG funds local personnel to provide direct services to low-income individuals and communities, coordinate multiple programs, build local partnerships for reducing poverty, and manage systems to avoid duplication.**

TABLE 2: USES OF CSBG FUNDS

USE OF FUNDS	AMOUNT ALLOCATED*	NUMBER OF STATES***	PERCENTAGE OF FUNDING ALLOCATED
Grants to Local Eligible Entities	\$656,757,181	52	91.6%
State Administrative Costs	\$30,583,240	51	4.3%
Discretionary Projects	\$29,770,083	47	4.2%
TOTAL OBLIGATED IN FY 2019**	\$717,110,504	52	100%
Carried Forward to FY 2020	\$96,453,377	41	13.5%

*Expended funding may differ from allocated funding based on carryover and differing fiscal years and contracts based on state variances.

** This includes funds carried over from FY 2018.

***Includes 50 states, District of Columbia, and Puerto Rico.

STATE ADMINISTRATIVE COSTS

No state may spend more than the greater of \$55,000, or five percent of the block grant for state administrative costs, including monitoring. This administrative allotment provides states with the resources necessary to maintain strong oversight of CSBG through fiscal reporting, data collection and analysis, and ongoing assessments of CAAs. It also helps states coordinate and establish linkages between and among governmental and other social services programs to assure the effective delivery of services to low-income people and avoid duplication of services. As Table 2 shows, states collectively used 4.3 percent for their administrative expenditures.

The block grant funded all or part of 626 state positions, and an additional 230.3 full-time state employees (FTEs). Just as the local agencies administer many federal and state programs in conjunction with CSBG, so do the state CSBG offices. Altogether, state CSBG offices administered an average of four programs per state, in addition to CSBG.

CSBG state administrators are housed in a variety of administrative locations, most often in a state's Social Services and/or Human Services Department or the state's Community Affairs, Community Services, or Community Economic Development Department. A few state CSBG offices are housed in departments related to health, labor, or housing and still others are in a state's executive office. State-specific details showing the administrative locations and responsibilities of CSBG state administrators are available in the Appendix.

FIGURE 3: DISCRETIONARY FUNDS BY PURPOSE

DISCRETIONARY PROJECTS

The remaining funds may be used at the state's discretion for programs that help accomplish the statutory purposes of the block grant. Discretionary project funding by 47 states accounted for 4.2 percent of CSBG expenditures, or \$29.8 million.

These expenditures included:

- Training/technical assistance to CSBG eligible entities
- Coordination of State-operated programs and/or local programs
- Statewide coordination and communication among CSBG eligible entities
- Analysis of distribution of CSBG funds to determine if targeting greatest need
- Asset-building programs
- Innovative programs/activities by CSBG eligible entities or other neighborhood groups
- State charity tax credits
- Other activities

Information for state-level initiatives funded by discretionary grants can be found in the Appendix.

CAA Resources

NATIONWIDE RESOURCES

In FY 2019, CAAs were allocated financial resources totaling over \$14.3 billion from federal, local, state and private sources of funding, including \$701.5 million from CSBG. CSBG is a vital part of CAA funding as it allows them to fund staff, infrastructure, innovative programs, and activities not supported by other resources. Figure 4 shows all sources of federal funding that CAAs manage and the percent of total funding from each source.

While federal programs, predominantly those of HHS, provided 63.4% of non-CSBG funding allocations, private partners contributed nearly \$1.7 billion. Volunteers contributed an additional \$243 million in value, bringing all total resources to over \$14.6 billion. Table 3 shows all allocated resource amounts, as well as the leveraging ratio as compared to CSBG. State-specific details, including federal, state, private, and local allocations, are available in the appendix.

FIGURE 4: FEDERAL SOURCES OF CAA ALLOCATIONS

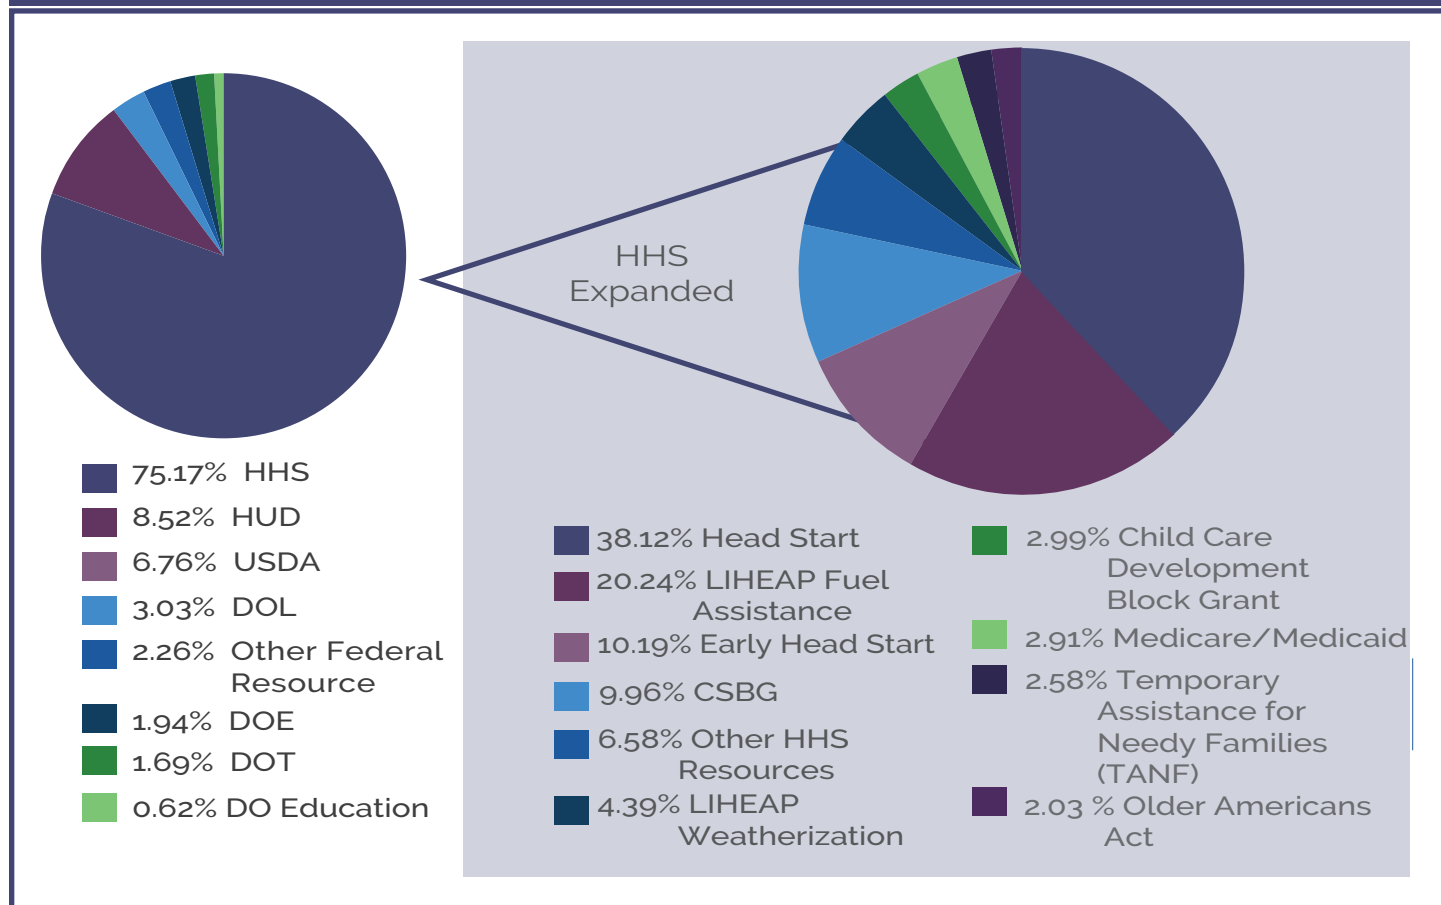

TABLE 3: RESOURCES BY FUNDING SOURCE AS COMPARED TO CSBG

FUNDING SOURCE	ALLOCATION	LEVERAGING RATIO PER \$1 OF CSBG*
CSBG	\$701,477,202	\$1.00**
All Federal Programs (minus CSBG)	\$8,663,329,240	\$12.35
State Sources	\$1,755,520,173	\$2.50
Local Sources	\$1,579,187,658	\$2.25
Private Sources	\$1,676,279,925	\$2.39
Value of Volunteer hours	\$243,488,960	\$0.35
Total Non-Federal Sources***	\$5,254,476,716	\$7.49
TOTAL ALL RESOURCES	\$14,619,283,158	\$19.84

*Calculated by dividing the funding source allocation by the CSBG allocation.

**This amount not included in leveraging totals below.

*** Includes value of state, local, and private sources as well as volunteer hours.

A major function of staff funded by CSBG is developing resources to meet community needs. The high leveraging ratio reflects CAAs' progress towards this goal. CAAs develop partnerships to offer opportunities for private donors, businesses, and volunteers to donate their resources or time to improve the lives of families in their communities. They also generate federal, state, and local government support by obtaining contracts, grants, and partnership agreements. The total financial resources of a given year can reflect the organization's resource development work of the previous fiscal years. Altogether, the non-federal sources of funds matched local CSBG dollars by a ratio of \$7.14 to every dollar of CSBG. If the value of volunteer hours is included, the ratio of these resources to each CSBG dollar increases to \$7.49 for a total of \$19.84 dollars leveraged per dollar of CSBG.

TRENDS IN NETWORK RESOURCES

In FY 2019, the leveraging ratio of CSBG to non-federal funding (excluding the value of the volunteer hours), an important indicator of CAAs' efficacy, which has increased almost 28 percent over the past ten years. This increase demonstrates the efficacy and targeted focus of CAAs to strengthen local, state, and private partnerships for maximum impact. Figure 5 shows the non-federal resources leveraged by CSBG funds for FY 2019.

CAA Uses of CSBG Funds

CAAs typically draw upon resources from many limited-purpose programs to support individual participants and families striving to increase their economic security. CAA programs either fill a gap in community supports or coordinate existing facilities and services.

CAAs also develop the investment partnerships or coalitions to mobilize initiatives that benefit entire communities, such as effective responses to predatory lending or initiatives preventing local business closure.

The block grant funding permits CAAs to coordinate national and state programs to meet local needs. Although most CAAs manage multiple programs that are classified by the group served (such as the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC); Crime Victims Assistance Program; or Emergency Services to the Homeless), CAA projects are classified by the conditions causing poverty that the CSBG statute identifies as major barriers to economic stability.

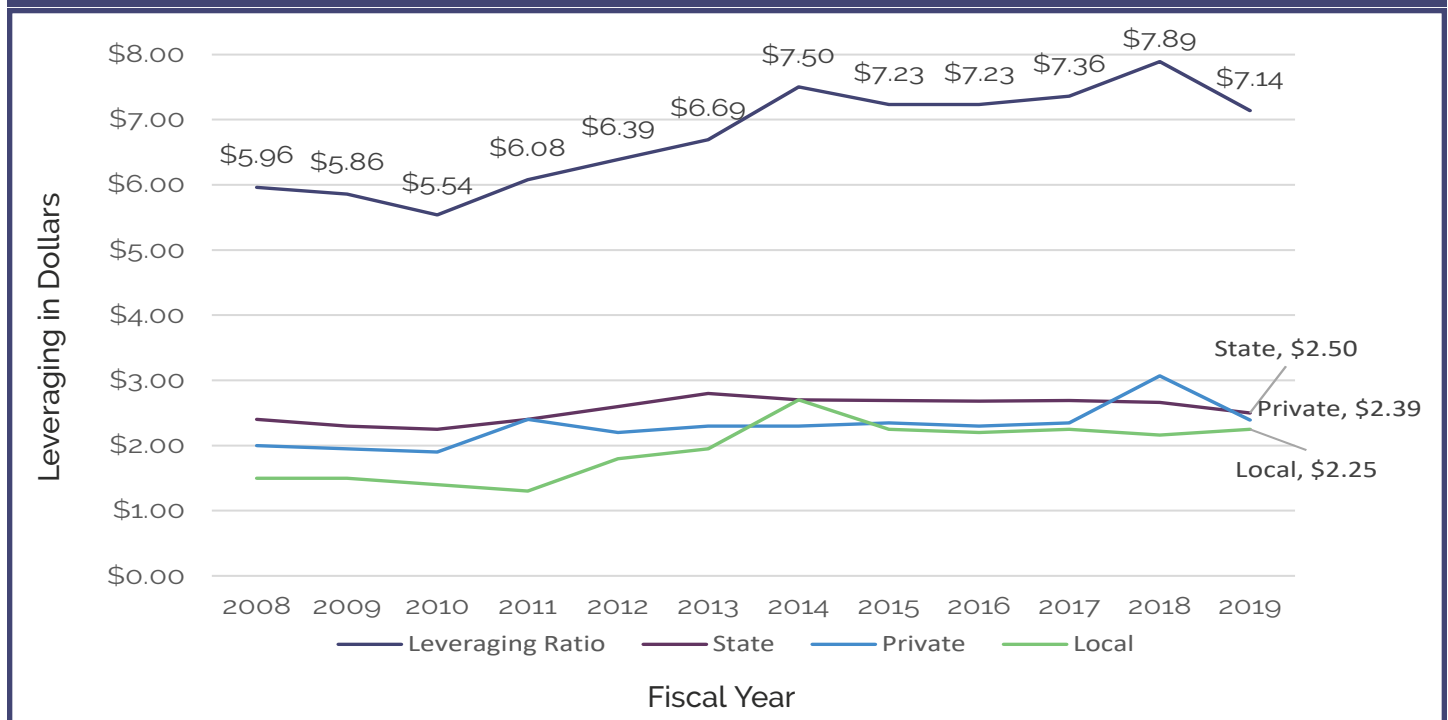

UNIQUE INITIATIVES

Some categories are easy to understand, such as employment, education, income management, health, and housing. Other domains, such as linkages, services supporting multiple domains, and agency capacity building, have a broader scope and require further explanation.

Services supporting multiple domains capture the programs that span or support outcomes achieved across the multiple domains. Examples of services supporting multiple domains include services such as case management, transportation, and childcare.

Agency capacity building is the training, technical assistance, or other activity that helps a board member or staff person improve their skills, knowledge and understanding of CSBG or other entity programs with the explicit purpose of creating knowledge, understanding and capability of the CSBG Eligible Entity to achieve results. Examples of agency capacity building include activities such as staff development, strategic planning sessions, fiscal training, risk assessment, or board retreats.

FIGURE 5: NON-FEDERAL LEVERAGING PER CSBG DOLLAR (\$1.00)

LINKAGES

The term "linkages" describes funding for a unique local institutional role. It refers to the activities that bring together members of a community through mobilizing and coordinating members or groups, and often, government and commercial organizations which serve many communities. Linking a variety of local services, programs, and concerned citizens is an important strategy to combat community-wide causes and conditions of poverty. CAAs categorized 7 percent of their CSBG expenditures, nearly \$45 million, as linkages expenditures.

Linkages also can be observable connections, such as medical transportation, integrated databases of community resources, communications systems, or support and facilities for new community-based initiatives. Linkage programs can involve a variety of local activities that CSBG-funded CAA staff support, including:

- Coordination among programs, facilities, and shared resources through information systems, communications systems, and shared procedures;

- Community needs assessments, followed by community planning, organization, and advocacy to meet these needs;
- Collective impact projects to create community changes, such as reducing crime or partnering with businesses in neighborhoods where people with low incomes live to plan long-term development;
- Efforts to establish links between resources, such as transportation and medical care, or programs that bring services to participants, such as mobile clinics or recreational programs, and management of Continuum of Care initiatives;
- The removal of barriers, such as addressing transportation challenges, that hinder low-income individuals' abilities to access their jobs or other necessary activities;
- Support for other groups of community residents with low incomes who are working for the same goals as the eligible entity.

Figure 6 shows how CAAs expended CSBG funds among these categories. A project in any one category may help to further the multiple goals of CAAs, and many projects fall into more than one of these categories. To ensure unduplicated figures, funds are only reported under the primary category. The expenditures include agencies' CSBG funds and any discretionary funds, as well as any

funds carried forward from the previous year and expended during the reporting period. States and CAAs vary in their methods for recording expenditures. The largest categories of CSBG fund expenditures were services supporting multiple domains (17.3 percent) and housing (15.8 percent).

CAA Resources and Agency Capacity Building

The CSBG Network continually works to increase its capacity to provide high quality services to people and communities. At the local level, one way that CAAs increase their capacity is by investing in staff and board development. Module 2 of the CSBG Annual Report requires agencies to submit data on their agency capacity building efforts such as community engagement, staff credentials, and volunteer hours donated to the agency.

Capacity building is an important piece of an agency's ability to bring about meaningful change to their community's causes and conditions of poverty. This is exemplified by the over 3 million hours agency staff spent on capacity building in FY 19. Capacity building activities include time spent on activities like assessing the needs of the community, strategically planning for the future, implementing more streamlined data systems, and training for staff to be more effective service providers.

TABLE 4: AGENCY CAPACITY	
The CSBG Network worked to expand agency capacity to achieve results:	
Training Participation	
3,938,443	Hours of Agency Staff in capacity building activities
901,401	Hours of Board Members in capacity building activities

The certifications listed below demonstrate the commitment of CAAs to provide quality services to individuals and families. CCAP and ROMA certifications are only two of several professional development opportunities available to the CSBG network workforce. These certifications indicate the ability and capacity of agency staff to implement the highest level of performance management and measurement within their agencies.

TABLE 5: AGENCY CAPACITY

The CSBG Network worked to expand agency capacity to achieve results:

Credentialed Staff in Local CAAs

629	Certified Community Action Professionals (CCAP)
429	Nationally Certified ROMA Trainers
521	Nationally Certified ROMA Implementers
5,285	Family development certified staff
20,994	Child development certified staff
184	Pathways Reviewers
2,173	Home Energy Professional certified staff
1,195	Energy Auditors
938	Retrofit Installer technicians
586	Crew Leaders
863	Quality Control Inspectors (QCI)
959	Building Performance Institute (BPI) certified staff
2,551	Classroom Assessment Scoring System (CLASS) certified staff
618	Certified Housing Quality Standards (HQS) Inspectors
38	American Institute of Certified Planners (AICP)

Many people with low incomes empowered by the CSBG Network are invested not only in their own success, but also that of their community and their peers. To capture the impact and dedication of low-income program participants, the CSBG Annual Report gathers information on volunteer time donated to agencies.

TABLE 6: COMMUNITY ENHANCEMENT THROUGH MAXIMUM FEASIBLE PARTICIPATION

The CSBG Network mobilized low-income individuals to work together for community improvement:

33,584,684	Volunteer hours donated to CAAs.
19,963,072	Volunteer hours donated by low-income individual

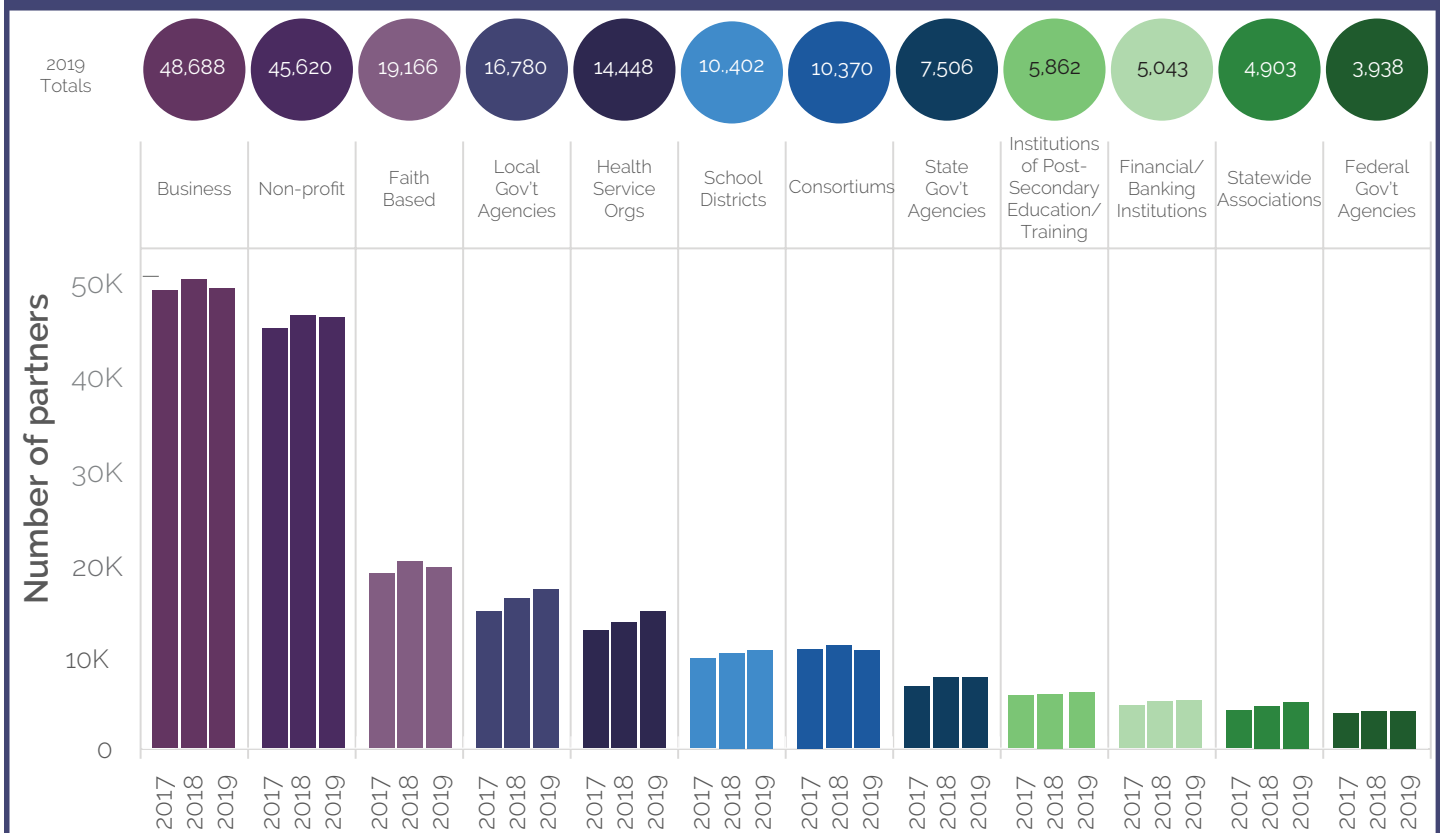

Additionally, CAAs partner with many organizations, businesses, and government agencies to carry out the work of CSBG. In total, CAAs worked with 192,726 organizations in FY 2019. Figure 7 shows a consistent slight increase in partnerships from FY 2017 through FY 2019.

TABLE 7: EXPANDING OPPORTUNITIES THROUGH COMMUNITY-WIDE PARTNERSHIPS

192,726	Organizations worked with the CSBG Network to promote family and community outcomes.		
These organizations included:			
45,620	Nonprofits	10,370	Consortiums/Collaborations
19,166	Faith-Based Organizations	10,402	School Districts
16,780	Local Governments Agencies	5,862	Institutions of Postsecondary Education/Training
7,506	State Governments Agencies	5,043	Financial/Banking Institutions
3,938	Federal Government Agencies	14,448	Health Service Institutions
48,688	For-Profit Business or Corporations	4,903	Statewide Associations or Collaborations

FIGURE 7: PARTNERSHIPS AMONG CAAs, FY 2017-2019

Participants of CAA Programs

In FY 2019, CAAs in every state reported information about the participants in their programs and projects to the state CSBG office. Over 9.9 million individuals and members of 5.0 million families participated in CAA programs. The CSBG Annual Report captured various demographic data for 93 percent of individuals and 88 percent of the families served.⁷

The CSBG Network serves a diverse population with low incomes who live in varied communities. However, the majority of CAA program participants were white, had incomes below the Federal Poverty Guidelines (FPG), and were members of families that relied on either a worker's wages or retirement income. State-specific data on participant characteristics are available in the Appendix.

Individuals and families aided by CAAs face poverty and economic insecurity in varying degrees. However, data

show that CAAs serve some of the poorest and most vulnerable populations in the U.S. The 9.9 million individuals served by CAAs represent over 29 percent of the 34 million Americans who, according to the most recent census data, live in poverty.⁸ According to the most recent U.S. Census American Community Survey data, 16.3 percent of the U.S. population had incomes below 125 percent of the poverty threshold and 5.5 percent had an income below 50 percent of the poverty threshold.⁹ Out of the approximately 4.2 million families reporting their poverty status to CAAs, over 70.7 percent were at or below the FPG for a family of four. More than 1.5 million families, 36 percent, were "severely poor," with incomes at or below 50 percent of the FPG, or below \$12,875 for a family of four.¹⁰ This data indicates that CAAs are successful in targeting and serving populations most in need of their services and programs. Figure 8 shows the proportion of families with incomes at or below percentages of the FPG.

FIGURE 8: POVERTY STATUS OF FY 2019 ELIGIBLE ENTITIES PROGRAM PARTICIPANT FAMILIES ^{7,8}

INCOME SOURCES

Families report all sources of household income, not just the primary source. In addition, approximately 384,000 families who reported their income to CAAs reported zero income. The data underscores the difficulty that families with low incomes face in making ends meet and emphasizes the fact that most families with low incomes have a source of income, but it is not enough to move them out of poverty. The following statistics outline key income trends of families in the CSBG Network who reported one or more sources of income.

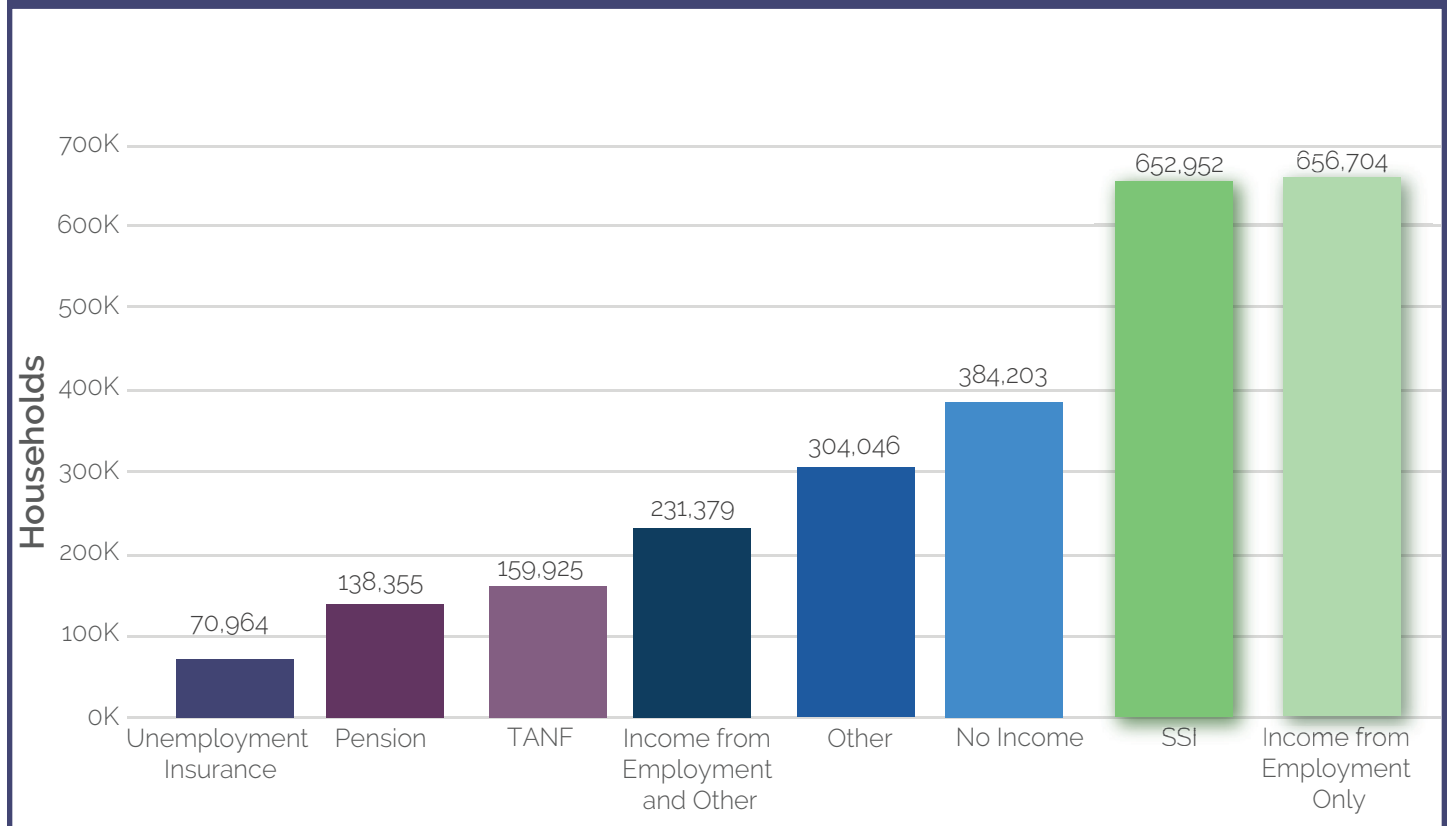

- Over 42 percent of participant families who reported one or more sources of income indicated that some or all their income came from employment.
- Approximately 656,000 low-wage participant families

relied solely on their wages for income.

- Eligible entities served nearly 950,000 families living on retirement income from Social Security or pensions.
- Temporary Assistance for Needy Families (TANF) provided income to less than 6 percent of the families served by eligible entities.

According to recent Bureau of Labor Statistics analysis, the poverty rate for working households in 2019 was 4 percent.¹¹ This statistic indicates that many low-income working families are not making ends meet, so the support of CAA services can help them maintain employment and achieve a better, living wage job.

FIGURE 9: SOURCES OF INCOME FOR CAA PROGRAM PARTICIPANT FAMILIES

FAMILY STRUCTURE OF PARTICIPANTS

CAAs served over 1.5 million two-person and three-person families and over 226,000 families with 6 or more members.

Of the participants reporting family size, 41 percent of families indicated they had children in their family, 45 percent of all families were people who lived alone, and 9 percent reported two adults living alone with no children. Approximately 27% of all CAA program participants' households reporting children were single parent families. Research shows that families headed by a single parent are more likely to be living at or below the poverty line – 10.8% of single fathers and 22% of single mothers.¹² Of the families with children,

- 59.4 percent were headed by a single mother.
- 33.4 percent had both parents present.
- 5.6 percent were headed by a single father.

RACE AND ETHNICITY OF PARTICIPANTS

CAA program participants are ethnically diverse, reflecting the diversity of the communities CAAs serve across the country. Of the 9.9 million individuals served, over 8.5 million reported their race or ethnicity data to CAAs. Ethnicity data indicated that 20 percent self-identified themselves as Hispanic or Latino.¹³

FIGURE 10: FAMILY STRUCTURE OF PARTICIPANTS

Research from the U.S. Census Bureau shows that Black and Hispanic people in the U.S. are over-represented in poverty while White and Asian people are under-represented in the poverty population.¹⁴ Black people represent 13.2% of the total population but make up 23.8% of people in poverty. Hispanic people make up 18.7% of the total population but make up 28.1% of the population in poverty. In FY 2019, 20% or more of participants in 13 states self-identified as Hispanic or Latino. In 5 states, over 50%

FIGURE 11: POVERTY DISTRIBUTION BY RACE AND ETHNICITY

of CAA participants self-identified as Hispanic or Latino. The following racial breakdown reflect CAA participants' voluntarily-provided responses:

- 54.5 percent White
- 28.2 percent African-American
- 4.1 percent multi-racial
- 3.3 percent Asian
- 1.4 percent American Indian or Alaska Native
- 0.8 percent Native Hawaiian and Other Pacific Islander
- 7.6 percent reported other

FIGURE 12: RACE OF CAA PROGRAM PARTICIPANTS

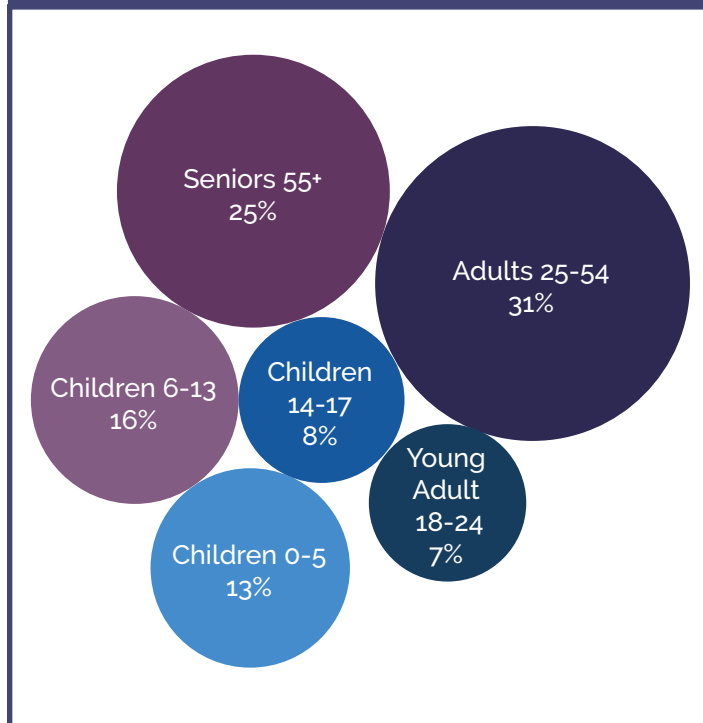

CHILDREN AND SENIORS IN CAA PROGRAMS

The participants in CAA programs included over 3.4 million children under the age of 17. The Census Bureau reports that the poverty rate for children under 18 is 14.4 percent.¹⁵ Reflecting this fact, over 3.4 million children aged 17 and under were served by CAAs. Additionally, approximately 1.2 million, or 13 percent of all CAA program participants, were 5 years of age or younger, as Figure 13 shows. Child poverty is an urgent need across the nation and CAAs are working to alleviate the effects of poverty on this vulnerable population.

Nearly 2.3 million people, or over 24.7 percent of CAA program participants reporting age, were 55 years or older, and 5.6 percent of the participants in that age group were 75 years or older. CAAs helped these older participants maintain their independence and remain engaged in their communities.

FIGURE 13: AGE GROUPS OF CAA PROGRAM PARTICIPANTS

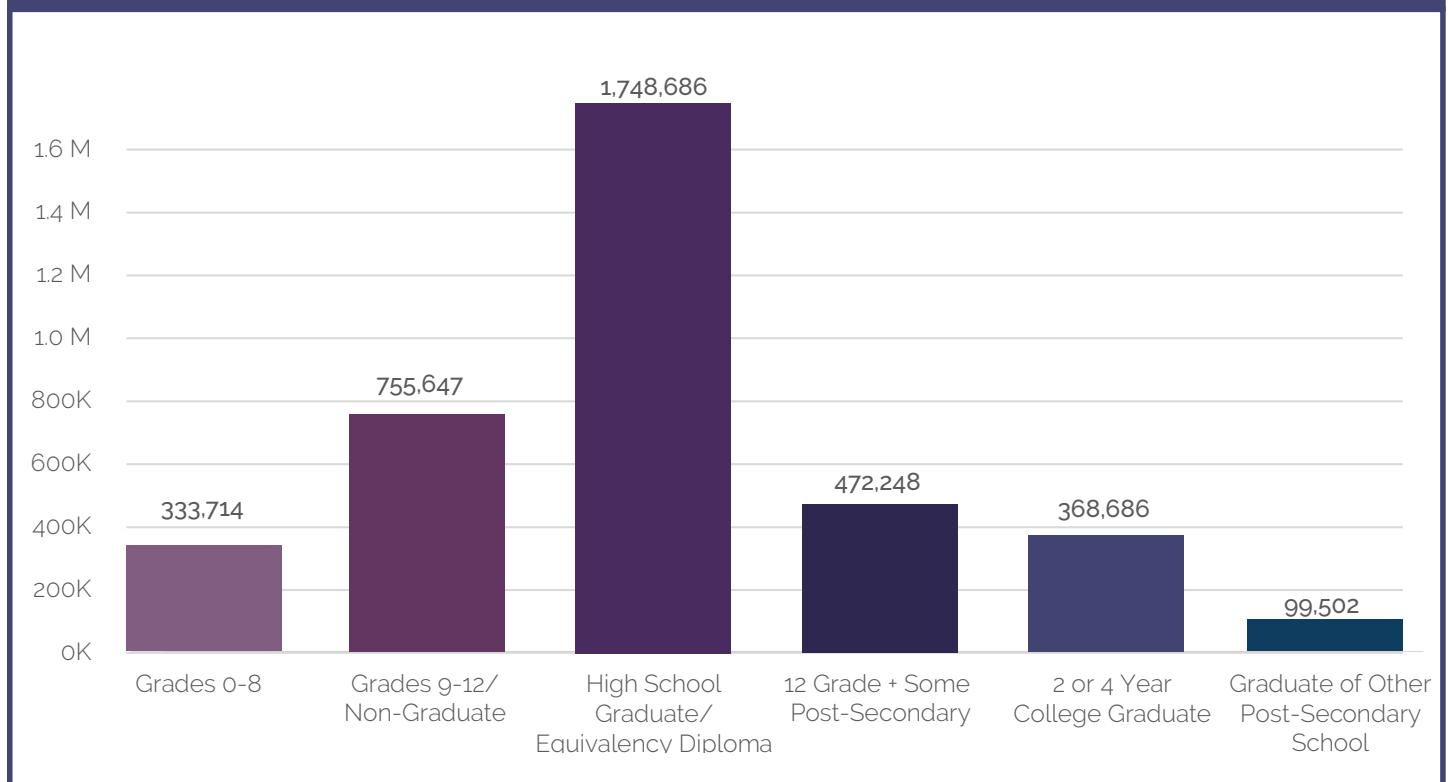

BARRIERS TO ECONOMIC SECURITY

Many CAA program participants face multiple barriers to achieving economic security, such as lack of health insurance or education, living with a disability, and homelessness. Health insurance data offered by 6.7 million participants indicated that 16 percent were without medical insurance. Research shows that lack of health insurance is a strong predictor of future critical hardships for families at all income levels, but is particularly strong for those with incomes below 200 percent of the Federal Poverty Guidelines.¹⁶ For this reason, the work that CAAs do in health services is especially significant in ending a cycle of poverty that impacts families now and for generations to come.

Research also shows that young adults with a bachelor's degree earn 57 percent more than high school graduates and 97 percent more than those who do not have high school diplomas.¹⁷ Over 29 percent of adults over age 24 who reported their educational attainment to CAAs lacked a high school diploma or equivalency certificate, and 48 percent of CAA program participants reported a High school diploma or a GED as their highest educational attainment as shown in Figure 14. CAAs' efforts to improve educational levels for program participants is a key investment.

Data collected from over 7.9 million participants indicat-

FIGURE 14: EDUCATION ATTAINMENT OF CAA PROGRAM PARTICIPANTS, AGE 25+

ed that 21 percent of the CAA program participants had a disability. Research shows that among working-age adults with disabilities, only 19.3 percent were employed.¹⁸ CAAs are critical in assisting people with disabilities to find employment, improve their quality of life, and maintain an independent living situation.

Housing data offered by over 3.8 million participants indicated that 153,832 were homeless. Nationally, approximately 567,715 people were homeless in 2019, this shows

that CAAs served around 27% of the homeless population in the U.S.¹⁹ Homelessness contributes to social and economic challenges. For example, research shows a cyclical relationship between health and homelessness.²⁰ Homelessness leads to poor health, and poor health can lead to homelessness. CAAs provide critical services to help alleviate homelessness and its effects through housing, health services, and other supportive programs.

Results of the Community Service Block Grant

The outcomes documented below demonstrate the CSBG Network's widespread impact on the nation's most vulnerable individuals, families, and communities across the seven domains. This report is based on outcomes which support the CSBG Annual Report NPIs, reported by states and CAAs for FY 2019. Not all agencies participated in the activities which generated outcomes for every domain or each CSBG National Performance Indicator (NPI), nor do these indicators represent all of the outcomes achieved by agencies. To tell a more complete story, narratives about CSBG Annual Report NPI outcome achievements and successes are included along with the national data.

These narratives represent a cross-section of the impact that CAAs make every day in local communities through innovative strategies with the necessary support of CSBG funding. CAAs were able to leverage their CSBG dollars more effectively, expanding and maintaining highly successful program outcomes.

While some participants may have received a single service in only one key area to improve their self-sufficiency, many others received multiple, bundled services. For example, a person coming to a CAA may receive support finding a job, obtain support while pursuing and securing additional education, access stable transportation, and enroll children in quality childcare.

EMPLOYMENT

The CSBG Network assisted individuals with finding and maintaining employment and increasing wages or benefits. CAAs supported these outcomes by partnering with local businesses to provide job training and certifications and by subsidizing positions that would have been eliminated without CSBG Network involvement.

Additionally, CAAs work to reduce or remove challenges facing job seekers. In addition to direct job-seeking and training assistance, CAAs provided many services that removed barriers to employment, such as education attainment, safe and reliable housing, and transportation.

In FY 2019, states reported spending approximately \$75 million in CSBG funds to support a range of services and strategies designed to assist low-income individuals and communities in obtaining and maintaining employment.

These services and strategies include:

- Creation of jobs (including those that offer a living wage) in the community.
- Support for job retention, including counseling, training, and supportive services, such as transportation, child care, and the purchase of uniforms or work clothing.
- Skills training, job application assistance, resume writing, and job placement.
- On-the-job training and opportunities for work.
- Job development, including finding employers willing to recruit through the agency, facilitating interviews, providing counseling to employees through workshops and coaching, and developing new employment supplies.
- Vocational training for high school students and the creation of internships and summer work placements.
- Job search assistance, including coaching, resume development, interview skills training, job referrals, job placement, pre-employment physicals, background checks, etc.
- Providing employment supplies.
- Other specialized adult employment training.

The following employment outcomes were achieved for people served by the CSBG Network and were supported by 854,673 services in the employment domain:

FIGURE 15: EMPLOYMENT OUTCOMES

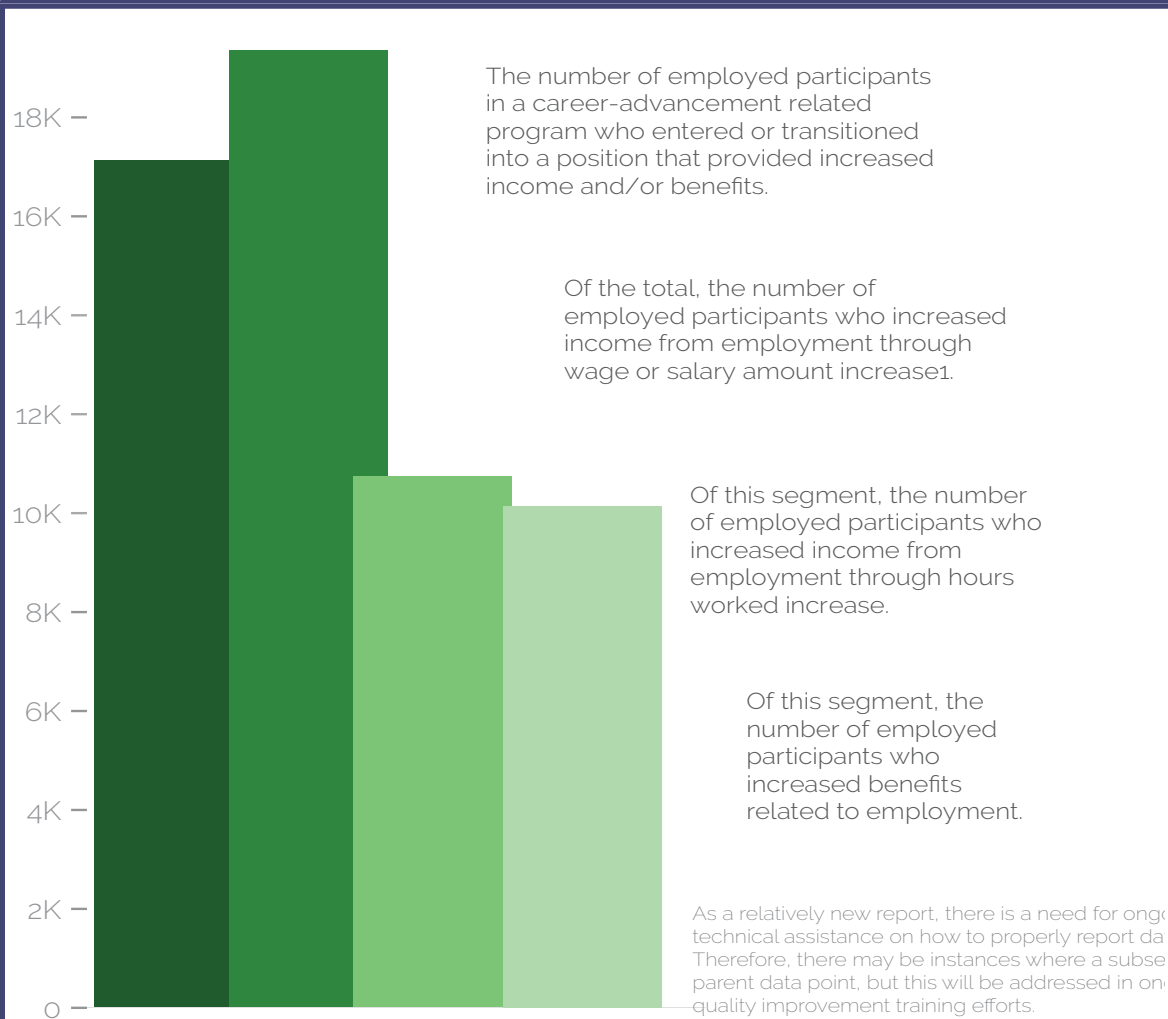

FIGURE 16: EMPLOYMENT OUTCOMES (Continued)

Success Story - Employment

Proteus, Inc.
California

Temporary Employment Program

In the heart of California's central valley is Kings County. As a largely agricultural county, Kings County has been greatly impacted by the drought that California has been experiencing for many years. This has led to dislocated individuals who were employed in the agricultural industry. Identifying a need to help these individuals obtain new skills while continuing to earn a wage, Proteus partnered with La Cooperativa de Campesina, Kings County Department of Public Works, Kings County Department of Transportation, YMCA of Corcoran, CalTrans, City of Hanford, and Lemoore Golf Course to create its Temporary Employment Program. During FFY 2019, Proteus' program was fully enrolled at 135 participants. While participating in the Temporary Employment Program, the participants were provided with temporary employment relief for up to 6 months. While the program focused on helping participants during the six-month period, many of the program participants have been hired on as permanent full-time employees. Not only did this benefit these individuals, but the employers also gained hard-working permanent employees.

EDUCATION AND COGNITIVE DEVELOPMENT

Both children and adults benefit from the educational opportunities provided by the CSBG Network. CAAs make education more accessible to individuals with low incomes through ABE or GED courses, college scholarships, skills training, and a multitude of options and support services based on local need.

In FY 2019, states reported spending approximately \$70 million in CSBG funds to support educational and cognitive outcomes. Strategies and supports included:

- Adding education programs to the community that were not there before.
- Creating childhood learning opportunities (such as preparing kids to enter kindergarten) in distressed neighborhoods.
- Providing Adult education, including courses in English as a Second Language (ESL) and General Educational Development (GED) preparation with flexible scheduling for working students.
- Supplemental support to improve the educational quality of Head Start programs.
- Child care classes, providing both child development instruction and support for working parents or home child care providers.
- Before and after school activities.
- Scholarships for college or technical school.
- College applications, textbooks, computers, and other need supplies.
- Guidance about adult education opportunities in the community.
- Programs to enhance academic achievement of students in grades K–12, while combating drug or alcohol use and preventing violence.
- Computer-based courses to help train participants for the modern-day workforce.

The following education and cognitive development outcomes were achieved for people served by the CSBG Network and were supported by 1,930,716 services in the education domain:

FIGURE 17: EDUCATION AND COGNITIVE DEVELOPMENT OUTCOMES

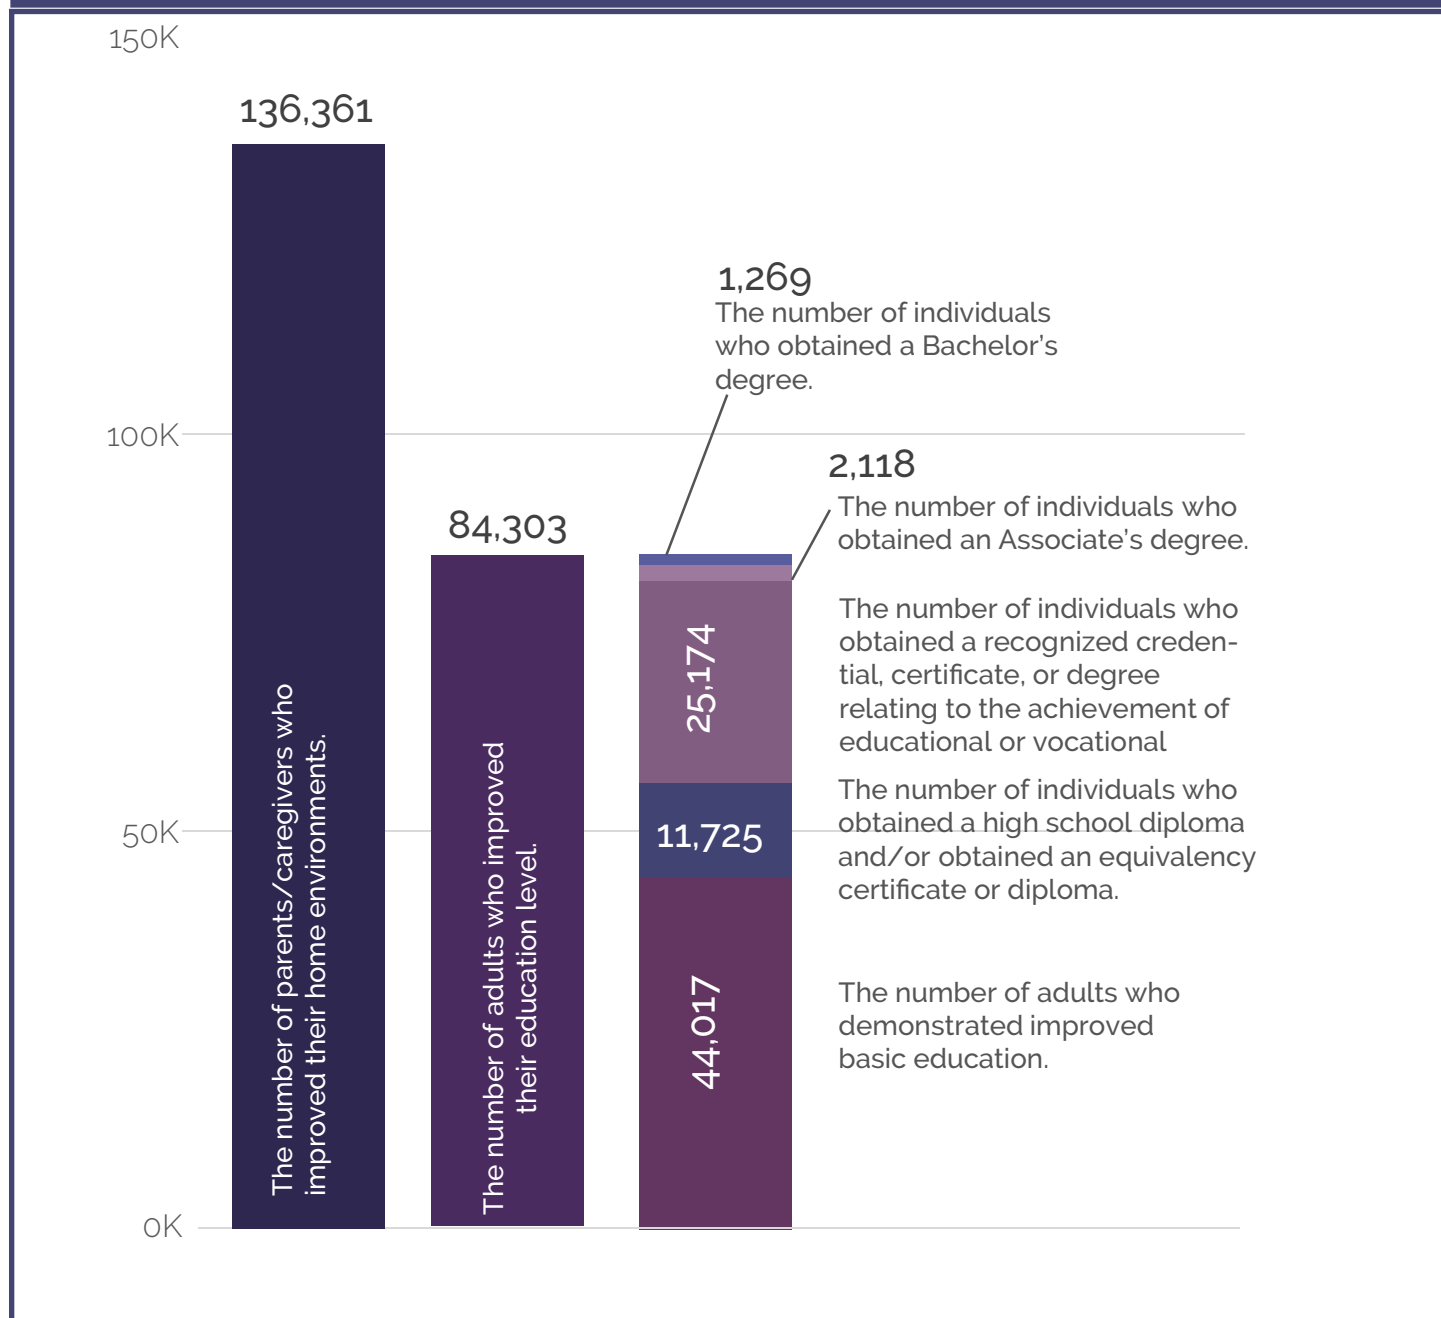

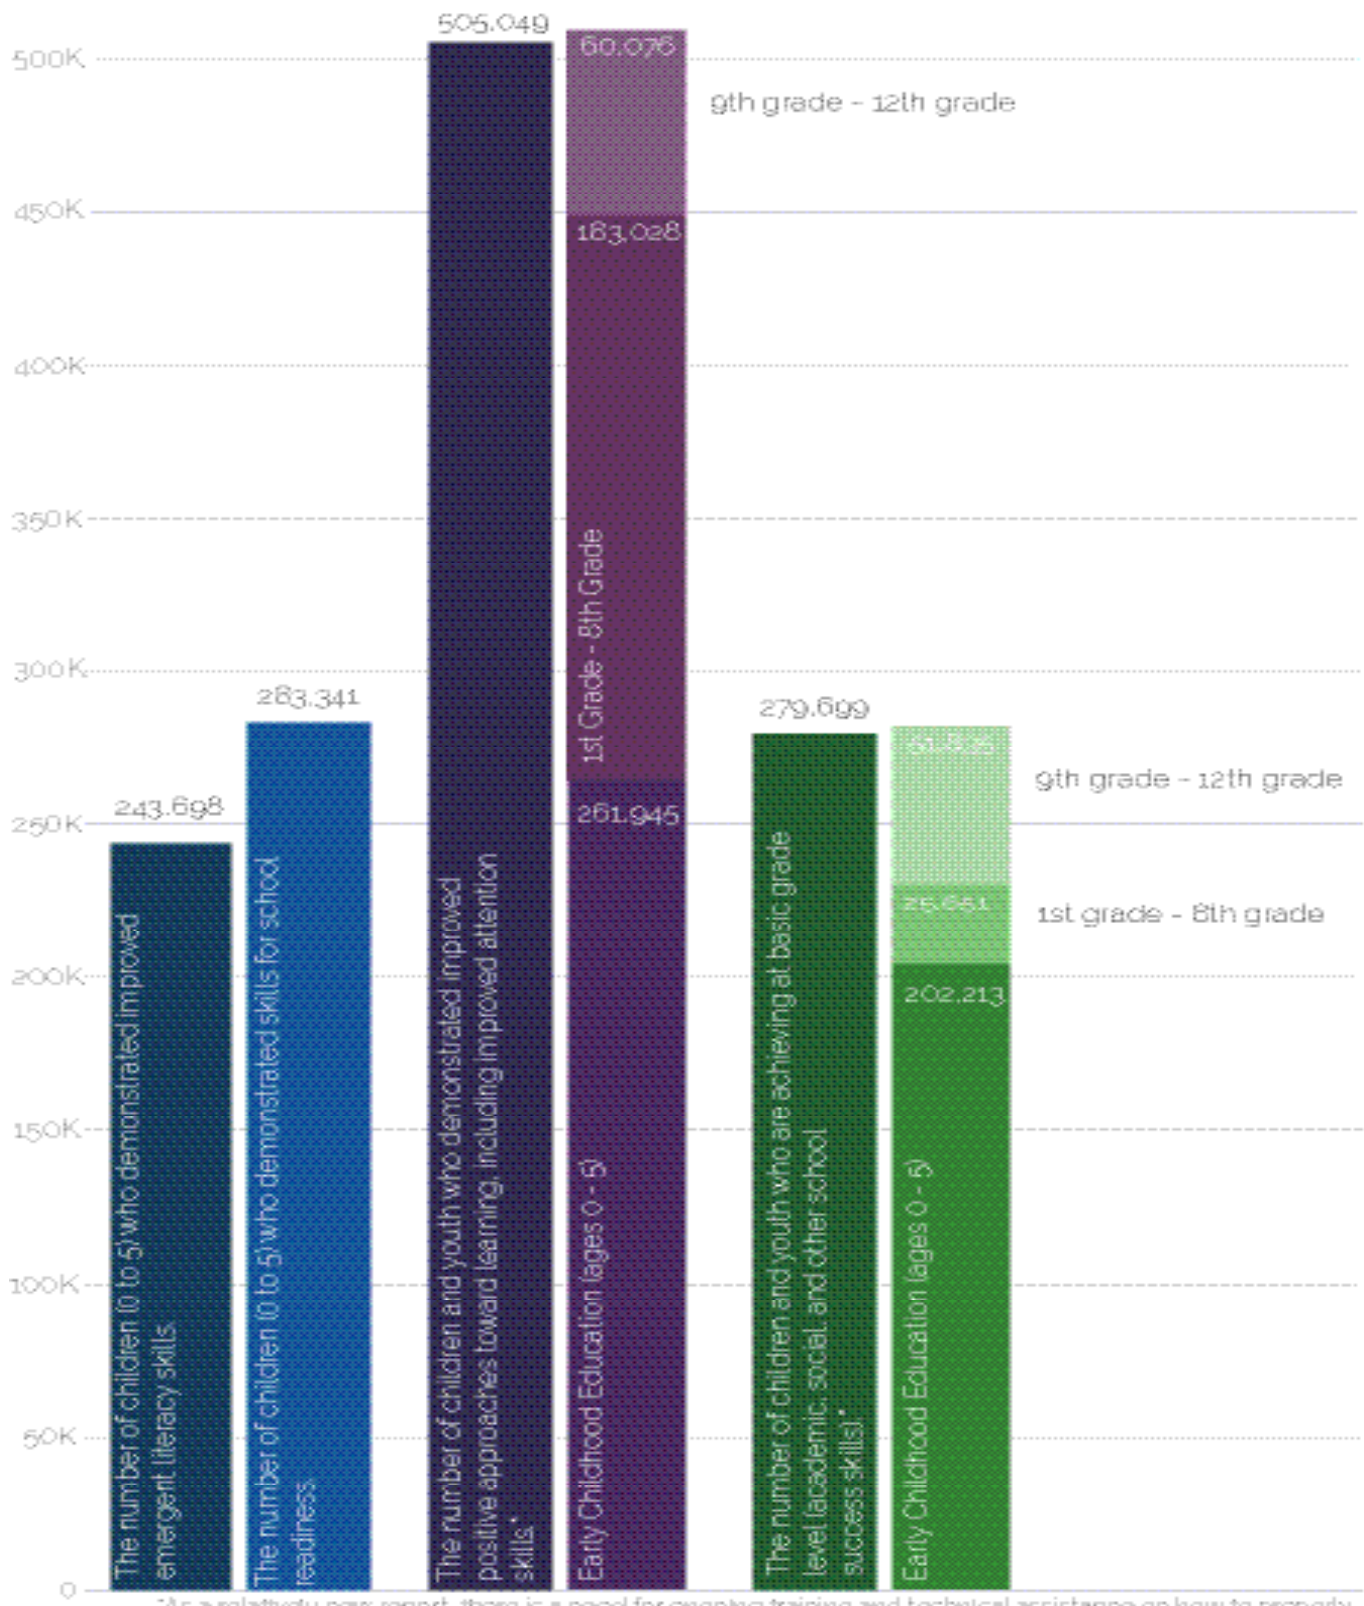

FIGURE 18: CHILDHOOD EDUCATION AND COGNITIVE DEVELOPMENT OUTCOMES

*As a relatively new report, there is a need for ongoing training and technical assistance on how to properly report data points as subsets. Therefore, there may be instances where a subset is exceeding the parent data point, but this will be addressed in ongoing continuous quality improvement training efforts.

INCOME, INFRASTRUCTURE, AND ASSET BUILDING

In FY 2019, states reported spending approximately \$63 million in CSBG funds on income management, infrastructure, and asset-building initiatives and services. Services supported include:

- Additions of needed VITA sites to communities.
- Added banking opportunities.
- Development of household assets, including savings.
- Assistance with budgeting techniques.
- Consumer credit counseling.
- Business development support.
- Homeownership assistance.
- Energy conservation and energy consumer education programs, including weatherization.
- Tax counseling and tax preparation assistance.
- Assistance for the elderly with claims for medical and other benefits.

The following income and asset building outcomes were achieved for people served by the CSBG Network and were supported by 1,044,326 services in the income domain:

FIGURE 19: INCOME AND ASSET BUILDING OUTCOMES

HOUSING

The CSBG Network helped 164,295 households obtain safe and affordable housing. Homes of individuals with low incomes were made more energy-efficient to decrease utility payments and had positive impacts on the health of residents and the environment. There were 893,074 households that experienced improved energy efficiency and reduced energy burden through the Weatherization Assistance Program (WAP) and the Low Income Home Energy Assistance Program (LIHEAP).

In FY 2019, states reported spending over \$102 million in CSBG funds for CSBG-coordinated housing programs to improve the living environment of low-income individuals and families. Services supported include:

- Building apartments and home for people with low incomes.
- Rehabilitating dilapidated housing stock.
- Making homes where people with low incomes live more energy efficient.
- Homeownership counseling and loan assistance.
- Affordable housing development and construction.
- Counseling and advocacy about landlord/tenant relations and fair housing concerns.
- Assistance in locating affordable housing and applying for rent subsidies and other housing assistance.
- Temporary and emergency housing options.
- Transitional shelters and services for the homeless.
- Permanent housing placements.
- Utility assistance.
- Landlord/tenant rights education.
- Home repair and rehabilitation services.

The following housing outcomes were achieved for people served by the CSBG Network and were supported by 4,976,415 services in the housing domain:

FIGURE 20: HOUSING OUTCOMES

HEALTH AND SOCIAL/BEHAVIORAL DEVELOPMENT

CAAs also help children and adults improve and maintain their health in several ways. There were 1,081,788 people who demonstrated improved physical health and well-being in FY 2019. Additionally, 440,006 individuals demonstrated increased nutrition skills like cooking and grocery shopping.

In FY 2019, states reported spending approximately \$89 million in CSBG funds on health initiatives that are designed to identify and combat a variety of health problems in the community served. CSBG funds may be used to address gaps in the care and coverage available in the community. Services supported include:

- Development of new Health Clinics.
- Recruitment of uninsured children to a state insurance group, State Children's Health Insurance Program (SCHIP), or Medicaid.
- Prenatal care, maternal health, and infant health screenings.
- Immunization.
- Periodic screening for serious health problems, including HIV infection, and mental health disorders.
- Treatment for substance abuse.
- Other health services, including dental care, mental health, health insurance advocacy, CPR training, and education about wellness, obesity, and first aid.
- Transportation to health care facilities and medical appointments.
- Opening and operating food banks.
- Assisting food banks of faith-based and civic organization partners with food supplies and/or management support.
- Counseling regarding family and children's nutrition and food preparation.
- Administering the Women, Infants, and Children (WIC) nutrition program.
- Preparing and delivering food and meals
- Initiating self-help projects, such as community gardens, community canneries, and food buying groups.

Success Story - Health

Community Renewal Team, Inc. (CRT) Connecticut

Medication Assisted Treatment

Recognizing that alcohol and opioid abuse is a significant challenge in its community, Community Renewal Team created the Medication Assisted Treatment (MAT) program to support individuals in their recovery. This is accomplished by using a model of comprehensive screening and assessment and medication management, along with education and counseling. During FFY 2019, Community Renewal Team made significant progress towards its program goals as well as increasing services offered to program participants and engaging in programmatic improvement strategies to best support individuals with their recovery. FFY 2019 Highlights are these are listed below.

Goal 1: Increase admissions for MAT Treatment (via staff hiring and training and client engagement and enrollment)

- CRT is in the top 5% of SAMHSA's funded MAT providers in terms of enrollment and follow-up progress.
- 114% of clients enrolled in the first year (57 clients enrolled/contractual goal was 50).
- 173% of in-reach referrals completed in the first year (130 in-reach referrals completed/

Medication Assisted Treatment gives Terri Butcher a whole new outlook on life.

Success Story - Health

contractual goal was 75).

- Three clinicians are able to prescribe buprenorphine (2 physicians and an APRN).

- An eight-hour in-service training for staff was conducted on MAT by Dr. Sanchit Maruti, an addiction specialist from the University of Vermont Medical Center.

- A Policy and Procedure was developed to track staff's continuing education hours.

- A system of weekly multidisciplinary meetings has been implemented through which all CRT Behavioral Health clinicians and clinical coordinators meet to consult on client challenges, client successes, program updates, training, and resources.

Goal 2: Increase the number of clients receiving integrated care/treatment

- Fifty-seven clients have received MAT, which includes medication for Opioid Use Disorder (OUD) and recovery services.

- CRT's MAT program was able to add a new service - the MARA Hartford Hope Group - for individuals with OUD who are using medications to curb their addiction. MARA is open to anyone in the community who meets eligibility requirements (individuals who use medication to curtail their OUD). Unique to our program is the ability to participate in recovery support services via SKYPE.

- Of the 57 clients enrolled,

 - *86% (49) were referred for HIV and Hepatitis C testing.

 - *100% (48) who tested positive for HIV+ were referred to our Ryan White medical case manager.

 - *Ten clients were found to be reactive to Hep-C and were referred to our Ryan White Early Intervention Services program for follow-up for continued medical care.

 - *Six clients were referred to our tobacco cessation services, and all were engaged.

- 80% of clients participating in the program 6 months or longer are still obtaining MAT services.

Goal 3: Decrease the use of opioids at six-month follow up.

- Of the 57 enrollees, at program entry, 33% self-reported as using heroin, 28% other illicit opioid, and 53% any opioid. When surveyed at the 3-month mark, these numbers greatly decreased to 11%, 8%, and 13% any opioid.

- At intake, 5% tested positive for heroin, 63% for other illicit opioid and 67% for any opioid. When surveyed at the 3-month mark, these numbers greatly decreased to 0%, 8% and 21%.

- As fentanyl is so often found in opioid overdoses, the MAT program has an objective to offer fentanyl education to 80%

of MAT enrollees and 100% of individuals who test positive for fentanyl. This was exceeded as all of the enrollees received education. Additionally, the nine enrollees who tested positive for fentanyl were offered a Special Program kit that included Narcan and/or fentanyl testing strips along with instruction in their use. Urine testing of participants showed a remarkable decrease, from 27% positive tests at intake to 10% positive tests at the 6-month mark.

The following health and social/behavioral outcomes were achieved for people served by the CSBG Network and were supported by 58,397,922 services in the health domain:

CIVIC ENGAGEMENT AND COMMUNITY INVOLVEMENT

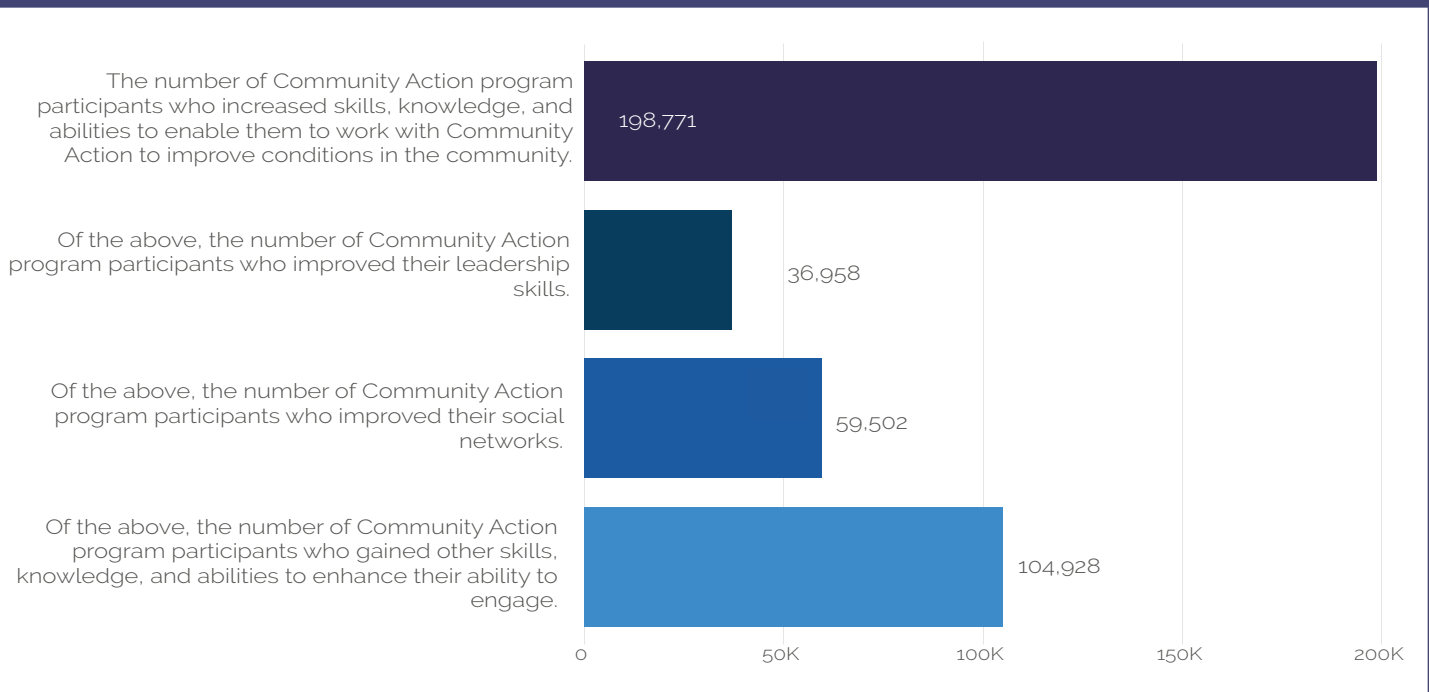

In FY 2019, states reported spending approximately \$17 million in CSBG funds on civic engagement and community involvement initiatives. Services and strategies supported include:

- Increasing resources to support the CSBG Eligible Entity's efforts to address conditions of poverty.
- Increasing people with low incomes who support the CSBG Eligible Entity's approaches to addressing poverty and obtain leadership roles within the entity or another organization

- Leadership Training.
- Tri-partite Board Membership.
- Citizenship Classes.
- Getting Ahead Classes.
- Volunteer Training.

The following civic engagement and community involvement outcomes were achieved for people served by the CSBG Network and were supported by 208,691 services in the civic engagement domain:

FIGURE 22: CIVIC ENGAGEMENT OUTCOMES

OUTCOMES ACROSS MULTIPLE DOMAINS

Because CSBG eligible entities are providing a range of services to individuals and families to move them to stability or economic security, rather than just a single service to meet a short-term need, CAAs offer multiple services in the hopes that people obtain multiple outcomes. Most individuals and families must achieve outcomes in multiple domains to actually move to stability. For instance, achieving improved housing and also obtaining a job; or

improving education or skills and also obtaining a job. As such, this NPI was developed to demonstrate an unduplicated count of all the people who obtained an outcome due to being involved with an eligible entity. In many instances people obtained more than one outcome and are represented under multiple NPIS but are reported here only once.

1,947,314 - The number of individuals who achieved one or more outcomes as identified by the National Performance Indicators in various domains.

Success story - Outcomes Across Multiple Domains

Ogden-Weber Community Action Partnership, Inc.
UTAH

Intergenerational Poverty Advisory Committee and I-CAN

Intergenerational Poverty is when two or more successive generations of family continue living in poverty. Individuals that live in IGP households are ones that tend to use public assistance (e.g., SNAP, Medicare, and TANF) for 12 or more months as an adult and a child. When Ogden-Weber Community Action Partnership (OWCAP) completed its 2019 Community Needs Assessment, the agency learned that 10% or nearly 7,000 children in Weber County are living in intergenerational poverty, which is more than 6% for Utah overall. Moreover, an additional 28% of Weber County children are at-risk of remaining in poverty as adults. During OWCAP's 2019 Community Needs Assessment intergenerational poverty was identified as both a major cause of poverty and a barrier to exiting poverty. As intergeneration poverty is a significant issue in its community, OWCAP knew it was important to tackle it in its multi-year strategic plan and annual Community Action Plan.

Knowing that intergeneration poverty cannot be solved by one agency alone, OWCAP played an active role on the Intergenerational Poverty Advisory Committee, partnering with multiple community partners, including Prosperity Center of Excellence, Weber Human Services, Ogden Civic Action Network, and Weber-Morgan Health Department. This Committee supported the implementation of a county-wide pilot initiative, called Integrated Community Action Now, to decrease intergeneration poverty through increased coordination of resources between community partners, the provision of individualized case management techniques, and provision of direct assistance tailored to the needs of each family. OWCAP's role in the initiative includes helping identify families in the community that want to participate in the initiative, and providing early childhood education and developmental supports to children of participating families. Through its supports, OWCAP will be helping children have a healthy start in their lives, will be able to reach key benchmarks in their development, and their families will build assets for their future.

While still in the early implementation stage, Integrated Community Action Now as already demonstrated that participating families are experiencing an increase in self-sufficiency, improvements in overall health, and an increase in their social capacity and leadership skills. After the initiative's first year, homelessness among participants has dropped from 18% to 1%, the percentage of adults with employment sufficient to meet their families' basic needs increased from 14% to 35%, the percentage of elementary-aged children enrolled in after-school programs went from 6% to 65%, and the percentage of parents taking a more active role in their children's schooling or take part in parenting classes increased from 52% to 100% of participants.

Conclusion

The Community Services Block Grant (CSBG) is for a critical source of funding to assist state administrators and local leaders create planned and coordinated interventions to ensure economic opportunity for all Americans. The effort of the CSBG Network helps move low-income families toward self-sufficiency and rebuilds thriving communities through a coordinated approach at the federal, state, and local levels and provides a range of services and opportunities for individuals and families with low incomes.

CSBG funds programs that address the leading causes of poverty, such as a lack of affordable housing, inadequate access to health care, and limited job opportunities. CSBG helps Americans with low incomes obtain employment, increase their education, access early childhood programs, and maintain their independence.

Current data, which is collected annually from the 50 states, the District of Columbia, and Puerto Rico, measures the impact of states in eliminating barriers to family self-sufficiency and community revitalization. Across family- and community-level domains ranging from health and housing to employment and education, eligible entities helped almost 1.95 million people create change in their lives with the goal of ultimately increasing their economic security and making the communities where they live a better place.

The NPIs track outcomes from support services as well as outcomes from more comprehensive and coordinated services, such as employment initiatives, early childhood programs, continuing education programs, skills training programs, and matched savings for enrollment in higher education. While support services are necessary to alleviating the conditions of poverty, eligible entities are focusing on bundling services, applying intergenerational approaches to alleviating poverty, and providing services to both job seekers and those who are unable to work, such as children and youth, those living with disabilities, and vulnerable seniors. The CSBG Network responded to the national child poverty levels and the increased aging population and provided services to over 3.4 million chil-

dren under the age of 17 and over 2.2 million seniors over the age of 55 in fiscal year (FY) 2019.²¹ The services provided to those who are unable to work addresses the high child poverty and the aging population across the United States and addresses the rising needs for support targeted at youth, seniors, and those living with disabilities.

Aside from direct employment, education is another major factor in becoming economically secure. During FY 2019, more than 2,100 people obtained an associate degree and over 1,200 people obtained a bachelor's degree as a result of CSBG Network assistance. 11,725 people acquired a high school diploma or equivalency certificate, while more than 850,000 services were provided to people in the employment domain.

CSBG works to reduce dependence on other federal safety net services and increase the number of people contributing to the economy by focusing on the most vulnerable populations. Therefore, eligible entities across the nation are placing increased emphasis on providing coordinated services and long-term stability and self-sufficiency of individuals, families, and communities, as well as essential emergency services.

The coordinated services provided by CSBG go beyond short-term interventions and strengthen long-term economic security for individuals, communities, and the nation. Based on annual reports from eligible entities, every dollar invested in CSBG leveraged \$19.84 of other federal, state, local, and private funds, and CSBG's flexibility allows eligible entities to fund innovative programs and activities not supported by other resources.

Appendices

APPENDIX 1: CSBG PERFORMANCE MANAGEMENT FRAMEWORK

HISTORY OF CSBG DATA COLLECTION AND REPORTING

NASCSP and the National Governors Association conducted the first comprehensive survey of state and local uses of federal CSBG funds in a 1983 cooperative venture with outside assistance from the Center for Community Futures. This led to the development of the National Voluntary Reporting System. The Center for Community Futures conducted the surveys of FFY 1984, 1985, and 1986 with guidance from NASCSP's Data Collection Committee. NASCSP has solely conducted the surveys since FFY 1987. In FFY 2005, reporting on the CSBG IS Survey became a federal requirement. The CSBG IS Survey was amended to focus on information of interest to state and federal policymakers, such as the relationship of CSBG to other funding sources and the development of innovative programs.

INFORMATION SYSTEMS SURVEY

A group of stakeholders (State CSBG offices, CAAs, State CAA Associations, and national partners) who felt it important to design a mechanism to collect statistical data to tell the story of the CSBG Network created the Information Systems Task Force (ISTF) in 1983. When NASCSP secured the data collection grant to administer the IS Survey in 1987, it was given the responsibility to staff the ISTF.

The ISTF was an independent committee responsible for designing the data collection tool in a manner that met the political and management needs of the CSBG Network. The independence of the task force was important for a number of reasons. The first is that it allowed for the collection of non-statutory data that helped the CSBG Network communicate how they changed lives and communities. In addition, the ISTF also played a significant role in maintaining data credibility. The ISTF was comprised of one representative from each of the 10 HHS regions, with five representatives from CAAs or State CAA Associations, and five representatives from State CSBG offices, as well as national partners (the National Community Action Foundation, the Community Action Partnership, OCS, and the Association of Nationally Certified ROMA Trainers (then known as National Peer-to-Peer Results Oriented Management and Accountability Network)).

THE CSBG DATA ANALYSIS TECHNICAL ASSISTANCE TASK FORCE

With the advent of the new CSBG Annual Report, a task force was created to inform OCS on the Annual Report implementation process. The CSBG DATA Task Force (DATA TF) is an extension of the ISTF, the DATA TF serves as a consultative body focused on the transition from the CSBG IS Survey to the CSBG Annual Report, as well as ongoing

assistance in the implementation of the CSBG Annual Report. The DATA TF is convened by NASCSP to assist the OCS and NASCSP in understanding and addressing the CSBG Network's data needs and the use of data for analysis and continual improvement of results. The task force consists of representatives from Community Action Agencies, State CSBG Offices, Community Action Agency State Associations, National Partner organizations, and OCS.

The DATA Task Force provides feedback to OCS and NASCSP on the implementation of the CSBG Annual Report, with a focus on how to use CSBG data in all phases of the Results Oriented Management and Accountability (ROMA) cycle. Members of the DATA Task Force collaborate to make recommendations for improvements to the use of data and provide valuable input regarding data collection, data reporting, and affecting change with data.

NATIONAL ASSOCIATION FOR STATE COMMUNITY SERVICES PROGRAMS (NASCSP)

As the membership association for state administrators of both the U.S. Department of Health and Human Service's (HHS) CSBG and the U.S. Department of Energy's (DOE) Weatherization Assistance Program (WAP), NASCSP coordinates semi-annual training conferences for state and local CSBG and WAP staff. NASCSP is the sole provider of orientation and monitor training for new state CSBG and WAP administrators and staff, as well as the only collector of national data to reflect the work of the CSBG Network. NASCSP also provides training and technical assistance to state CSBG Offices and local CAAs upon request in such areas as the basics of CSBG, CAA roles and responsibilities, state roles and responsibilities, as well as various trainings on data collection, reporting, and performance management and measurement. NASCSP also informs the CSBG Network of best practices, innovative program resources, and anti-poverty.

RESULTS ORIENTED MANAGEMENT AND ACCOUNTABILITY (ROMA)

The Monitoring and Assessment Task Force (MATF), a task force of federal, state and local CSBG Network officials, created the framework for the performance management system known as Results Oriented Management and Accountability (ROMA) in 1994. Based upon principles contained in the Government Performance and Results Act of

1993, ROMA provides a process for supporting continuous growth and improvement among local CAAs and a basis for State leadership and assistance.

In 1998, the CSBG Reauthorization Act made ROMA implementation a requirement for receiving federal CSBG funds, and established October 1, 2001, as the start date for reporting outcomes in the context of ROMA performance-based management principles. This statutory mandate changed both the nature and pace of previously voluntary ROMA implementation throughout the CSBG Network.

Information Memorandum (IM) 152, issued by OCS, outlines a new Performance Management Framework. The IM places an enhanced emphasis on analysis and evaluation under ROMA Next Generation. This evaluation and analysis is actualized through the new CSBG Annual Report that will replace the CSBG IS beginning in FFY 2018.

Local CAAs have been encouraged to undertake a number of ROMA implementation actions that focus on results-oriented management and accountability.

RESULTS ORIENTED MANAGEMENT PRINCIPLES

- Assess poverty needs and conditions within the community
- Define a clear anti-poverty mission for the CSBG Network
- Define the strategies and services to address those needs, both immediate and longer term, in the context of existing resources and opportunities in the community
- Identify how the network will incorporate the mission and implementation activities into the National Theory of Change
- Identify specific improvements, or results, to be achieved among people with low incomes and communities in which they live
- Organize and implement programs, services, and strategies within the agency and among partnering organizations, to achieve anticipated results

RESULTS ORIENTED ACCOUNTABILITY PRINCIPLES

- Develop and implement processes to identify, measure,

and record improvements in the condition of people with low incomes and the communities in which they live that result from CSBG Network intervention

- Use information about outcomes, or results, among agency tripartite boards and staff to determine overall effectiveness; inform annual and long-range planning; and promote new funding and community partnership activities
- Compare actual results with intended results as identified in local Theories of Change to assure needs are being addressed as planned
- Encourage state CSBG offices and state CAA associations to work in coordination to advance ROMA performance-based concepts among CSBG Eligible Entities through ongoing training and technical assistance

NATIONAL PERFORMANCE GOALS AND INDICATORS

The CSBG Act Section 678E(a)(1) required states administering CSBG to implement a management and evaluation strategy that measures and reports the performance outcomes of CAAs by FFY 2001.

From 2001 to 2003, OCS worked with national, state, and local CSBG officials to identify the results and performance targets that best reflected the multi-faceted work of CAAs. Priority was given to targets that could be collected and reported in a manner that presented an accurate indication of national impact. Results of this collaboration included the National Performance Indicators (NPIs), used to organize and report outcomes, and the identification of four performance indicators for which target information is collected. The new CSBG Annual Report goals are listed below and the NPIs are available at nascsp.org as well as in the Targeting Summary of this Appendix.

NATIONAL PERFORMANCE GOALS

As directed in OCS's Information Memorandum (IM) #152, under ROMA Next Generation of the new Performance Management Framework, the network moved from six national goals to three. NPIs under the new goals are reported for the first time in this FY 18 report and represent baseline data.

Goal 1: Individuals and families with low incomes are stable and achieve economic security.

Goal 2: Communities where people live are healthy and offer economic opportunity.

Goal 3: People with low incomes are engaged and active in building opportunities in communities.

NATIONAL PERFORMANCE INDICATORS

To enable greater aggregation and national reporting of the most universal and significant CSBG results among states and CAAs, 6 common categories, or domains, of CAA performance were identified from fiscal years 2001 to 2003 data. The CSBG Annual Report NPIs measure incremental progress toward achieving each of the larger goals.

In FY 2018, states began collecting the new set of NPIs in the annual report. The NPIs are organized by community level work (Community National Performance Indicators (CNPIs)) and individual and family level work (Individual and Family Level National Performance Indicators (FNPIs)). The CSBG Annual Report NPIs are organized by six core domains and one unique additional domain that organize the work of CAAs. Community Service Block Grant Domains:

1. Employment
2. Education and Cognitive Development
3. Income and Asset Building
4. Housing
5. Health and Social/Behavioral Development
6. Civic Engagement and Community Involvement
7. Outcomes and Services Across Multiple Domains

Each domain includes its own set of new CSBG Annual Report NPIs which are included in the Appendix.

NATIONAL PERFORMANCE TARGETS & TRENDS

In addition to CSBG's performance measurement initiative, the Executive Office of the President, Office of Management and Budget (OMB) has established a government-wide initiative to use performance targets and outcome mea-

asures to assess the program efficiency and effectiveness of all federally-funded domestic assistance programs. As a result, beginning in FFY 2004 OCS began to develop and report CSBG performance targets, or anticipated levels of achievement. This FY 2018 report represents the thirteenth year of collecting performance targets based on the NPIs.

The nature and scope of national CAA outcome reporting has been incorporated into the CSBG Annual Report NPIs. OCS collects baseline information concerning CAA performance targets to which future years' performances may be compared. This information serves to gauge the effectiveness and efficiency of CAA program activities.

Section 678E of the CSBG statute requires agencies to measure their performance and achievement in carrying out their goals. CAAs set targets for the number of participants they expect to achieve specific goals and then collect data on the number of participants who achieved those goals.

As the data accrue, agencies relate their abilities to predict performance outcomes by dividing the number of participants achieving the goal by the number expected to achieve the goal. The resulting percentage generally assesses CAAs' knowledge of their programs as well as the success of their participants. Trends indicate that agencies' abilities to set targets remain high as the anticipated and actual numbers converge.

TARGETING SUMMARY

Overall, the data demonstrates that despite volatile and hard-to-predict economic conditions, the CSBG Network has remained knowledgeable about its capacity to achieve results and to effectively provide the most needed services to families and communities with low incomes. The majority of targets were over 90% accurate and are available to view in the Appendix. It is important to reiterate that many of these indicators and associated outcomes may take periods of longer than one year to achieve, and many of the individuals enrolled continue to work towards achievement of outcomes over program years. Additionally, changes within local communities and local economic

instability are variables outside of agencies' control and affect targeting projections.

CAAs can use trend data and the ROMA cycle to modify and position their programs and services in anticipation of and are highly successful at modifying and responding to changes in the communities in which they operate to achieve relatively high percentages of their projected outcomes. Targeting is an essential part of the CSBG Network's capacity to anticipate, plan, and respond to needs facing communities and facing families/individuals served throughout the year.

The National Community Action Network

Theory of Change

Community Action Goals

Goal 1

Individuals and families with low incomes are stable and achieve economic security.

Goal 2

Communities where people with low incomes live are healthy and offer economic opportunity.

Goal 3

People with low incomes are engaged and active in building opportunities in communities.

Services and Strategies

Employment

Education & Cognitive Development

Income, Infrastructure & Asset Building

Housing

Health/Social Behavioral Development

Civic Engagement & Community Involvement

Core Principles

- Recognize the complexity of the issues of poverty
- Build local solutions specific to local needs
- Support family stability as a foundation for economic security
- Advocate for systemic change
- Pursue positive individual, family, and community level change
- Maximize involvement of people with low incomes
- Engage local community partners and citizens in solutions
- Leverage state, federal, and community resources

Performance Management

How well does the network operate?

- Local Organizational Standards
- State and Federal Accountability Measures
- Results Oriented Management and Accountability System

What difference does the network make?

- Individual and Family National Performance Indicators
- Community National Performance Indicators

A national network of over 1,000 high performing Community Action Agencies, State Associations, State offices, and Federal partners supported by the Community Services Block Grant (CSBG) to mobilize communities to fight poverty.

APPENDIX 2: STATE CSBG ADMINISTRATION

TABLE 2-A: ADMINISTRATIVE LOCATION OF STATE CSBG OFFICE

State	Lead Agency Department/Cabinet
Alabama	Community Affairs Department
Alaska	Commerce, Community, and Economic Development
Arizona	Human Services Department
Arkansas	Community Services Department
California	Human Services Department

APPENDIX 5: INDIVIDUAL AND FAMILY OUTCOMES

TABLE 5-A: EMPLOYMENT OUTCOMES

Employment (FNPI 1)	I.) Number of Participants Served	II.) Target (#)	III.) Actual Results (#)	IV.) Percentage Achieving Outcome [III/ I = IV]	V.) Performance Target Accuracy (III/II = V)
FNPI 1a The number of unemployed youth who obtained employment to gain skills or income.	130,337	120,208	120,254	92%	100%
FNPI 1b The number of unemployed adults who obtained employment (<u>up to a living wage</u>).	130,494	52,109	48,269	37%	93%
FNPI 1c The number of unemployed adults who obtained and maintained employment for at least 90 days (<u>up to a living wage</u>).	86,293	30,501	28,752	33%	94%
FNPI 1d The number of unemployed adults who obtained and maintained employment for at least 180 days (<u>up to a living wage</u>).	55,000	15,832	14,418	26%	91%
FNPI 1e The number of unemployed adults who obtained employment (<u>with a living wage or higher</u>).	67,968	17,224	14,597	21%	85%
FNPI 1f The number of unemployed adults who obtained and maintained employment for at least 90 days (<u>with a living wage or higher</u>).	52,426	10,695	9,491	18%	89%
FNPI 1g The number of unemployed adults who obtained and maintained employment for at least 180 days (<u>with a living wage or higher</u>).	39,512	4,978	4,895	12%	98%
FNPI 1h The number of employed participants in a career-advancement related program who <u>entered or transitioned</u> into a position that provided increased income and/or benefits.	51,161	18,826	17,103	33%	91%
FNPI 1h.1 Of the above, the number of employed participants who Increased income from employment through <u>wage or salary amount increase</u> .	35,713	10,462	10,728	30%	103%
FNPI 1h.2 Of the above, the number of employed participants who increased income from employment through <u>hours worked increase</u> .	35,473	7,146	10,131	29%	142%
FNPI 1h.3 Of the above, the number of employed participants who <u>increased benefits</u> related to employment.	45,451	14,936	19,331	43%	129%

TABLE 5-B: EDUCATION AND COGNITIVE DEVELOPMENT OUTCOMES

Education and Cognitive Development (FNPI 2)	I.) Number of Participants Served (#)	II.) Target (#)	III.) Actual Results (#)	IV.) Percentage Achieving Outcome [III/ I = IV]	V.) Performance Target Accuracy (III/II = V)
FNPI 2a The number of children (0 to 5) who demonstrated improved emergent literacy skills.	285,691	232,928	243,698	85%	105%
FNPI 2b The number of children (0 to 5) who demonstrated skills for school readiness.	342,960	276,379	283,341	83%	103%
FNPI 2c The number of children and youth who demonstrated improved positive approaches toward learning, including improved attention skills.	536,656	445,781	489,793	91%	110%
FNPI 2c.1 Early Childhood Education (ages 0-5)	301,499	246,386	261,945	87%	106%
FNPI 2c.2 1st grade-8th grade	190,122	168,527	183,028	96%	109%
FNPI 2c.3 9th grade-12th grade	63,800	39,289	60,076	94%	153%
FNPI 2d The number of children and youth who are achieving at basic grade level (academic, social, and other school success skills).	315,346	240,991	274,505	87%	114%
FNPI 2d.1 Early Childhood Education (ages 0-5)	236,864	193,397	202,213	85%	105%
FNPI 2d.2 1st grade-8th grade	30,971	19,852	25,651	83%	129%
FNPI 2d.3 9th grade-12th grade	56,318	30,334	51,835	92%	171%
FNPI 2e The number of parents/caregivers who improved their home environments.	169,212	130,318	136,361	81%	105%
FNPI 2f The number of adults who demonstrated improved basic education.	69,374	37,015	44,017	63%	119%
FNPI 2g The number of individuals who obtained a high school diploma and/or obtained an equivalency certificate or diploma.	48,870	13,202	11,725	24%	89%
FNPI 2h The number of individuals who obtained a recognized credential, certificate, or degree relating to the achievement of educational or vocational skills.	64,893	25,712	25,174	39%	98%
FNPI 2i The number of individuals who obtained an Associate's degree.	27,803	2,723	2,118	8%	78%
FNPI 2j The number of individuals who obtained a Bachelor's degree.	24,194	1,705	1,269	5%	74%

TABLE 5-C: INCOME AND ASSET BUILDING OUTCOMES

Income and Asset Building (FNPI 3)	I.) Number of Participants Served (#)	II.) Target (#)	III.) Actual Results (#)	IV.) Percentage Achieving Outcome [III/ I = IV]	V.) Performance Target Accuracy (III/II = V)
FNPI 3a The number of individuals who achieved and maintained capacity to meet basic needs for <u>90 days</u> .	181,666	141,006	138,857	76%	98%
FNPI 3b The number of individuals who achieved and maintained capacity to meet basic needs for <u>180 days</u> .	102,308	82,562	70,574	69%	85%
FNPI 3c The number of individuals who opened a <u>savings account or IDA</u> .	41,803	7,579	6,808	16%	90%
FNPI 3d The number of individuals who <u>increased their savings</u> .	61,318	16,000	20,875	34%	130%
FNPI 3e The number of individuals who used their savings to <u>purchase an asset</u> .	38,068	5,143	4,410	12%	86%
FNPI 3f The number of individuals who <u>improved their credit scores</u> .	13,875	4,325	4,759	34%	110%
FNPI 3g The number of individuals who <u>increased their net worth</u> .	40,627	7,183	7,299	18%	102%
FNPI 3h The number of individuals engaged with the Community Action Agency who report <u>improved financial well-being</u> .	71,364	30,874	34,981	49%	113%
FNPI 3i The number of individuals engaged with the Community Action Agency who report <u>improved financial well-being</u> .	159,534	101,447	113,538	71%	112%

TABLE 5-D: HOUSING OUTCOMES

Housing (FNPI 4)	I.) Number of Participants Served (#)	II.) Target (#)	III.) Actual Results (#)	IV.) Percentage Achieving Outcome $[(III / I) \times 100]$	V.) Performance Target Accuracy $[(III / II) \times 100]$
FNPI 4a The number of households experiencing homelessness who obtained <u>safe temporary shelter</u> .	126,575	80,552	85,991	68%	107%
FNPI 4b The number of households who obtained <u>safe and affordable housing</u> .	250,589	152,647	164,295	66%	108%
FNPI 4c The number of households who maintained safe and affordable housing for <u>90 days</u> .	156,234	102,153	113,369	73%	111%
FNPI 4d The number of households who maintained safe and affordable housing for <u>180 days</u> .	106,332	74,174	69,357	65%	94%
FNPI 4e The number of households who <u>avoided eviction</u> .	149,521	88,601	102,356	68%	116%
FNPI 4f The number of households who <u>avoided foreclosure</u> .	19,003	8,531	8,416	44%	99%
FNPI 4g The number of households who <u>experienced improved health and safety</u> due to improvements within their home (e.g. reduction or elimination of lead, radon, carbon dioxide and/or fire hazards or electrical issues, etc).	163,648	65,795	76,874	47%	117%
FNPI 4h The number of households with <u>improved energy efficiency and/or energy burden reduction</u> in their homes.	1,012,886	916,042	893,074	88%	97%

TABLE 5-E: HEALTH AND SOCIAL/BEHAVIORAL DEVELOPMENT OUTCOMES

Health and Social/Behavioral Development (FNPI 5)	I.) Number of Participants Served (#)	II.) Target (#)	III.) Actual Results (#)	IV.) Percentage Achieving Outcome [III/ I = IV]	V.) Performance Target Accuracy (III/II = V)
FNPI 5a The number of individuals who demonstrated <u>increased nutrition skills</u> (e.g. cooking, shopping, and growing food).	506,646	453,699	440,006	87%	97%
FNPI 5b The number of individuals who demonstrated <u>improved physical health</u> and well-being.	1,168,868	1,106,334	1,081,788	93%	98%
FNPI 5c The number of individuals who demonstrated <u>improved mental and behavioral health and well-being</u> .	240,273	165,959	155,327	65%	94%
FNPI 5d The number of individuals who <u>improved skills</u> related to the adult role of parents/ caregivers.	246,302	179,120	186,894	76%	104%
FNPI 5e The number of parents/caregivers who <u>demonstrated increased sensitivity and responsiveness</u> in their interactions with their children.	161,655	102,110	116,773	72%	114%
FNPI 5f The number of <u>seniors (65+)</u> who maintained an independent living situation.	503,523	551,813	459,797	91%	83%
FNPI 5g The number of <u>individuals with disabilities</u> who maintained an independent living situation.	373,586	329,595	308,154	82%	93%
FNPI 5h The number of <u>individuals with chronic illness</u> who maintained an independent living situation.	58,581	29,926	33,420	57%	112%
FNPI 5i The number of individuals with <u>no recidivating event</u> for six months.	23,889	21,901	20,337	85%	93%
FNPI 5i.1 Youth (ages 14-17)	6,313	7,345	5,823	92%	79%
FNPI 5i.2 Adults (ages 18+)	21,230	18,850	18,153	86%	96%

TABLE 5-F: CIVIC ENGAGEMENT AND COMMUNITY INVOLVEMENT OUTCOMES

Civic Engagement and Community Involvement Indicators (FNPI 6)	I.) Number of Participants Served (#)	II.) Target (#)	III.) Actual Results (#)	IV.) Percentage Achieving Outcome [III / I = IV %]	V.) Performance Target Accuracy (III / II = V %)
FNPI 6a The number of Community Action program participants who increased skills, knowledge, and abilities to enable them to work with Community Action to improve conditions in the community.	250,944	184,663	198,771	79%	108%
FNPI 6a.1 Of the above, the number of Community Action program participants who improved their leadership skills.	85,848	35,292	36,958	43%	105%
FNPI 6a.2 Of the above, the number of Community Action program participants who improved their social networks.	108,458	49,433	59,502	55%	120%
FNPI 6a.3 Of the above, the number of Community Action program participants who gained other skills, knowledge and abilities to enhance their ability to engage.	137,425	98,561	104,928	76%	106%

TABLE 5-G: OUTCOMES ACROSS MULTIPLE DOMAINS

Outcomes Across Multiple Domains (FNPI 7)	I.) Number of Participants Served (#)	II.) Target (#)	III.) Actual Results (#)	IV.) Percentage Achieving Outcome [III / I = IV %]	V.) Performance Target Accuracy (III / II = V %)
FNPI 7a The number of individuals who achieved one or more outcomes as identified by the National Performance Indicators in various domains.	2,297,190	1,637,634	1,947,314	85%	119%

APPENDIX 6: INDIVIDUAL AND FAMILY SERVICES
